RE: SUPPLEMENTAL COMMENTS
IN THE MATTER OF A PEAK TIME REBATE PROGRAM FOR NORTHERN STATES
POWER COMPANY D/B/A XCEL ENERGY TO FURTHER THE COMMISSION'S
ADVANCED RATE DESIGN EFFORTS IN DOCKET NO. E002/CI-24-115
DOCKET NO. E002/M-24-432

Dear Ms. Bergman:

Northern States Power Company, doing business as Xcel Energy, submits the enclosed Supplemental Comments in response to the August 12, 2025, Notice of Extended Comment Period of the Minnesota Public Utilities Commission in the above-referenced docket.

We have electronically filed this document with the Minnesota Public Utilities Commission, and copies have been served on the parties on the attached service list. Please contact Luke Anderson at 612-216-9238 or Luke.Anderson@xcelenergy.com or contact me at 612-330-7974 or Christopher.J.Shaw@xcelenergy.com if you have any questions regarding this filing.

Sincerely,

/s/

CHRISTOPHER SHAW
MANAGER, REGULATORY POLICY

IN THE MATTER OF A PEAK TIME
REBATE PROGRAM FOR NORTHERN
STATES POWER COMPANY D/B/A XCEL
ENERGY TO FURTHER THE
COMMISSION'S ADVANCED RATE
DESIGN EFFORTS IN DOCKET NO.
E002/CI-24-115

DOCKET NO. E002/M-24-432

SUPPLEMENTAL FILING

INTRODUCTION

Northern States Power Company, doing business as Xcel Energy, submits the enclosed Supplemental Filing in response to the October 31, 2025, Notice of Supplemental Filing and Response Comment Period of the Minnesota Public Utilities Commission (Notice) in the above-referenced docket.

The Company appreciates the opportunity to respond to the Commission Notice and provide further information regarding the capacity benefits of the proposed Peak Time Rebate (PTR) program. In this Supplemental Filing, the Company addresses each topic as requested by the Commission. We note that MISO has proposed reforms that will impact Load Modifying Resources (LMRs), which is typically how we have realized the capacity benefits of our existing demand response (DR) programs in MISO. We continue to monitor the development of those reforms and assess the impact on our customer programs. We would also welcome the opportunity to provide additional updates on our assessment of the capacity value of the PTR program, and other demand response programs in future dockets, including our Energy Conservation and Optimization (ECO) Status Reports and Integrated Resource Plans.

SUPPLEMENTAL FILING

- 1. If at this time the PTR program cannot provide MISO accredited capacity or reduce the Company's MISO capacity obligations, how will the program deliver avoided generation capacity value to Xcel's Minnesota system and customers? How long will it take for these benefits to be realized by customers?**

There are other mechanisms to realize system capacity value even if the PTR will not serve as a MISO accredited resource as initially proposed. As discussed further below, reflecting potential load reductions from PTR in our load forecast may be an option for incorporating the capacity benefits into MISO's annual Planning Resource Auction (PRA). In addition, as discussed in our reply comments, we will incorporate forecasted capacity from the PTR program in our future resource plans. With regard to future consideration of capacity accreditation, the Company will need to implement the PTR program and obtain sufficient data to accurately forecast savings to fully capture the potential capacity benefits of the program. Additionally, the Company will need to assess performance of the PTR program against the participation pathways and corresponding requirements available based upon current and future MISO tariffs and business practices. As discussed in our reply comments, due to the uncertainty in the near-term regarding the expected savings, we do not plan to register this program in MISO. Nevertheless, as discussed further below, customers may realize the capacity benefits of the PTR program through other mechanisms.

- 2. As discussed in the Department's and Fresh Energy's comments, please clarify whether or not Xcel can include the PTR program's avoided demand impacts when calculating its coincident peak demand forecast for resource adequacy purposes. In other words, can the demand reductions from the PTR program reduce Xcel's load forecast and therefore its capacity obligations to MISO? If more certainty about the scale and performance of the program is needed before forecast adjustments can be made, how long does Xcel anticipate it will need to achieve a reasonable level of certainty?**

For the past several years, the Company has generally registered its demand response resources as LMRs with MISO. The Company receives capacity for LMRs that we can use to meet our annual capacity requirements in the PRA. Currently, LMRs are dispatched when MISO calls an emergency event.

The Company is currently evaluating whether demand response, including the PTR program, could be incorporated into our load forecast, which would reduce our capacity obligations. As discussed above, the ability to accurately forecast the capacity of the PTR program is both critical in order to obtain capacity benefits and challenging as a behavioral demand response program. The Company will need to obtain sufficient data in order to accurately forecast the capacity reduction, including assumptions for customer price elasticity and methods for estimated after-the-fact achieved load reduction. It would likely take several years to collect sufficient data for any reasonable degree of certainty. Programs that are not registered as capacity resources in MISO, could still be used to reduce some bulk system needs. As programs are implemented and impact historical loads, this effect will be incorporated into our load forecasts through regression modeling of historical load data.

- 3. As noted in Xcel's Reply Comments, "in the near-term, the PTR program will not be registered in MISO." What steps would be necessary and/or what criteria would the PTR program need to meet, in order for the program to be eligible to register with MISO as a demand response resource or load modifying resource? If applicable, provide a time estimate of how long these steps may take.**

As discussed above, we will need sufficient data in order to accurately forecast the capacity reduction that can be relied on from the PTR program. MISO requires accurate baselines (what load would have been) and verifiable reduction from that baseline. In addition to reliable demand reduction, demand resources must meet other obligations when called for an event such as curtailing within prescribed time windows and maintaining capacity reduction for four consecutive hours. If LMR capacity that is registered with MISO does not perform, it will be subject to penalties or loss of eligibility. As we have emphasized, behavioral demand response like the PTR program faces more uncertainty in performance, which results in more risk when registered as an LMR in MISO.

Moreover, it is critical that, for planning purposes, the Company has reliable forecasts of the capacity that can be relied on from all resources, including LMRs, to meet our customers' needs.

In addition, MISO has filed a series of LMR reforms with FERC in 2025, including FERC Docket Nos. ER25-2845 and ER25-1886. While these proposals have not yet been approved, the reforms include stricter testing requirements,

response times, control requirements, and the potential for more frequent events. In order to qualify as an LMR, the PTR programs will need to meet these requirements if approved by FERC.

- 4. As discussed in Xcel's Reply Comments and Supplemental Comments from the Department and CEE, please explain in detail how Xcel will model the capacity and dispatch of the PTR program during the capacity expansion step of future integrated resource plan modeling, and how that will enable the program's expected demand reductions to reduce the size of incremental resource additions.**

As discussed above, to incorporate the capacity of the PTR program in future integrated resource plan modeling, we will need sufficient data to accurately forecast the amount of reduced capacity. This will take time. Consistent with past resource plans, we plan to develop "bundles" of demand response resources that can be selected in the capacity model to meet customers' needs. The capacity from the selected demand response bundles offsets the need for other resources that would have been selected by the model. By offsetting capacity additions, the benefits of a behavioral DR program will be realized for our customers.

CONCLUSION

The Company appreciates the opportunity to respond to the Commission Notice and provide further information regarding the capacity benefits of the proposed Peak Time Rebate (PTR) program. We look forward to continued dialog and collaboration as we work to advance the PTR program.

Dated: November 21, 2025
