Information Request:

Are there any differences between OTP's and Minnkota's depreciation schedules for transmission-related assets?

Attachments: 0

Response:

Otter Tail Power does not know Minnkota's depreciation schedules. However, as Minnkota paid for its portion of the line as it was constructed, Otter Tail Power has not recognized depreciation on Minnkota's portion of the line. Otter Tail Power is transferring Minnkota's portion at 100% of actual construction cost for that portion.
