In the Matter of an Investigation into
Implementing Changes to the Renewable
Energy Standard and the Newly Created
Carbon-Free Standard under Minn. Stat.
§ 216B.1691

ISSUE DATE: August 7, 2025

DOCKET NO. E-999/CI-23-151

ORDER EXTENDING CREDIT
DURATION FOR EXPEDITED
PROJECTS AND REQUIRING FILINGS

PROCEDURAL HISTORY

In 2023, Minnesota modified its state energy standards to, among other things, create a new Carbon-Free Standard (CFS), codified at Minn. Stat. § 216B.1691, subd. 2g.

On July 4, 2025, Public Law No. 119-21 was adopted, restricting access to federal tax credits for renewable energy facilities.

On July 17, 2025, this matter came before the Commission.

FINDINGS AND CONCLUSIONS

The State of Minnesota has established a goal to reduce statewide emissions of greenhouse gasses (carbon).¹ Supporting this goal, the Minnesota Legislature amended its Renewable Energy Objectives² to add the Carbon-Free Standard.³ This standard directs public electric utilities to acquire sufficient energy from carbon-free sources to meet 80 percent of the needs of their retail customers (and directs other electric utilities to meet 60 percent of the needs of their retail customers) by 2030, and directs all electric utilities to meet all of the needs of their retail customers from carbon-free sources by 2040. The law also directs the Commission to issue orders to facilitate implementation of the new standard.⁴

¹ Minn. Stat. § 216H.02, subd. 1(a).

² Minn. Stat. § 216B.1691.

³ *Id.*, subd. 2g.

⁴ *Id.*, subd. 2d(a).

To help track a utility’s compliance with the Renewable Energy Objectives, the law authorized the Commission to direct utilities to use tradeable Renewable Energy Credits (RECs).⁵ In 2007 the Commission did so, and permitted utilities to use these credits in the year that the credit was created, or in any of the four succeeding years.⁶ Since 2007, the electric industry has begun tracking other types of credits—for example, Alternative Energy Credits (AECs) and Environmental Attribute Credits (EAC)—to recognize related types of generation.

Federal tax credits have helped developers finance the construction of various projects used to meet the Renewable Energy Objectives’ requirements, but this has changed with the passage of Public Law No. 119-21 (the Act). Among other things, the Act restricts access to various federal tax credits and other incentives for building carbon-free sources of electricity. For example, prior law established that a developer building a solar- or wind-powered generator might qualify for federal production tax credits⁷ or investment tax credits,⁸ provided that the project was placed in service within four years after construction began.⁹ Under the new law, a developer that begins building a solar- or wind-powered generator after July 4, 2026, must place the generator in service before 2028 to qualify for these tax credits.¹⁰

These changes alter the context in which Minnesota law and Commission decisions have sought to advance state policy. To ensure that Minnesota ratepayers and utilities make maximum benefit of federal incentives while they last, the Commission will take the following actions.

First, the Commission will direct utilities that must file resource plans under Minn. Stat. § 216B.2422, subd. 2, to file by October 15, 2025, a plan describing the steps the utility will take—or could take with the cooperation of state agencies—to respond to recent changes in federal law. Specifically, these plans should address the following topics:

- If and how the utility intends to accelerate the construction and in-service dates of carbon-free energy projects to maximize the amount of federal tax credits or other federal incentives to the benefit of its Minnesota customers.

⁵ *Id.*, subd. 4.

⁶ *In the Matter of Detailing Criteria and Standards for Measuring an Electric Utility’s Good Faith Efforts in Meeting the Renewable Energy Objectives Under Minn. Stat. § 216B.1691*, Docket No. E-999/CI-03-869, Order Establishing Initial Protocols for Trading Renewable Energy Credits (December 18, 2007), Ordering Paragraph 1. The order refers to the period before a credit expires as its “shelf life.”

⁷ 26 U.S. Code § 45Y - Clean electricity production credit (2024).

⁸ 26 U.S. Code § 48E - Clean electricity investment credit (2024).

⁹ See, e.g., Internal Revenue Service, Notice 2016-31, section 3 (regarding the production tax credit); Notice 2018-59, section 6.05 (regarding the investment tax credit); Notice 2022-61. But note that a federal Executive Order dated July 7, 2025, directs the Secretary of the Treasury to consider issuing “new and revised guidance” on these matters.

¹⁰ The Act, § 70512 – Termination and restrictions on clean electricity production credit; § 70513 - Termination and restrictions on clean electricity investment credit.

- Additional efforts the utility will take to avoid other aspects of the Act that would otherwise increase costs to its Minnesota customers.
- Supportive actions the Commission or other state regulatory bodies could take to mitigate the harms arising from recent changes to federal energy policy.

Second, to provide added incentive to develop carbon-free facilities that may qualify for federal tax credits, the Commission will extend the period for which a utility may use the RECs/AECs/EACs generated from qualifying new solar- or wind-powered facilities to comply with the Renewable Energy Objectives. To qualify, the facility must either (a) begin construction after July 4, 2026, and get put in service by December 31, 2027, or (b) begin construction before July 5, 2026, and get put in service within four years after construction begins. The resulting RECs/AECs/EACs will remain usable in the year they are generated and the following four years—but in addition, these credits will not expire before 2034. Thus, any credits resulting from a new qualifying facility will not expire until well after the Carbon-Free Standard takes effect.

The Commission will so order.

ORDER

1. Each electric utility that is required to file a resource plan under Minn. Stat. § 216B.2422, subdivision 2, shall file a plan in this docket by October 15, 2025, detailing the following:
 - A. If and how the utility intends to accelerate the construction and in-service dates of carbon-free energy projects to maximize the amount of federal tax credits or other federal incentives to the benefit of its Minnesota customers.
 - B. Additional efforts the utility will take to avoid other aspects of Public Law No. 119-21 that would otherwise increase costs to its Minnesota customers.
 - C. What supportive actions the Commission or other state regulatory bodies could take to mitigate negative impacts of recent federal energy policy changes.
2. Prospectively, if a utility meets its obligations under the Renewable Energy Objectives of Minn. Stat. § 216B.1691 using Renewable Energy Credits, Alternative Energy Credits, or equivalent Environmental Attribute Credits from a facility that —
 - A. began construction after July 4, 2026, and was placed in service by December 31, 2027, or
 - B. began construction before July 5, 2026, and was placed in service within four years after construction began,

then those credits will not expire until four years after generation, and in no event before January 2034.

3. This order takes effect immediately.

BY ORDER OF THE COMMISSION

Michael Bull

Mike Bull
Acting Executive Secretary
