

Northwestern Wisconsin Electric Company

Minnesota 2020 Renewable Energy Compliance

Minnesota PUC Docket 03-869 dated November 12th, 2008 allows Northwestern Wisconsin Electric to submit its Wisconsin renewable portfolio standard compliance data, as sent to the Wisconsin PSC, to satisfy its renewable compliance for its Minnesota obligation. That data is included as an attached .pdf file.

Northwestern Wisconsin Electric Company's 2020 Mwh sales to Minnesota retail customers (approximately 98) were 592 Mwh's.

NWE is required to provide 14.48% of sales as renewable. Attached is a summary of NWE's 2020 renewable energy sales, which represents approximately 20% of its total 2020 Mwh sales.

We are a member of M-RETS and use the system for our REC and RRC inventory accounting. I have also attached .pdf document that was sent to the WI PSC for compliance.
