As a concerned citizen of the city of Grand Meadow, the pile of windmill parts is a safety hazard as well as environmental hazard. This pile is beyond the tree line of my back yard. It is an eyesore and will damage property value. That is NOT a dumping ground. Windmills are supposed to help the environment correct? It is a double standard to say that windmills are helping the environment while leaving old windmill parts in a pile and not properly dispose of them. Again it is a safety and environmental hazard. Please take care of the proper removal and disposal as soon as possible.
