

PUBLIC DOCUMENT – NOT PUBLIC DATA HAS BEEN EXCISED

**Benton Solar (IP7115/GS-23-423, ESS-24-283, TL-23-425; OAH 25-2500-40339)
Request #3**

RE: Local Workforce Recruitment

Please provide the following information for each utility-scale wind and solar energy facility built or repowered by NextEra Energy Resources and/or the Company's affiliates in Minnesota and North Dakota between 2019 and 2025. For the purposes of this request, "local workers" and "local construction workforce" includes individuals domiciled in the state where the project is located or within 150 miles of the project location.

Request LIUNA 3-1

Please provide a detailed description of efforts made by the Company, first-tier contractors and subcontractors to recruit local construction workforce, including but not limited to:

- a. Recruitment events - Please include detail on event types, dates, location, advertising/promotion, number of attendees, and number of attendees that secured employment on the project
- b. Locally-targeted advertisements and job postings - Please include names of publications/websites, dates, ad/posting copy, number of applicants, and number of applicants that secured employment on the project
- c. Outreach to registered apprenticeship programs serving the area -

Response to LIUNA 3-1:

Benton Solar objects to this request to the extent it is overbroad, unduly burdensome, vague or ambiguous, seeks information that is neither relevant nor likely to lead to the discovery of admissible evidence in this docket, and seeks information that is not within the possession or control of Benton Solar or its affiliates. Benton Solar interprets this request and references to "Company" to seek information regarding NextEra Energy Resources, LLC's ("NextEra") efforts to recruit local workers. Without waiving these objections, Benton Solar responds as follows:

As a general matter, NextEra hires an engineering, procurement, and construction ("EPC") contractor to oversee the construction of its solar and wind projects. As a result, the EPC contractor, rather than NextEra, hires the incremental workers required to staff project construction needs. Because the contractors are responsible for hiring, NextEra does not collect or maintain information related to those practices unless it is required for compliance with local, state, or federal requirements. Notwithstanding that limitation, and without waiving any of NextEra's or Benton Solar's legal rights, objections, or defenses applicable to the requests, Benton Solar has voluntarily and in good faith communicated these requests to its prime or first tier contractors for the projects in Minnesota and North Dakota between 2019 and 2025, and requested that they provide any information they have that is responsive to the request. Except where publicly provided, the information provided in these responses reflects data voluntarily provided to Benton Solar by third parties as of the date of this response. Because this information was sourced from, and provided by, third parties, Benton Solar is unable to verify the accuracy of the information set forth in this response. Textual

PUBLIC DOCUMENT – NOT PUBLIC DATA HAS BEEN EXCISED

answers provided by contractors are represented in italicized text, while responses from Benton Solar are represented in plain text.

With respect to Request LIUNA 3 generally, Benton Solar has identified the names of the prime contractors for projects in Minnesota and North Dakota between 2019 and 2025 in the table below. Where more than one prime contractor was involved in the project, Benton Solar has indicated (in parentheses) the portion of the project for which the contractor was contracted.

Additionally, Benton Solar provides the information highlighted in grey as Protected Data subject to the March 21, 2025 Protective Order entered in this docket. Such designation indicates the responding EPC contractor provided the information in accordance with the confidentiality provisions of its Engineering, Procurement and Construction Agreement with the respective NextEra project subsidiary and requested such treatment.

Minnesota

- FPL Energy Mower County (Wind Repower)

FPL Energy Mower County Wind, LLC provided information about the recruiting and advertising activities of its contractor, White Construction (“White”), in its required quarterly labor statistics filings. Please see eDockets Doc. ID No. [202011-168315-01](#) and [20212-170963-01](#).

Benton Solar has not received additional information from the EPC contractor, White, as it relates to this request.

- Walleye Windfarm

Walleye Wind, LLC provided information about the recruiting and advertising activities of its contractor, Blattner, in its required quarterly labor statistics filings. Please see eDockets Doc. ID No. [20232-193141-01](#), [20228-188339-01](#), and [202211-190655-1](#).

Benton Solar received the following response from Michels Power, Inc.:

- Michels Power, Inc. (“MPI”) did not attend recruitment events but rather relied on its keymen and the local union referral halls to fulfill its labor needs on the Walleye Wind Farm Project and does not have information regarding subcontractor recruitment efforts.*
- MPI did not attend recruitment events but rather relied on its keymen and the local union referral halls to fulfill its labor needs on the Walleye Wind Farm Project and does not have information regarding subcontractor recruitment efforts.*
- MPI utilized the apprenticeship program for self-performed work and does not have information regarding subcontractor apprenticeship usage.*

Benton Solar received the following response from its EPC contractor, Blattner, as it relates to this request.

- Based on Blattner’s reasonable review of the data in its possession, the following information is provided based on Blattner’s information and belief:*

Union halls recruit all labor performed under a Project Labor Agreement (“PLA”) and Blattner cannot control the union’s recruitment process or policies.

Blattner historically did not track this information and specifics are unknown. In general, Blattner attends local job fairs, contacts local unemployment offices, and will occasionally advertise in a local area.

Project

Response

Lake Benton Wind - II

PLA

At the beginning of the project we took the below steps to hire local workers.

- Radio ads were run in the local region advertising the need for workers*
- Newspaper ads were run in 5 different towns/communities in the local area and on their online portal*
- Yard signs were made and posted along busy traffic areas*
- A job fair was held at the career force center with information posted on their website which went state wide as a public relations article written to gain interest in working for the project*
- A streaming banner was also posted online of the radio stations website for the career fair which received a very high impression/engagement readout performance*

Benton Solar did not receive a response from its EPC contractor, Wanzek, for Ashtabula Wind.

Request LIUNA 3-2

Please provide any analyses, data or other evidence used by the company to assess availability of qualified local construction workforce or to determine that the pool of qualified local construction labor was not sufficient to meet project needs.

Response to LIUNA 3-2:

Benton Solar objects to this request to the extent it is overbroad, unduly burdensome, vague or ambiguous, seeks information that is neither relevant nor likely to lead to the discovery of admissible evidence in this docket, and seeks information that is not within the possession or control of Benton Solar or its affiliates. Benton Solar interprets this request and references to “Company” to seek information regarding NextEra Energy Resources, LLC’s (“NextEra”) efforts to recruit local workers. Without waiving these objections, Benton Solar responds as follows:

As a general matter, NextEra hires an engineering, procurement, and construction (“EPC”) contractor to oversee the construction of its solar and wind projects. As a result, the EPC contractor, rather than NextEra, hires the incremental workers required to staff project construction needs. Because the contractors are responsible for hiring, NextEra does not collect or maintain information related to those practices unless it is required for compliance with local, state, or federal requirements. Notwithstanding that limitation, and without waiving any of NextEra’s or Benton Solar’s legal rights, objections, or defenses applicable to the requests, Benton Solar has voluntarily and in good faith communicated these requests to its prime or first tier contractors for the projects in Minnesota and North Dakota between 2019 and 2025 and requested that they provide any information they have that is responsive to the request. Except where publicly provided, the information provided in these responses reflects data voluntarily provided to Benton Solar by third parties as of the date of this response. Because this information was sourced from, and provided by, third parties, Benton Solar is unable to verify the accuracy of the information set forth in this response.

As indicated in its response to LIUNA 3-1, Benton Solar provides the information highlighted in grey as Protected Data subject to the March 21, 2025 Protective Order entered in this docket. Such designation indicates the responding EPC contractor provided the information in accordance with the confidentiality provisions of its Engineering, Procurement and Construction Agreements with the respective NextEra project subsidiary and requested such treatment.

PUBLIC DOCUMENT – NOT PUBLIC DATA HAS BEEN EXCISED

For ease of reference as it relates to the applicable contractors per project, please refer to the table provided at the top of this Response.

Minnesota

Benton Solar received the following response from its EPC contractor, M. J. Electric, for its scope of work in Buffalo Ridge Wind: *“In all instances, as an IBEW union subcontractor, MJE followed the normal dispatching practices and worked in conjunction with the local IBEW hall to provide craft labor to the projects. MJE's project team did not do any other type of assessment.”*

Benton Solar received the following response from M. J. Electric for its scope of work in Walleye Wind: *“MPI utilized keymen as well as local union and surrounding referral halls to meet project needs.”*

Benton Solar received the following response from its EPC contractor, Blattner, for the following projects within its scope of work:

- Walleye Windfarm
- Buffalo Ridge Wind – I
- Lake Benton Wind – II

Based on Blattner's reasonable review of the data in its possession, the following information is provided based on Blattner's information and belief:

Projects built under a PLA are done so pursuant to the requirements of the union's collective bargaining agreement (“CBA”) and/or the PLA. Union halls recruit all labor performed under a PLA and Blattner cannot control the union's recruitment process or policies or their in-state vs. out-of-state labor recruitment.

Otherwise, Blattner historically did not track this information, and it is unknown.

Benton Solar did not receive further information from the EPC contractor for FPL Energy Mower County (Wind Repower), White, on this request.
