

September 23, 2019

Daniel P. Wolf
Executive Secretary
Minnesota Public Utilities Commission
121 7th Place East, Suite 350
Saint Paul, Minnesota 55101-2147

RE: **Supplemental Comments of the Minnesota Department of Commerce, Division of Energy Resources**
Docket No. E002/M-13-315; E999/CI-15-115

Dear Mr. Wolf:

The Minnesota Department of Commerce, Division of Energy Resources (Department) files these supplemental comments in response to the Minnesota Public Utilities Commission's (Commission) August 29, 2019 Notice of Supplemental Comment Period (Notice) in the following matter:

In the Matter of Xcel Energy – Electric – Rate for Large Solar Photovoltaic Installations; and a Commission Inquiry into Standby Service Tariffs.

The Notice identified the following overall issue and items open for comment:

Issue: What actions should the Commission take in response to the supplemental comments filed by the Department of Commerce on August 16, 2019?

Topics Open for Comment:

- Please clarify final recommendations on:
 - Xcel's proposed Methodology for the PV Demand Credit going forward;
 - The appropriate PV Demand Credit to apply in the interim period, prior to the establishment of a new methodology for the credit; and
 - The potential Commission options provided by the Department of Commerce in their Supplemental Comments, filed August 16, 2019, pages 19-20.

The Department provides this brief background and response.

On February 19, 2019 the Department submitted comments recommending that the Commission require Northern States Power, d/b/a Xcel Energy (Xcel) to propose a new rate design in its next rate case that includes a coincident peak based generation and transmission demand rate and billing quantities, and a non-coincident based distribution demand rate and billing quantities.

In our August 16, 2019 Supplemental Comments, the Department continued to recommend that the Commission require Xcel to propose a new rate design that includes a coincident peak based generation and transmission demand rate and billing quantities, and a non-coincident based distribution demand rate and billing quantities. However, rather than requiring Xcel to propose the rate design for a broad group of its demand-metered customers, the Department recommended that the rate be considered on a pilot basis and that it only be approved for demand-metered customers with behind the meter solar generation.

The Department recommended that the Commission require Xcel to develop a pilot project rate, rather than a permanent rate, in its next rate case for several reasons.

First, Xcel noted that a change to a coincident-peak method of rate design would need to be phased in due to data needs and how large the demand-metered class is—approximately 48,500 customers. All of the demand-metered customers would require interval metering with enough historical usage to forecast significant changes in demand billing quantities, in total and by individual customers. The Department called its new August 16, 2019 proposal a pilot project to denote a major difference with our initial proposal. The pilot rate should only cover demand-metered customers with behind the meter solar installations.

Second, the Department recognizes that presently the Midcontinent Independent System Operator (MISO) focuses on a single summer coincident peak, but that there have been discussions of a seasonal construct that could consider two or more peaks during the year. If such circumstances arise, the Commission could decide whether a rate change would make sense outside of a rate case.

Third, pilot projects are generally approved with evaluation plans. Of course, as part of its proposal, Xcel would need to propose an evaluation plan. The evaluation plan could consider:

- Whether the rate should be continued as is, modified, or terminated for future rate cases.
- The variability in charges during different years (e.g. due to weather).
- Customer understanding of their demand charges.
- How customer bills compare to present rate structure with PV demand credit.

- The billing impact for different customer types (e.g. school, office, retail, hospitality).
- How the billing impact scales with PV system size (relative to site load).
- Whether pilot participation should be limited based on a minimum PV system size threshold (relative to site load).
- Whether the pilot rate structure should be extended to other demand-metered customers.
- Costs of additional equipment needed to implement such a pilot rate.
- Whether Xcel reasonably recovered its costs from customers.
- Whether coincident peak billing changes customer behavior in regards to:
 - Load shape (e.g. peak load variability, load factor),
 - Maintaining PV equipment, and
 - Maximizing PV output during the peak period (i.e. orientation of the PV array).
- How energy storage would affect these evaluation points.

The Department appreciates the Commission's consideration of our proposal for a pilot rate for Xcel's demand-metered solar customers.

Sincerely,

/s/CHRISTOPHER T. DAVIS
Analyst Coordinator

CTD/ar
