—Via Electronic Filing—

RE: PETITION SUPPLEMENT – COTTAGE GROVE BESS
APPROVAL OF PPAS FOR FIRM DISPATCHABLE RESOURCES
DOCKET NOS. E002/CN-23-212 AND E002/RP-24-67

Dear Ms. Bergman:

Northern States Power Company, doing business as Xcel Energy, submits to the Minnesota Public Utilities Commission the enclosed Supplement to our Petition filed September 26, 2025 requesting approval of agreements negotiated between the Company and bidders pursuant to the Settlement Agreement reached between parties in the above-referenced dockets, and as approved by the Commission in its April 21, 2025 Order.¹

In this Supplement, we request approval of a Purchased Power Agreement (PPA) with National Grid Renewables Development, LLC (NGR) for the Cottage Grove Battery Energy Storage System project (Cottage Grove BESS).

- **NGR – Cottage Grove BESS:** a planned 80MW/320 MWh battery storage system designed to provide capacity and stability to the grid, co-located at the existing Cottage Grove Cogeneration facility, a 265 MW combined-cycle gas turbine plant in Cottage Grove, Minnesota.

Portions of the Supplement, and Attachment A in its entirety, are marked “Not-Public” as they contain information the Company considers to be trade secret data as defined by Minn. Stat. § 13.37(1)(b). This data includes confidential negotiation details, pricing and other contractual terms. The information has independent economic value from not being generally known to, and not being readily ascertainable by, other parties who could obtain economic value from its disclosure or use.

¹ *In the Matter of Northern States Power Company d/b/a Xcel Energy’s 2024-2040 Integrated Resource Plan and In the Matter of Xcel Energy’s Competitive Resource Acquisition Process for up to 800 Megawatts of Firm Dispatchable Generation*, MPUC Docket Nos. E002/RP-24-67 and E002/CN-23-212, Order Approving Settlement Agreement with Modifications (IRP Order) at Order Points 1, 13, 14, 15, and 17 (April 21, 2025).

PUBLIC DOCUMENT—NOT-PUBLIC DATA HAS BEEN EXCISED

Specifically, the model Power Purchase Agreement (PPA) is part of the public record through the filed and online 2024 Request for Proposal; this public availability creates a risk that developers could potentially infer the terms we negotiated by comparing the redacted versions to the full model PPA. Although they would not be able to determine the exact specifics of our negotiated terms, they could identify the categories of terms where we deviated from the standard in order to secure the project. This insight, when combined with the public information in our Petition and Supplement, could adversely impact future contract negotiations and potentially increase costs for our customers. For these reasons, the agreement have been marked “Not-Public” in its entirety, and the Company maintains this information as a trade secret.

Pursuant to Minn. R. 7829.0500, subp. 3, the Company provides the following description of the excised Attachment A material:

1. **Nature of the Material:** Attachment A is a PDF copy of an agreement between the Company and Seller for purchase of power to produce electric service.
2. **Authors:** The agreement was drafted by Company’s and Seller’s legal and business development personnel.
3. **Importance:** The agreement includes confidential negotiation details, pricing and other contractual terms. The Seller and the Company maintain this information as trade secret as it has independent economic value from not being generally known to, and not being readily ascertainable by, other parties who could obtain economic value from its disclosure or use.
4. **Date the Information was Prepared:** The agreement was executed on December 2, 2025.

We have electronically filed this document with the Minnesota Public Utilities Commission, and copies have been served on the parties on the attached service lists. Please contact Shannon Whiton at shannon.whiton@xceedenergy.com or me at jody.l.londo@xcelenergy.com if you have any questions regarding this filing.

Sincerely,

/s/

DOCKET NO. E002/CN-23-212
DOCKET NO. E002/RP-24-67

PETITION SUPPLEMENT

INTRODUCTION

Northern States Power Company, doing business as Xcel Energy, submits to the Minnesota Public Utilities Commission this Supplement to our Petition filed September 26, 2025 (Firm Dispatchable PPA Petition) requesting approval of agreements negotiated between the Company and bidders pursuant to the Settlement Agreement reached between parties in the above-referenced dockets, and as approved by the Commission in its April 21, 2025 Order.¹ In this Supplement, we additionally request approval of a Purchased Power Agreement (PPA) with Panamint for the Cottage Grove Battery Energy Storage System project (Cottage Grove BESS).

In our Firm Dispatchable PPA Petition, we informed the Commission that the Company was actively pursuing alternative projects to replace the National Grid Renewables (NGR) 230 MW Plum Creek Wind + 150 MW / 600 MWh BESS project that withdrew from the Settlement Agreement following the IRP Order, and anticipated bringing a replacement project to the Commission for approval in the coming months.² We are pleased to now introduce our proposed replacement for the withdrawn Plum Creek project in this Supplement.

¹ *In the Matter of Northern States Power Company d/b/a Xcel Energy's 2024-2040 Integrated Resource Plan and In the Matter of Xcel Energy's Competitive Resource Acquisition Process for up to 800 Megawatts of Firm Dispatchable Generation*, MPUC Docket Nos. E002/RP-24-67 and E002/CN-23-212, Order Approving Settlement Agreement with Modifications (IRP Order) at Order Points 1, 13, 14, 15, and 17 (April 21, 2025).

² *In the Matter of Xcel Energy's Competitive Resource Acquisition Process for up to 800 MW of Firm Dispatchable Generation and In the Matter of Xcel Energy's 2024-2040 Upper Midwest Integrated Resource Plan*, Docket Nos. E002/CN-23-212 and E002/RP-24-67, National Grid Letter (April 25, 2025).

PUBLIC DOCUMENT–NOT-PUBLIC DATA HAS BEEN EXCISED

Our initial Petition requested approval of the following projects:

- **Invenergy – Cannon Falls:** an existing gas-fired facility consisting of two simple cycle combustion turbines totaling 357 MW located in Cannon Falls, Minnesota.
- **Onward – Mankato Energy Center (MEC):** an existing gas-fired combined cycle facility totaling 375 MW (half of the project – MEC 1), and a new battery energy storage system (BESS) located in Mankato, Minnesota.
- **DESRI – North Star Energy:** a new, 100 MW surplus BESS sited at the existing North Star Solar facility located in Chisago County, Minnesota.

We now add the Cottage Grove BESS to that portfolio:

- **Panamint – Cottage Grove BESS:** a planned 80 MW / 320 MWh battery storage system designed to provide capacity and stability to the grid, co-located at the existing Cottage Grove Cogeneration facility, a 265 MW combined-cycle gas turbine plant in Cottage Grove, Minnesota.

Again, the above projects are expected to deliver benefits to our customers by providing the firm capacity and energy we need to serve them safely, reliably, and affordably.

We provide details regarding the Cottage Grove BESS below.

I. COTTAGE GROVE BESS

This section provides an overview of the Cottage Grove BESS project and outlines the key terms of the PPA agreement with NGR. A copy of the Cottage Grove BESS PPA is included as Attachment A.

A. Cottage Grove BESS Project Overview

The Cottage Grove 80 MW / 320 MWh BESS PPA with Panamint is designed to provide capacity and stability to the grid, co-located at the existing Cottage Grove Cogeneration facility, a 265 MW combined-cycle gas turbine plant in Cottage Grove, Minnesota.

The project plans to interconnect to the grid at the Chemolite 115 kV Substation. It is part of the MISO 2022 DPP cycle and is expected to have an executed Generation Interconnection Agreement (GIA) by August 2026.

Project details for Cottage Grove BESS are summarized in Table 1 below.

Table 1
Cottage Grove BESS Project Details

Project Type	BESS
Nameplate Capacity	80 MW/320 MWh
Developer	NGR
Project Location	Cottage Grove, Minnesota
Project Structure	PPA
COD	June 1, 2028
Contract Terms	15 years
Capacity Price	[PROTECTED DATA BEGINS PROTECTED DATA ENDS]

B. Cottage Grove BESS PPA Terms

The Cottage Grove BESS project provides needed system capacity with long-term price certainty for our customers. Through prudent contracting practices and during negotiations with Panamint, we have identified, assessed, and mitigated major risks with maximizing potential benefits through the contract terms.

1. Payment Rate

The 80 MW / 320 MWh Cottage Grove BESS PPA includes fixed capacity payments of **[PROTECTED DATA BEGINS** **PROTECTED DATA ENDS]** for a 15-year term.

2. Performance Adjustment Mechanisms

The Cottage Grove BESS PPA includes several performance-based adjustment mechanisms that align with the RFP model PPA. Performance provisions are designed to ensure that the facility delivers reliable, high-quality service and that payments to the Seller are aligned with actual performance. These mechanisms, described below, are structured to align Seller compensation with actual system performance, incentivize high availability and efficiency, and provide flexibility for operational realities.

a. Capacity Availability Factor (CAF) Adjustment

The monthly capacity payment varies based on the actual availability of the project each month. The CAF reflects the actual available capacity of the battery storage

PUBLIC DOCUMENT–NOT-PUBLIC DATA HAS BEEN EXCISED

system, adjusted for scheduled maintenance. If the facility is unavailable due to forced outages or underperformance, the Seller's payment will be reduced accordingly. This mechanism incentivizes the Seller to maximize system availability and reliability throughout the contract term.

b. Round Trip Efficiency Adjustment

The contract requires the battery storage system to meet its committed round-trip efficiency (RTE) levels each year. RTE is the ratio of energy discharged compared to energy charged reflecting the efficiency of the project's charging capabilities. If the actual RTE falls below the guaranteed levels, the monthly payment is reduced. This ensures that the Seller is financially motivated to maintain the battery's efficiency over time.

c. Excess Throughput

If the Cottage Grove battery is discharged above the annual throughput limit, the Seller is entitled to an additional payment for each megawatt-hour (MWh) of excess energy delivered. This payment is set at **[PROTECTED DATA BEGINS PROTECTED DATA ENDS]** for energy discharged above the annual throughput limit, providing an incentive for the Seller to make the system available even beyond its planned throughput, while also protecting the facility from overuse that could degrade the asset.

d. Penalties for Failure to Respond to Dispatch

If the Seller fails to accurately or timely respond to a dispatch notice, and the market operator imposes a penalty or charge on the Company as a result, the Company may pass through those charges to the Seller by reducing the next monthly payment.

3. Critical Path Development Milestones

The PPA requires achievements of certain milestones that are critical to the successful and timely development of the project, referred to as "Critical Path Development Milestones." If the Cottage Grove BESS misses or is anticipated to miss a critical milestone, it must establish a recovery plan to restore the project's schedule. Further, if the Cottage Grove BESS fails to reach these critical milestones by the respective deadlines, it will be subject to liquidated delay damages. If the project fails to achieve COD by its target, it will again be subject to liquidated delay damages. And if it fails to achieve COD altogether, the Company can terminate and collect damages for termination.

4. Security Fund

Cottage Grove BESS is required to fund and maintain security in favor of the Company following execution and throughout development and the term of the contract (Security Fund). The Company may draw from this Security Fund to recover amounts owed to the Company for liquidated delay damages, actual damages, and liquidated damages for failure to reach the Critical Path Development Milestones or failure to achieve COD.

5. Resource Attributes Conveyed to the Company

The Cottage Grove BESS PPA ensures that the Company receives all capacity and environmental attributes from the project. This ensures that the Company is able to count the project's accredited capacity toward its planning requirements.

6. Labor

The RFP required all bidders to utilize union labor for the construction of the facility, and such remains a provision of the proposed PPAs as well.

II. LEASE ARRANGEMENT

The Company's proposed agreements are structured to provide reliable, dispatchable capacity at a reasonable cost, with enforceable performance standards and milestone requirements that protect customers from underperformance and cost escalation, as further described in Section I above.

However, as discussed in our Firm Dispatchable PPA Petition, certain agreements for resources with dispatch rights and capacity-based payments have the potential to create unintended long-term financial implications, which is the case with the agreements stemming from the firm dispatchable proceeding that we are requesting the Commission to approve. Table 2 below presents the estimated amount of imputed debt and key credit ratio impacts expected by 2028 (when the Cottage Grove BESS contract is active), specifically due to the Cottage Grove BESS.

Table 2
Estimated Credit Metric Impact

Project	Lease Type	2028 Imputed Debt (\$ million)	2028 Impact to FFO / Debt
Cottage Grove BESS	Operating	\$105	Approx. -0.20%

III. THE PROPOSED PPA IS REASONABLE AND IN THE PUBLIC INTEREST

The IRP Order requires that the evaluation of the Firm Dispatchable PPAs include, but not be limited to, whether:

- a. the prices and terms put ratepayers at risk for costs that are higher than bid or for benefits assumed in bids that do not materialize;*
- b. the agreement had terms which sufficiently protected ratepayers from risks associated with the non-deliverability of accredited capacity and/or energy from the project(s) as proposed;*
- c. the terms of any agreement that inappropriately shifted risk or unknown costs to ratepayers; and*
- d. the reasonableness of delay and cancellation provisions.³*

We discuss each of these evaluation criteria below.

A. The PPA Price and Terms Protect Ratepayers from Costs Exceeding Bids and Ensure Benefits Assumed in the Bids are Realized

As described in Section II of the Firm Dispatchable PPA Petition, the PPAs were negotiated in the context of significant industry-wide cost pressures, including supply chain disruptions, labor shortages, and evolving trade policies. Global supply chain disruptions, growing demand, labor market constraints, higher interest rates, and evolving trade policies are collectively driving up both the cost of project development and operational costs. We refreshed the economic analysis to reflect pricing for the Cottage Grove BESS, and the Company's modeling demonstrates that the project is cost-effective and in the public interest.

Despite these headwinds, the proposed PPA remains critical to meeting our customers' growing energy and capacity needs. As described in Section I, the PPA includes fixed or formula-based pricing and performance-based payment adjustments to ensure that our customers only pay for delivered capacity and energy. The PPA also includes mechanisms to adjust payments downward if performance metrics are not met, ensuring benefits assumed in the bid are realized in practice.

1. Economic Analysis

In order to determine the benefits of the Cottage Grove BESS project, the Company conducted an economic analysis using updated EnCompass modeling. The base

³ IRP Order at Order Point 19.

PUBLIC DOCUMENT–NOT-PUBLIC DATA HAS BEEN EXCISED

scenario for this analysis reflects the recently filed 2024 RFP Portfolio and the latest load forecast (2025v2), incorporating production tax credits (PTCs).⁴ After we completed the baseline capacity expansion plan, we performed a PVRR and PVSC production cost run to establish a comparison basis for the Cottage Grove BESS. The evaluation considered scenarios both with and without the consideration of future regulatory costs of carbon. The baseline run uses the latest load forecast (2025v2) and assumes PTCs for generic resources through 2030 and no PTCs beyond 2030, to evaluate the resulting planning impacts.

For the Cottage Grove BESS evaluation, the project was forced into the model, and market purchase of capacity and energy was turned off. The Cottage Grove BESS model run provides a capacity expansion plan – including Cottage Grove BESS – that can be processed through production cost modeling to produce PVSC and PVRR results for comparison to the baseline scenario. The PVSC and PVRR results are then compared to the baseline values described above to determine the total benefits or cost of the Cottage Grove BESS relative to the Base Case.

As shown below in Table 3, the results indicate that the Cottage Grove BESS is expected to have a minimal cost impact on a PVSC basis through 2050. The addition of the Cottage Grove BESS results in an increase of \$5 million on a PVSC basis and \$300 million on a PVRR basis over the 2024-2050 timeframe, which is an increase of approximately 0.0072 percent relative to total system costs. The capacity offered by the Cottage Grove BESS will offset capacity that would otherwise need to be acquired and enables more renewable additions. Given the current challenges in the broader market as discussed above, we believe this cost impact is reasonable and mitigates against the risk that higher priced resources will need to be acquired in the future.

⁴ See Petition – Wind and Solar Portfolio, 2024 Wind, Solar, Storage, and Hybrid Request for Proposals, Docket No. E002/M-24-230 (October 31, 2025) at pp. 72-76.

Table 3
PVSC / PVRR (\$2024 millions) With Cottage Grove Storage Project

PVSC	Delta from Updated Base in NPV 2024-2050 (\$ million)	NPV 2024-2050 (\$ million)
2024 RFP Portfolio – 2025v2 load forecast	\$0	\$83,646
Cottage Grove BESS	\$5	\$83,652
PVRR	Delta from Updated Base in NPV 2024-2050 (\$ million)	NPV 2024-2050 (\$ million)
2024 RFP Portfolio – 2025v2 load forecast	\$0	\$64,469
Cottage Grove BESS	\$300	\$64,769

B. The Agreement has Terms that Sufficiently Protect Ratepayers from Risks Associated with the Non-deliverability of Accredited Capacity and/or Energy from the Project

The Cottage Grove BESS PPA incorporates robust performance guarantees and remedies for non-delivery as discussed in Section I. As a new construction project, if the project fails to achieve commercial operation by the target date, liquidated damages are owed to the Company, and the Company may terminate the agreement after defined cure periods. Further, if performance falls below contractual thresholds – such as minimum capacity availability or round-trip efficiency – the Company has the right to terminate the agreement and recover damages, including the right to purchase the facility at fair market value in the event of seller default. These provisions ensure that seller compensation is directly aligned with actual delivery of accredited capacity and energy, minimizing risk to our customers.

C. The Term of the Agreement Fairly Distribute Risk and Clearly Define Costs for Ratepayers

The Cottage Grove PPA is structured to fairly allocate risks between the Company and the seller. Key risks – such as construction delays, underperformance, and certain changes in law – are borne by the seller, with explicit caps on the Company’s exposure. For example, as a new construction project, the seller is responsible for all costs associated with construction, permitting, and achieving commercial operation, and must post substantial security to guarantee performance. The Company’s payment obligations are limited to delivered capacity, with reductions for underperformance.

D. The Delay and Cancel Provisions are Reasonable

The Cottage Grove BESS PPA includes clear, enforceable provisions for delay and cancellation. If the seller fails to meet critical path milestones or commercial operation deadlines, liquidated damages are owed to the Company, and the Company may terminate the agreement after defined cure periods. In the event of seller default, the Company may recover damages up to a defined cap. The PPA also provides for termination in the event of extended force majeure, with clear procedures for return of security and allocation of costs. These provisions are consistent with industry standards and provide strong incentives for timely project delivery while protecting our customers from undue risk.

IV. EFFECT OF CHANGE UPON XCEL ENERGY REVENUE

Pursuant to Minn. Stat. § 216B.16 subd. 7(3), the costs for “fuel used in generation of electricity” are eligible for automatic adjustment under the Fuel Clause Rider. Under the terms of our currently effective Fuel Clause Rider in our tariff, “[t]he energy cost of purchases from a qualifying facility” are “qualifying costs” that comprise the Cost of Energy. Because the project satisfies the conditions of a qualifying facility, the Company plans to recover the costs of this agreement through our Fuel Clause Rider. No net increase in revenue to Xcel Energy will result from these transactions, as the power purchases will equal the revenue collected.

CONCLUSION

The proposed Cottage Grove BESS PPA replaces the Plum Creek project and secures needed reliable, dispatchable capacity for our customers. This agreement reflects a careful balance of affordability, risk mitigation, and operational flexibility, consistent with the Commission’s directives in the IRP Order.

This PPA will provide needed capacity and energy for our system and serve our customers at a reasonable cost, with terms that sufficiently protect our customers from risks associated with the non-deliverability of capacity and/or energy from the project(s).

For these reasons, we respectfully request that the Commission take the following actions:

- Find that the proposed Panamint – Cottage Grove BESS agreement is in the public interest.
- Approve the proposed Panamint – Cottage Grove BESS agreement.

PUBLIC DOCUMENT–NOT-PUBLIC DATA HAS BEEN EXCISED

- Authorize the Company to recover, through the Fuel Clause Rider, pursuant to Minn. Stat. § 216B.16 subd. 7(3), the Minnesota jurisdictional portion of the costs incurred under the agreements from Minnesota retail customers.
- Establish a procedural schedule such that the Commission may complete deliberations by mid-January 2026 along with the resources included in the Firm Dispatchable PPA Petition. Earlier approval increases the likelihood that projects will qualify for tax credits and significantly reduces the risk of construction delays or project failure.
