

Direct Testimony and Schedules  
David G. Kult

Before the Minnesota Public Utilities Commission  
State of Minnesota

In the Matter of the Application of Minnesota Energy Resources Corporation for Authority to  
Increase Rates for Natural Gas Service in Minnesota

Docket No. G011/GR-13-617

Exhibit \_\_\_\_\_

**New Service and Main Extensions**

September 30, 2013

## TABLE OF CONTENTS

I.	Introduction and Qualifications	1
II.	Service and Main Extensions	3
III.	Winter Construction	13
IV.	Farm Tap Inspection Program	14
V.	Conclusion	16

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

3 A. My name is David G. Kult. My business address is 2665 145<sup>th</sup> Street West, Rosemount,  
4 MN 55068.

5  
6 Q. BY WHOM ARE YOU EMPLOYED AND WHAT IS YOUR POSITION?

7 A. I am employed by Minnesota Energy Resources Corporation (“MERC” or the  
8 “Company”). My position is General Manager, Operations and Engineering.

9  
10 Q. PLEASE SUMMARIZE YOUR QUALIFICATIONS AND EXPERIENCE.

11 A. As the General Manager, I have responsibilities for operations and engineering functions  
12 across the state of Minnesota. This includes the capital deployment for growth projects  
13 and the consistent application of our feasibility model to assure all customers are treated  
14 fairly. Prior to assuming the General Manager role in 2007, I was the Director of  
15 Business Operations for Minnesota which had similar responsibilities relating to growth  
16 projects and establishing procedures for consistent application of our investment  
17 guidelines. My tenure with MERC is a continuation of 20 years of service from the  
18 previous company (Aquila).

19  
20 Q. FOR WHOM ARE YOU PROVIDING TESTIMONY?

21 A. I am providing testimony on behalf of MERC.  
22

1 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

2 A. The purpose of my testimony is to provide information to the Minnesota Public Utilities  
3 Commission (the “Commission”) on three items relating to construction activities. First,  
4 I provide the information requested by the Commission relating to main and service  
5 extension policies in Docket No. G-999/CI-90-563 (“Docket 563”). Second, I discuss the  
6 Company’s service extension-related additions to rate base as requested by the  
7 Commission in Docket 563. Third, I address the Commission’s filing requirement in  
8 Docket No. G-007,011/M-07-1188 regarding winter construction charges.

9  
10 Additionally, my testimony provides a discussion of the farm tap inspection programs. In  
11 Docket No. G-011/M-91-989, the Commission required the Company to file in each  
12 general rate case a five-year report on the cumulative results of the farm tap inspection  
13 program and any recommendations for future improvements.

14

1 **II. SERVICE AND MAIN EXTENTIONS**

2 Q. IN ITS ORDER TERMINATING INVESTIGATION AND CLOSING DOCKET IN  
3 DOCKET 563, THE COMMISSION REQUESTED EACH GAS UTILITY TO  
4 ADDRESS SIX QUESTIONS RELATING TO THE COMPANIES' EXTENSION  
5 RULES AND POLICIES IN FUTURE RATE CASES. DOES YOUR TESTIMONY  
6 ADDRESS THE COMMISSION'S QUESTIONS?

7 A. Yes, I will address each of the Commission's questions individually below.

8  
9 Q. COMMISSION QUESTION NUMBER ONE: "SHOULD THE 'FREE' FOOTAGE OR  
10 SERVICE EXTENSION ALLOWANCE INCLUDE THE MAJORITY OF ALL NEW  
11 EXTENSIONS WITH ONLY THE EXTREMELY LONG EXTENSIONS REQUIRING  
12 A CUSTOMER CONTRIBUTION-IN-AID-OF-CONSTRUCTION ("CIAC")?"

13 A. Yes. Customers, as a general policy, should receive some amount of line extension at no  
14 cost, and the Company's current tariff allows the majority of new customers to receive  
15 service without a CIAC. For residential services added in an existing service area where  
16 no main extension is required and no prior feasibility study included the proposed service  
17 line, the tariff provides that the Company will provide 75 feet of service line without  
18 requiring a contribution in aid of construction. This policy provides multiple benefits to  
19 new customers without unduly burdening the existing customers. This practice provides  
20 access to natural gas for new customers and consistent treatment with that provided to  
21 existing customers. The addition of new customers allows common costs to be shared  
22 across a larger base of customers. Additionally, the policy places some of the cost of

1 providing new service to atypical customers, such as those requiring more than 75 feet of  
2 service line or those seeking extension of a service line for non-primary space heating, on  
3 those individual customers rather than on the group of customers as a whole.  
4

5 Q. COMMISSION QUESTION NUMBER TWO: “HOW SHOULD THE LDC  
6 DETERMINE THE ECONOMIC FEASIBILITY OF SERVICE EXTENSION  
7 PROJECTS AND WHETHER THE EXCESS FOOTAGE CHARGES ARE  
8 COLLECTED?”

9 A. An economic feasibility should be completed for all new customers applying for natural  
10 gas service where a current main does not exist. This model should provide for  
11 connection without a CIAC where the economic support will exceed the cost of the local  
12 distribution company serving the customer within a reasonable period of time. The  
13 feasibility model generally does not apply to individual, stand-alone service lines. As  
14 discussed in response to Question One, above, residential stand-alone service extensions  
15 are provided 75 feet of service line without a CIAC with any extension beyond 75 feet  
16 requiring a CIAC based on the incremental cost of additional footage. For all other  
17 service extensions, MERC has developed and the Commission has approved a model that  
18 all new extension projects are tested against, which is shown in Section IX.2, Extension  
19 of Company Mains and Services, in MERC’s tariffs. The Company’s extension tariff  
20 provides a reasonable balance between connection without a CIAC charge and recovery  
21 of excessive costs.  
22

1 Q. COMMISSION QUESTION NUMBER THREE: “SHOULD THE LDC’S SERVICE  
2 EXTENSION POLICY BE TARIFFED IN NUMBER OF FEET WITHOUT  
3 CONSIDERATION TO VARYING CONSTRUCTION COSTS AMONG PROJECTS  
4 OR SHOULD THE ALLOWANCE BE TARIFFED AS A TOTAL DOLLAR AMOUNT  
5 PER CUSTOMER?”

6 A. Due to the varying construction costs across the State of Minnesota caused by geographic  
7 area, type of soil, size of lot, amount of gas used, etc., it would be difficult to develop a  
8 dollar-based one size fits all policy that is equitable to all customers. The designated  
9 footage allowance, however, does fit most customers and is relatively easy to apply and  
10 monitor. In particular, the Company proposes that if abnormal conditions, such as rock,  
11 make it impractical in the Company’s opinion to install a gas service line and at the same  
12 time satisfy all safety requirements, the Company may refuse to install a gas service line  
13 to the premises. Where such a situation exists and it is possible to install a gas service  
14 line by special design or extra construction and such gas service line can be installed  
15 safely, the Company may design and install the gas service line to suit the particular  
16 circumstances, provided the following conditions are met:

- 17 (a) The design, arrangement, and location of the gas service line are accepted and  
18 approved by the applicant; and
- 19 (b) The applicant agrees to pay the Company for all abnormal construction costs  
20 including the cost of casing, if required.  
21  
22

23 As noted, the Company will conduct a feasibility study to determine abnormal  
24 construction costs. The Company believes that such an approach appropriately places the  
25 costs of abnormal construction on the customer seeking service in those circumstances.

1

15  
16  
17  
18  
19  
20  
21

Q. COMMISSION QUESTION NUMBER FOUR: “IS THE LDC’S EXTENSION CHARGE REFUND POLICY APPROPRIATE?”

A. MERC does not offer a refundable contract as a normal course of business. MERC completes an economic feasibility for the project and bases its revenues on the projected customer connections planned over time. Using that information and input from Company personnel, MERC determines reasonableness for the number of customer connects by year and incorporates this data into the model. Any gap for the non-feasible portion of the project is collected from the developer as a non-refundable CIAC prior to the installation. MERC believes the Company’s policy is appropriate because it shares the responsibility between the developer and the Company. The developer benefits by providing the best information about the site being developed to get the best design estimate, which is used to determine the required CIAC. The Company and existing customers benefit by having a detailed design with the best information known at the time, a CIAC that is collected up front, and fixed charges that are spread over a larger customer base.

Q. COMMISSION QUESTION NUMBER FIVE: “SHOULD CUSTOMERS BE ALLOWED TO RUN THEIR OWN SERVICE LINE FROM THE STREET TO THE HOUSE (OR USE AN INDEPENDENT CONTRACTOR) IF IT WOULD BE LESS EXPENSIVE THAN HAVING THE UTILITY CONSTRUCT THE LINE?”

1 A. No. In order to maintain the integrity of the distribution system and provide for  
2 compliance with the industry required “Operator Qualifications”, we cannot allow others  
3 to do this type of work. Public safety is a primary concern of the Company as it relates to  
4 the natural gas distribution system. The “Distribution Integrity Management” regulations  
5 approved and placed into code in December 2009 by the Department of Transportation –  
6 Pipeline and Hazardous Materials Safety Administration, or “PHMSA”, make it  
7 necessary for the Company to have knowledge of the materials and quality of the systems  
8 we operate. In Docket # PHMSA-RSPA-2004-19854, the PHMSA amended the Federal  
9 Pipeline Safety Regulations to require operators of gas distribution pipelines to develop  
10 and implement integrity management (“IM”) programs. The purpose of these programs is  
11 to enhance safety by identifying and reducing pipeline integrity risks.

12  
13 Q. COMMISSION QUESTION NUMBER SIX: “SHOULD THE LDC BE REQUIRED  
14 TO OFFER ITS CUSTOMERS FINANCING FOR SERVICE EXTENSION  
15 CHARGES? THIS COULD BE OFFERED AS AN ALTERNATIVE TO PAYING  
16 EXTENSION CHARGES IN ADVANCE OF CONSTRUCTION.”

17 A. No. The Company does not currently offer a financing option for service extensions and  
18 does not believe it should be required to do so. The company also believes it should not  
19 be precluded from doing so in the future if the Company determines a need for this  
20 service.

21

1 Q. IN DOCKET 563, THE COMMISSION EXPRESSED THREE SPECIFIC CONCERNS  
2 ABOUT THE IMPACT OF SERVICE EXTENSION-RELATED ADDITIONS ON THE  
3 COMPANY'S RATE BASE. THE FIRST CONCERN IS WHETHER THE LDCS ARE  
4 CORRECTLY AND CONSISTENTLY APPLYING THE EXTENSION TARIFF.  
5 PLEASE EXPLAIN WHETHER THE COMPANY HAS CORRECTLY AND  
6 CONSISTENTLY APPLIED ITS EXTENSION TARIFF.

7 A. To determine if the Company correctly and consistently applied the extension tariffs, a  
8 study was conducted under my direction in which the service and main extensions from  
9 April 2010 through March 2013 were examined (the period since the prior study  
10 conducted for our last natural gas rate case, Docket No. G007,011/10-977). The  
11 approach was to analyze all main extension projects and service projects during this time  
12 frame. The total number of service projects was 4,503 and the total number of main  
13 projects was 273.

14  
15 Q. HOW MANY OF THE MAIN EXTENSION PROJECTS IN THE SAMPLE WERE  
16 RESIDENTIAL PROJECTS?

17 A. One hundred fifty one (151) of the 273 main line extension projects were only residential  
18 projects. Three of the 273 sample main line extension projects include both residential  
19 and commercial customers. The remaining 119 were only commercial main line  
20 extension projects.

21  
22

1 Q. HOW MANY OF THE SERVICE EXTENSION PROJECTS IN THE SAMPLE WERE  
2 RESIDENTIAL PROJECTS?

3 A. Of the 4,503 service extension projects, 4,004 were residential projects. The remaining  
4 499 were commercial service extension projects.

5  
6  
7 Q. WHAT WERE THE RESULTS OF THE SERVICE EXTENSION REVIEW?

8 A. For each of the service extension projects we reviewed the service installation  
9 documentation and billing records to determine whether the service extension tariff was  
10 applied correctly. The result of this review showed 4,424 of 4,503, or 98.25%, of the  
11 service lines met the extension guidelines with applicable excess footage properly  
12 charged and collected. Exhibit \_\_\_\_\_ (DGK-1) both summarizes and details the results  
13 of the service line extensions. When reviewing the 79 services that did not meet the  
14 guidelines, we found 0 for commercial services that did not comply with our investment  
15 guidelines.

16  
17 The 79 residential services for which excess footage or winter construction charges were  
18 not collected have been attributed to human errors, in which excess footage and/or winter  
19 construction cost was not billed. The total CIAC and excess footage charges of the  
20 service line extensions that were not properly or completely collected totaled \$12,859.52.

21

1 Q. WHAT ARE YOUR CONCLUSIONS FROM THE SERVICE LINE EXTENSION  
2 ANALYSIS?

3 A. The conclusion of the service line extension sample indicated we have some errors on the  
4 part of MERC personnel. While the errors appear to be in the process application area  
5 we did find some CIACs that had not been collected as required by the extension rules.  
6 To minimize these errors in the future, MERC will plan to hold regular training sessions  
7 before each construction season to improve understanding of the process, rules and  
8 records retention requirements. To address the uncollected CIAC amounts, MERC  
9 proposes to reduce the asset base by the amount of the error which is \$12,859.52 for the  
10 service line extensions. This adjustment has been made in our revenue deficiency and is  
11 included in line 27 of Schedule B-3 of Informational Requirements Document 2.  
12

13 Q. WHAT WERE THE RESULTS OF THE MAIN EXTENSION REVIEW?

14 A. For each main extension project, we reviewed design documents, feasibility studies and  
15 installation records. Projects that required CIACs were researched to determine if the  
16 CIAC was properly charged and collected.  
17

18 The main extension project review showed that, of the 273 projects, 101 required a CIAC  
19 for a total of \$1,363,594.30 of which 99.99% was collected. A review of the 187 projects  
20 where a CIAC was required showed the full CIAC was paid on 182 projects. Of the five  
21 projects that we did not collect the full CIAC, we do not have detailed documentation on  
22 the reason for not collecting the full CIAC amount. The total of under collected CIAC

1 amounts to \$16,310.50. Exhibit \_\_\_\_\_ (DGK-2) both summarizes and details the results  
2 of the main extensions sampled.

3  
4 Q. WHAT ARE YOUR CONCLUSIONS FROM THE MAIN EXTENSION SAMPLE?

5 A. MERC has identified a few errors during the review of main extension projects. To  
6 minimize these errors in the future, MERC will hold regular training sessions before each  
7 construction season to improve understanding of the process, rules and records retention  
8 requirements. To address the uncollected CIAC amounts, MERC proposes to reduce the  
9 asset base by the amount of the errors between April 2010 and March 2013 for a total rate  
10 base deduction of \$16,310.50. This adjustment has been made in our revenue deficiency  
11 and is included in line 27 of Schedule B-3 of Informational Requirements Document 2.

12  
13 Q. HAS MERC IMPROVED ITS EXTENSION PROCEDURES TO ADDRESS HUMAN  
14 ERRORS?

15 A. Yes. To minimize human errors, MERC has and will continue to provide employee  
16 training prior to each construction season about our extension requirements, appropriate  
17 documentation and records retention requirements.

18  
19 Q. THE SECOND CONCERN EXPRESSED BY THE COMMISSION IN DOCKET 563  
20 IS WHETHER THE EXTENSION TARIFFS ARE APPROPRIATELY COST AND  
21 LOAD JUSTIFIED. PLEASE EXPLAIN WHETHER THE COMPANY'S  
22 EXTENSION TARIFFS ARE APPROPRIATELY COST AND LOAD JUSTIFIED?

1 A. The Company evaluated all new main projects against standard investment guidelines  
2 that are calculated in our feasibility model. This tool has been reviewed and approved by  
3 both the Company and the Commission as an acceptable evaluation that protects both  
4 existing and new customers from undue cost. The load information is reviewed for all  
5 new commercial accounts individually, and the residential accounts are based on average  
6 volumes across the entire customer base. By adhering to this investment criteria, I  
7 believe the Company appropriately cost and load justified the extension tariffs.

8

9 Q. THE THIRD CONCERN EXPRESSED BY THE COMMISSION IN DOCKET 563 IS  
10 WHETHER WASTEFUL ADDITIONS TO PLANT AND FACILITIES ARE  
11 ALLOWED INTO RATE BASE. PLEASE EXPLAIN WHY THE COMPANY'S  
12 ADDITIONS TO PLANT AND FACILITIES ARE REASONABLE.

13 A. The Company evaluates all new projects using the investment guidelines in the feasibility  
14 model. Any wasteful additions are identified and collected from the customer in the form  
15 of a CIAC. While we have identified some errors with our application since our last rate  
16 case, we have proposed a disallowance for those errors as identified above. The total  
17 amount identified is \$29,170.02. This adjustment has been made in our revenue  
18 deficiency and is included in line 27 of Schedule B-3 of Informational Requirements  
19 Document 2.

20

1 **III. WINTER CONSTRUCTION**

2 Q. DOES YOUR TESTIMONY ADDRESS THE COMMISSION’S FILING  
3 REQUIREMENT RELATING TO WINTER CONSTRUCTION CHARGES?

4 A. Yes, in Docket No. G-007,011/M-07-1188, the Commission required MERC to show in  
5 the next general rate case that no Winter Construction Charges were assessed to  
6 customers outside the tariffed Winter Construction Charges period (i.e. December 1  
7 through April 1), and that no Winter Construction Charges incurred by the Companies  
8 from any contractors, outside the tariffed Winter Construction Charges period are  
9 proposed to be recovered from other rate payers.

10  
11 Northern Pipeline Construction Company has been the only company contracted for  
12 distribution system installation where winter charges are allowed during the period  
13 covered by this rate case. A search was conducted for all winter charges outside of the  
14 tariffed Winter Construction Charge period from April 1, 2010 through March 31, 2013.

15  
16 The Company found no invoices from the contractor for winter charges for work done  
17 outside the tariffed Winter Construction Charges period. Exhibit \_\_\_\_\_ (DGK-3) shows  
18 a list of every winter construction charge incurred by the Company (none shown) outside  
19 of the tariffed Winter Construction Period. The Commission’s order requires that MERC  
20 show that no Winter Construction Charges incurred by the Company outside the tariffed  
21 Winter Construction Charges period are proposed to be recovered from other rate payers.

22

1 **IV. FARM TAP INSPECTION PROGRAM**

2 Q. IN DOCKET NO. G-011/M-91-989, THE COMMISSION REQUIRED THE  
3 COMPANY TO FILE IN EACH GENERAL RATE CASE A FIVE-YEAR REPORT  
4 ON THE CUMULATIVE RESULTS OF THE FARM TAP INSPECTION PROGRAM  
5 AND ANY RECOMMENDATIONS FOR FUTURE IMPROVEMENTS. DOES YOUR  
6 TESTIMONY ADDRESS THIS REQUIREMENT?

7 A. Yes, it does. MERC is at the end of a five-year farm tap inspection plan. The inspection  
8 report is attached to my testimony as Exhibit \_\_\_\_\_ (DGK-4).

9  
10 Q. PLEASE PROVIDE A SUMMARY OF THE RESULTS OF THE INSPECTION  
11 PROGRAM.

12 A. MERC provides service to 1,907 farm taps in Minnesota. During the current five-year  
13 period from 2008 through 2012, MERC inspected each farm tap at least once, and  
14 performed a total of 2,115 inspections. The inspections uncovered 153 leaks: 4 Class 1  
15 leaks, 15 class 2 leaks, and 134 Class 3 leaks. Class 1 leaks are those that represent an  
16 existing or probable hazard to persons or property and require immediate repair or  
17 continuous action until the conditions are no longer hazardous. When a Class 1 leak is  
18 discovered, gas service to a farm tap fuel line is shut off until adequate repair or  
19 replacement is made. Class 2 leaks are non-hazardous at the time of detection but are  
20 repaired based on probable future hazard. When a Class 2 leak is discovered, it is  
21 repaired within six months of detection, and any such leak discovered after June 30 of  
22 any calendar year must be repaired no later than December 31 of the same year, or

1 ground freezing, whichever comes first. Class 3 leaks are those that are non-hazardous at  
2 the time of detection and can reasonably be expected to remain non-hazardous. Class 3  
3 leaks are reevaluated during the next scheduled survey or within 15 months of the date  
4 reported, whichever comes first, until the leak is re-graded or repaired.

5  
6 Q. DO YOU HAVE ANY RECOMMENDATIONS FOR FUTURE IMPROVEMENTS TO  
7 THE FARM TAP INSPECTION PROGRAM?

8 A. No, I do not. The program continues to serve its purpose of identifying any unknown  
9 problems that a customer may not otherwise discover. Through the farm tap inspection  
10 program, we have been able to assist customers with identifying any hazardous  
11 conditions, initiating corrective action, and testing the odorization level to assure  
12 alternative means of detecting a leak are in place and working.

13

1 **IV. CONCLUSION**

2 Q. PLEASE PROVIDE A SUMMARY OF YOUR CONCLUSIONS RELATING TO THE  
3 COMPANY'S MAIN AND SERVICE EXTENSIONS, WINTER CONSTRUCTION  
4 CHARGES, AND FARM TAP INSPECTION.

5 A. The review for new main and service extensions has demonstrated the accurate and  
6 consistent applications of our tariff rules within a reasonable margin of error.  
7 Additionally, the Company's review of winter construction charges discovered no  
8 customers who had been charged Winter Construction Charges outside the Winter  
9 Construction Charges period. To minimize errors in the application of MERC's  
10 extension tariffs in the future, MERC will hold regular training sessions before each  
11 construction season to improve understanding of the process, rules and records retention  
12 requirements. Finally, MERC believes that its farm tap inspection program continues to  
13 be an effective way to discover and repair leaks in the farm tap customers' lines.

14  
15 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

16 A. Yes, it does.
