Re: Community Wind South Repower Project, Nobles County, Minnesota
File: 0026682.00

Dear Stephen:

On behalf of Zephyr Wind, LLC (Zephyr), Westwood Professional Services is writing to request comments regarding the Applicant's plans to obtain an amended site permit from the Minnesota Public Utilities Commission (MPUC) for the Community Wind South Project located in Nobles County, Minnesota (Exhibit 1). The original Site Permit for the 30.75 megawatt large wind energy conversion system (LWECS) was issued by the MPUC on May 1, 2012.

Zephyr plans to retrofit all 15 REpower MM92, 2.05 MW turbines by installing larger rotors and different nacelles. The purpose of the retrofitting project is to improve turbine technology, increase energy yield and extend the useful life of the project. Rotor modifications provide an increase in the rotor swept area, which results in a corresponding increase in the nominal production capacity of the Project. Optimizing energy production using the existing permitted wind energy facility will help the State of Minnesota meet its Renewable Portfolio Standard (RPS) with fewer turbines and less disruption to the natural environment.

The previously permitted locations of turbines, access roads, collection lines, and other supporting infrastructure will remain the same. Full-sized and pre-assembly cranes will be used to remove the old rotors and nacelles and install the new components. Some minor upgrading of public roadways and intersections may be required to allow for delivery of the replacement rotors and nacelles to each turbine location. A temporary laydown yard will be constructed within agricultural lands to stage the turbine components prior to installation. A temporary crane path will also be required for installing the new rotors and nacelles, which will be restored to pre-construction conditions following retrofitting. Efforts will be made to use the original crane path corridor to minimize disturbance to new areas.

No aspect of the project is anticipated to trigger Section 106 of the National Historic Preservation Act. In support of the site permit application, archaeological surveys of the new crane walk areas

are being planned for this fall. The archaeological survey results can be provided upon request to the Tribal Historic Preservation Offices (THPOs). Also, if interested, THPOs can coordinate a visit with the archaeological crews during the survey if they wish to review the area.

Zephyr plans to apply for an amended site permit from the MPUC in Q4 2020 to meet planned construction and a Commercial Operation Date (COD) anticipated in 2022. Written comments provided in response to this letter will be incorporated into the MPUC's review process. Please respond as soon as possible, or within 30 days of the date of this letter. If you have questions or require further information regarding the project, I can be reached at (952) 906-7419 or via email david.weetman@westwoodps.com.

Sincerely,

WESTWOOD PROFESSIONAL SERVICES

David –

Under Nobles County Planning and Zoning Ordinance you will be required to apply for and receive a Conditional Use Permit and Land Use Permit for the laydown yard. The Land Use Permit and CUP Permit only need to be signed where indicated in yellow.

This process typically takes 45 – 60 days for final approval from the time of a completed application. We must have all documents and funds as listed in the CUP Application information for the application to be considered complete.

I have attached the necessary paperwork for your convenience. Please contact me with any questions you may have.

**- NOBLES COUNTY -
CONDITIONAL USE PERMIT**

Applicant: _____ Landowner: _____

Date _____ Fee _____ Job Number _____

Refer to Building Permit Number _____ Money Receipt Number _____

Legal Description:

Zoning District: _____ Property Address: _____

Present Use of Land: _____

Proposed Use of Land:

Section of the ordinance allowing conditional use permit:

Required Exhibits:

1. Copy of the legal description as recorded in the Nobles County Records office for the property on which the conditional use permit is proposed.
2. A site plan of an area including the property in question and 100 feet beyond, showing existing utilities, lot boundaries and dimensions, buildings, easements, vegetation, highways and access roads, contours and waterways if pertinent. Also show proposed building location, surface drainage plan, utility plan, landscaping, vehicle and pedestrian ingress and egress, parking and loading facilities, screening, size and location of all signs and other site improvements.

Public Hearing Date _____ Time _____
Place Meeting Room, Public Works Facility, 960 Diagonal Rd, Worthington, MN 56187

Certification:

I hereby certify that I am the applicant named herein and that the information given above and on the exhibits submitted herewith is in all respects true and accurate to the best of my knowledge and belief, and further, that if this permit is granted, said construction will conform to the site plan contained herewith.

I further understand that, if granted, the project must begin within one (1) year after the approval of the conditional use or it will expire and a new conditional use will have to be obtained. Any change involving structural alterations, enlargement, intensification of use, or similar change not specifically permitted by the conditional use permit issued shall require an amended conditional use permit and all procedures shall apply as if a new permit were being issued.

I further understand that unless a specific time limit is established on the conditional use, it may continue in perpetuity or until it is revoked for non-compliance.

Conditional Use Permit Requirements

All paperwork must be submitted by the first working day of the month.

Application – completed and signed by both applicant and land owner, if different

Land Use Permit (LUP) – Must be signed by applicant/landowner

Conditional Use Permit (CUP) – signed by both applicant and landowner, if different
(No other information needs to be completed, staff will complete)

Legal description of property

Site Plan – can be hand drawn

Fees: \$600.00 made payable to Nobles County

\$46.00 made payable to Nobles County Recorder

Land use permit fee – determined based on type of construction – contact
Environmental Services for more information

Brief description of proposal

We will notify Applicant, Neighbors, Planning Commission, and Media of date, time and location of Public Hearing.

Applicant or representative must attend public hearing to explain request.

All requests are heard by the Nobles County Planning Commission who make recommendation to the County Board.

Please allow 45 – 60 days from the date of application for final approval.

General Provisions

1. For a new family dwelling or addition to an existing home, you **MUST OBTAIN A SEPTIC PERMIT** before construction begins.
2. For a new, expanding or otherwise altered feedlot(s) (including ownership transfer) you **MUST OBTAIN A FEEDLOT PERMIT** before construction begins.
3. No changes in plans or specifications can be made to the work authorized herein unless such changes are first approved in writing by the permitting authority.
4. Permittee shall grant access to the site at all times that the permitting authority or his/her agents may conduct inspections to ascertain compliance with the terms and conditions of this permit.
5. The granting of this permit does not exempt the permittee from having to secure other permits from other State, Federal or Local units of government which may have jurisdiction over portions of the authorized project.
6. This permit expires six months from the date issued, if work has not started.
7. Construction activity disturbing one acre or more of land is required to obtain an MPCA Storm Water Permit Contact 1-800-646-6247
8. Heron Lake Watershed District: If your project is located in the watershed call the District office at 507-793-2462 for additional rules and regulations.
9. Okabena-Ocheda Watershed District: If your project is located in the watershed call the District office at 507-376-9150 for additional rules and regulations.
10. Notice concerning electrical wiring: our building permit does not include electrical wiring. A separate request for electrical inspection must be filed with the Board of Electricity at or before the start of any electrical wiring. An owner may install wiring only on premises he occupies as a residence or will occupy as a residence upon completion of construction. It is unlawful for any person to assist an owner in installing electrical wiring unless that person is a properly licensed employee of a licensed electrical contractor and the electrical contractor has agreed to do the work. An owner may not install electrical wiring on residential property that is rented, leased or occupied by others. If you have questions please contact the State Board of Electricity at www.electricity.state.mn.us.
11. Handicapped Accessibility Code: I understand that this permit is subject to the Minnesota Handicapped Accessibility Code review and inspection, which will be billed to me on time and material basis.

I hereby apply for a zoning permit and I acknowledge that the information above is complete and accurate, that the work will be in conformance with the ordinances and codes of Nobles County. The applicant also understands by signing this application he/she could be held responsible as representative of this project for any violations of compliance with all applicable laws and ordinances of Nobles County. This permit may be suspended or revoked if the permit has been issued in error or on the basis of incorrect information supplied or in violation of any ordinance or regulation of Nobles County. All provisions of law and ordinances governing this type of work will be complied with whether specified herein or not.

Re: Community Wind South Repower Project, Nobles County, Minnesota
File: 0026682.00

To whom it may concern:

On behalf of Zephyr Wind, LLC (Zephyr), Westwood Professional Services is writing to request comments regarding the Applicant's plans to obtain an amended site permit from the Minnesota Public Utilities Commission (MPUC) for the Community Wind South Project located in Nobles County, Minnesota (Exhibit 1). The original Site Permit for the 30.75 megawatt large wind energy conversion system (LWECS) was issued by the MPUC on May 1, 2012.

Zephyr plans to retrofit all 15 REpower MM92, 2.05 MW turbines by installing larger rotors and different nacelles. The purpose of the retrofitting project is to improve turbine technology, increase energy yield and extend the useful life of the project. Rotor modifications provide an increase in the rotor swept area, which results in a corresponding increase in the nominal production capacity of the Project. Optimizing energy production using the existing permitted wind energy facility will help the State of Minnesota meet its Renewable Portfolio Standard (RPS) with fewer turbines and less disruption to the natural environment.

The previously permitted locations of turbines, access roads, collection lines, and other supporting infrastructure will remain the same. Full-sized and pre-assembly cranes will be used to remove the old rotors and nacelles and install the new components. Some minor upgrading of public roadways and intersections may be required to allow for delivery of the replacement rotors and nacelles to each turbine location. A temporary laydown yard will be constructed within agricultural lands to stage the turbine components prior to installation. A temporary crane path will also be required for installing the new rotors and nacelles, which will be restored to pre-construction conditions following retrofitting. Efforts will be made to use the original crane path corridor to minimize disturbance to new areas.

No aspect of the project is anticipated to trigger Section 106 of the National Historic Preservation Act. In support of the site permit application, archaeological surveys of the new crane walk areas are being planned for this fall. The archaeological survey results can be provided upon request to

the Tribal Historic Preservation Offices (THPOs). Also, if interested, THPOs can coordinate a visit with the archaeological crews during the survey if they wish to review the area.

Zephyr plans to apply for an amended site permit from the MPUC in Q4 2020 to meet planned construction and a Commercial Operation Date (COD) anticipated in 2022. Written comments provided in response to this letter will be incorporated into the MPUC's review process. Please respond as soon as possible, or within 30 days of the date of this letter. If you have questions or require further information regarding the project, I can be reached at (952) 906-7419 or via email david.weetman@westwoodps.com.

RE: Natural Heritage Review of the proposed Community Wind South Repower,
Nobles County

Dear Ms. Kilibarda,

As requested, the above project has been reviewed for potential effects to known occurrences of rare features. Given the project details provided with the data request form, I do not believe the proposed project will negatively affect any known occurrences of rare features.

The Natural Heritage Information System (NHIS), a collection of databases that contains information about Minnesota's rare natural features, is maintained by the Division of Ecological and Water Resources, Department of Natural Resources. The NHIS is continually updated as new information becomes available, and is the most complete source of data on Minnesota's rare or otherwise significant species, native plant communities, and other natural features. However, the NHIS is not an exhaustive inventory and thus does not represent all of the occurrences of rare features within the state. Therefore, ecologically significant features for which we have no records may exist within the project area. **If additional information becomes available regarding rare features in the vicinity of the project, further review may be necessary.**

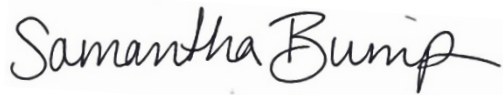

It should be noted that many SGCN are not tracked in the Natural Heritage Information System (NHIS), and the NHIS does not include records of migrating birds. Wind farms can affect birds due to collision mortality, displacement due to disturbance, habitat fragmentation, and habitat loss. Even if collision mortality rates are low, the additional mortality may be significant for rare species. In addition, the results from some studies suggest that grassland birds are deterred from nesting in otherwise appropriate habitat by the presence of tall structures in the vicinity. We recommend post-construction avian mortality monitoring to provide information regarding unexpected impacts, if any, to rare birds. Knowledge of these types of extraordinary events would allow for the implementation of additional measures to minimize disturbance, such as the curtailment of turbine operations during certain conditions. Regional DNR staff may have more recommendations regarding avian surveys based on local knowledge of the project site.

For environmental review purposes, the results of this Natural Heritage Review are valid for one year; the results are only valid for the project location (noted above) and the project description provided on the NHIS Data Request Form. Please contact me if project details change or for an updated review if construction has not occurred within one year.

The Natural Heritage Review does not constitute review or approval by the Department of Natural Resources as a whole. Instead, it identifies issues regarding known occurrences of rare features and potential effects to these rare features. If needed, please contact your [DNR Regional Environmental Assessment Ecologist](#) to determine whether there are other natural resource concerns associated with the proposed project. Please be aware that additional site assessments or review may be required.

Thank you for consulting us on this matter, and for your interest in preserving Minnesota's rare natural resources. Please include a copy of this letter in any state or local license or permit application. An invoice will be mailed to you under separate cover.

Sincerely,

Re: Community Wind South Repower Project, Nobles County, Minnesota
File: 0026682.00

Dear Cynthia:

On behalf of Zephyr Wind, LLC (Zephyr), Westwood Professional Services is writing to request comments regarding the Applicant's plans to obtain an amended site permit from the Minnesota Public Utilities Commission (MPUC) for the Community Wind South Project located in Nobles County, Minnesota (Exhibit 1). The original Site Permit for the 30.75 megawatt large wind energy conversion system (LWECS) was issued by the MPUC on May 1, 2012.

Zephyr plans to retrofit all 15 REpower MM92, 2.05 MW turbines by installing larger rotors and different nacelles. The purpose of the retrofitting project is to improve turbine technology, increase energy yield and extend the useful life of the project. Rotor modifications provide an increase in the rotor swept area, which results in a corresponding increase in the nominal production capacity of the Project. Optimizing energy production using the existing permitted wind energy facility will help the State of Minnesota meet its Renewable Portfolio Standard (RPS) with fewer turbines and less disruption to the natural environment.

The previously permitted locations of turbines, access roads, collection lines, and other supporting infrastructure will remain the same. Full-sized and pre-assembly cranes will be used to remove the old rotors and nacelles and install the new components. Some minor upgrading of public roadways and intersections may be required to allow for delivery of the replacement rotors and nacelles to each turbine location. A temporary laydown yard will be constructed within agricultural lands to stage the turbine components prior to installation. A temporary crane path will also be required for installing the new rotors and nacelles, which will be restored to pre-construction conditions following retrofitting. Efforts will be made to use the original crane path corridor to minimize disturbance to new areas.

No aspect of the project is anticipated to trigger Section 106 of the National Historic Preservation Act. In support of the site permit application, archaeological surveys of the new crane walk areas

are being planned for this fall. The archaeological survey results can be provided upon request to the Tribal Historic Preservation Offices (THPOs). Also, if interested, THPOs can coordinate a visit with the archaeological crews during the survey if they wish to review the area.

Zephyr plans to apply for an amended site permit from the MPUC in Q4 2020 to meet planned construction and a Commercial Operation Date (COD) anticipated in 2022. Written comments provided in response to this letter will be incorporated into the MPUC's review process. Please respond as soon as possible, or within 30 days of the date of this letter. If you have questions or require further information regarding the project, I can be reached at (952) 906-7419 or via email david.weetman@westwoodps.com.

Sincerely,

WESTWOOD PROFESSIONAL SERVICES

David,

Joanne Boettcher, the Regional Environmental Assessment Ecologist in Region 4, will be your DNR contact until the site permit amendment application is filed with the PUC. Thereafter, please coordinate with me and copy Joanne. I have copied Joanne for her awareness.

Although the request for review for the Community South Repower project is dated October 6, DNR did not receive it until Friday, October 9. Therefore, the 30-day turnaround requested in the letter may be extended by several days.

Best regards,

Cynthia

Hi David,

Do you have a shapefile of the project boundary and any infrastructure components related to the project (towers, transmission lines, etc) you can email to me?

Thanks,

Hi Joanne,

Attached is a zipped folder with shapefile data for Community Wind South Repower Project (Nobles County, MN). The data includes project boundary, turbine, collection, crane path, and access road data. Please let me know if you have any trouble with the files.

Thanks,

Britta Hardel
