D. Controlling Statute

Exclusive electric service territories have existed in Minnesota since 1974, and are considered necessary to encourage the development of coordinated statewide electric service, to eliminate or avoid unnecessary duplication of utility facilities, and to promote economical, efficient, and adequate electric service to the public.

Minn. Stat. §216B.37 provides electric utilities the exclusive right to serve customers within an assigned service territory, and Minn. Stat. §216B.40 prohibits the provision of retail electric service by another utility within that assigned service territory.

Minn. Stat. §§216B.37-216B.47 provide the terms and conditions under which a city may extend retail electric service throughout the corporate limits of the city and authorize and permit electric utilities to define and revise their electric service territories by their written consent and agreement.

However, two parties may agree to modify the boundary between their service territories if they receive Commission approval after notice and hearing under Minn. Stat. §216B.39, or service by exception is consented to under Minn. Stat. §216B.40. As such, when two parties reach an agreement regarding a change in service territory boundaries, the agreement must be submitted to the Commission for its approval. This agreement is consistent with Minn. Stat. §216B.39. It is a permanent boundary change agreed to by both utilities as shown in the Agreement.
