Dear Kate Kahlert,

I would like to request that a public hearing take place before the PUC makes a decision on whether the rules specified [here](#) should be adopted or not. I believe that public input is fundamental in any decision-making process that affects communities and peoples. More specifically, it would be vital to see language that indicates that climate change is being considered in the proposed rules, which does not seem to be the case so far.

I appreciate your attention to this matter.

Best regards,

Murilo Zacareli
