

Exhibit 5

Service Plans

NextLink Internet currently provides Internet Access and Voice-over-Internet-Protocol (VoIP) services to residential, business, and government entities in six states. The Company offers a compelling selection of Internet access service plans, with a range of upload/download speeds tailored to accommodate the needs of a diverse customer base. Retail plans currently offer speeds ranging from 5/1 Mbps to 100/20 Mbps. In select locations, the Company offers tailored commercial arrangements for Internet services at speeds up to 1000/1000 Mbps and greater, depending on need and application. The Company's VoIP service plans are available on a standalone basis or as bundled with Internet services, starting at \$19.95 per month.

NextLink Internet has not finalized its service plans for the areas in Minnesota where it is seeking ETC designation. However, the Company plans to offer the same residential and business plans it currently offers in existing states where the Company operates. These service plans include speeds that are equal to or greater than its commitments under the RDOF funding and a standalone voice offering. The appended materials describe the Company's current service plans.

If multiple static IP addresses are required, please complete this request form and email to support@team.nxlink.com

*In Select Areas.

Internet rates reflect the ability to connect to our tower with a sufficient signal within 3 to 4 miles of your residence. Longer range equipment is available as a \$10 addition for plans under 35Mbps if you are beyond the 3-to 4-mile range to the nearest visible tower. Nextlink provides a 30-day money-back guarantee on the internet service plan that is paid for at the time of install. If you are not completely satisfied with the service within the first 30 days, your monthly internet fees will be refunded, and the equipment will be uninstalled. 4K TV watching from any content provider is not supported under any Nextlink wireless plan. 4K TV watching/playback (not live streaming) is supported on our FiberLink plans and 100Mbps is the recommended speed plan for most households with numerous other devices utilizing the internet service. A \$100 installation fee for sign up with a 12-month plan agreement. \$250 installation fee without a 12-month plan agreement. Installation fee and first month services due at the time of installation. Polycom Home Office Phones are available to lease at \$5-\$15 and \$20 per line with lifetime maintenance included.

Service is limited to the coverage area of Nextlink wireless network via line of sight. Residential and Business plan speeds are burstable "Up to" the particular plan's maximum speed. Distance limitations of wireless routers, number of devices On Net, size, and type of downloads and uploads all may affect speeds. Speeds for downloads and uploads may vary due to these factors and others. Unless a custom installation is pre-determined, all installation service is limited to one location within the home at no more than 100 feet from the Nextlink Subscriber Module (SM). The SM placement will be determined by a qualified installer. Additional installation, equipment, equipment rental, or other charges may apply if it is required to gain an unobstructed line of site to Nextlink's tower. 3' to 10' tripods available for \$5 per month if additional height is required for mounting the subscriber module. Additional equipment may also be necessary for specialized roofing materials such as tile or metal roofs.

Nextlink participates in Carrier Grade NAT, as does many Internet Service Providers (ISP). This means customers who use our service will not always have the same public IP address. The public IP address can and will change periodically. If customers participate in hosting online games, use security cameras, or conduct any port forwarding, they will be required to purchase a Static IP. This will provide them with a consistent IP address for the port forwarding to work properly. These Static IPs cost an additional \$10 per month for a single /30 block (1 usable IP address) and \$20 per month for /29 IP block (5 usable IP addresses).

Prices shown do not include any applicable taxes. Nextlink pricing is subject to change. Nextlink services are subject to the terms and conditions provided by the installer at the time of installation. Click here to review Nextlink's Terms and Conditions and other applicable acceptable use policies. Exhibit 6

Sample Advertising Material

As discussed in the foregoing application, NextLink Internet will advertise the availability of its supported services using media of general distribution in Minnesota, as required by Section 54.201(d)(2) of the FCC's regulations.² A sample of the Company's current advertising is appended.

Consistent with its obligations as an ETC, the Company will place advertising in a manner reasonably designed to reach those likely to qualify for Lifeline services.³ All advertising of NextLink Internet's Lifeline services will comply with the requirements of Section 54.405(c) of the FCC's regulations, stating in "easily understood language, that it is a Lifeline service, that Lifeline is a government assistance program, the service is non-transferable, only eligible consumers may enroll in the program, and the program is limited to one discount per household."⁴ These content points will be included in all Lifeline service-related materials issued by the Company, including print, broadcast and web-posted marketing materials as well as the materials used for customer enrollment and recertification.

² 47 C.F.R. § 54.201(d)(2).

³ 47 C.F.R. § 54.405(b).
