Dan Wolf
Executive Secretary
Public Utilities Commission 121 – 7th Place East, Suite 350 St. Paul, MN 55101
DOCKET 17-410 and 17-322

Mr Wolf;

To the Question: Is there sufficient information in the record to determine that the new permittee can comply with the conditions of the permits?

Answer: Simply....NO! How in the world does Xcel (NSP) sit back and watch all the debates, discussions, motions, filings, orders, etc. go on and not let Invenergy know that they want to "upgrade" to V120's? The permit was granted for and on V110's and V116's. Now that we've got the permit let's just upgrade to a larger unit, no one will mind....REALLY! Who does that? Is this their typical play?

No, is the answer to allowing Xcel (NSP) to take over the Freeborn Wind Farm permit. Send it back to Invenergy and have them start over with their permit using the V120's in their paperwork. This is common sense!

Best regards,
Stephanie, Gary and Eric Richter
