

*Date: April 28, 2016*

*To: Minnesota Public Utilities Commission/ Mr. Daniel P. Wolf,  
PUC Executive Secretary*

*From: Lynn C. Peterson, 18897 Adair Rd., Grand Rapids, MN  
55744*

*Sirs:*

*I am requesting a re-consideration of the routing of the  
Minnesota Power/Great Northern Transmission Line, identified  
as Docket Number: E-015/TL-14-21.*

*I am record owner of a parcel of land that the line is proposed  
to cross, identified as the NESE, Section 31-T62-R22 in Itasca  
County, totaling approximately 35 acres.*

*I am requesting you re-consider the location of the line as I  
have already got a high voltage line crossing my property which  
is @330 feet in width and taking up @10 ten acres. This  
existing line is located down the east side of the described  
parcel and it is my understanding the proposed line will lie  
adjacent to the current line's west side. When constructed,  
this new line will take out of production an additional 300+  
feet of width, or an additional ten acres of land. This then*

*results in twenty acres of power line and it leaves me with only fifteen acres of forest.*

*Please re-consider locating the line such that I do not lose additional timbered land.*

*Thank you for considering my request.*
