

NOTICE OF PUBLIC INFORMATION MEETINGS

Issued: July 18, 2025

In the Matter of the Site Permit for Elm Creek Wind II, LLC 150 MW Project in Martin and Jackson Counties

Docket Number: IP-6728/WS-09-553

PLEASE TAKE NOTICE that the Minnesota Public Utilities Commission (Commission) will hold public information meetings on the permit amendment requested by Elm Creek Wind II, LLC (Elm Creek) to repower its existing Elm Creek Wind II facility. The facility was originally permitted by the Public Utilities Commission on February 25, 2010.

Elm Creek Wind II, LLC is requesting site permit amendments to increase the facility's efficiency and energy output, as well as to extend the permit term and operational life of the facility. The proposed changes will consist of retrofitting existing equipment and will not include changes to the turbine locations, MET tower, or substation. The requested changes include:

- Extending the Permit expiration date from December 31, 2040 to December 31, 2056
- Replacing rotors (increase in size from 95 meters up to 120 meters);
- Replacing turbine nacelles and interior elements;
- Increasing hub height of existing turbines from 78 meters up to 86 meters;
- Increasing the tip height of existing turbines from 127.5 meters up to 146 meters;
- Adjust the current turbine output for existing turbines from 2.4 MW to 2.2 MW
- Decrease total nameplate capacity below the current permitted 150 megawatts

The proposed modifications are expected to decrease the facility's total nameplate capacity below the existing 148.8 megawatts. Although the repowering will result in a decrease in nameplate capacity, the retrofitted equipment will result in an increase in swept area and efficiency at lower wind speeds, correlating to an overall increase in annual energy production.
