MN PUC.

In regards to the restoration of natural areas, the Commission should accept the certificate of completion, but it should be acknowledged that there is some minimal fence work yet to be completed. About 10 wood/steel posts were removed from a grazing fence to facilitate pipeline construction, but due to weather issues this fall, have not yet been replaced. Area DNR staff will work with Great Plains engineers to ensure that this work is completed as soon as possible in Spring 2019.

Also, please note that I should be listed as the contact person for any future correspondence re this docket.
