RE: *Response to Draft Route Permit and Proposed Decision Options*

IN THE MATTER OF THE APPLICATION FOR A CERTIFICATE OF NEED AND
ROUTE PERMIT FOR THE MANKATO TO MISSISSIPPI RIVER 345 kV
TRANSMISSION PROJECT IN SOUTHEAST MINNESOTA
DOCKET NOS. E002/CN-22-532; E002/TL-23-157

Dear Ms. Bergman:

Northern States Power Company, doing business as Xcel Energy, respectfully submits this letter in response to the proposed Draft Route Permit¹ for the Mankato to Mississippi River 345 kV Transmission Line Project (Project) filed on January 21, 2026 and Decision Option modified 9A, modified 9B, new 12A, and new 12B filed on January 27, 2026.

A. Draft Route Permit – Special Condition 6.5 – Tree Replacement Plan

The Draft Route Permit includes the following proposed Special Condition 6.5 related to a tree replacement plan:

¹ *In the Matter of the Application for a Route Permit for the Mankato to Mississippi River 345 kV Transmission Project in Southeast Minnesota*, Docket No. E002/TL-23-157, DRAFT ROUTE PERMIT (Jan. 21, 2026) (eDocket No. [20261-227203-02](#)).

The Permittee in coordination with impacted landowners, the DNR and the affected counties shall develop a plan to replace any trees that are removed for construction of the project by planting new trees first on impacted landowner property or if that's not practical in the affected counties near the project area, and file the plan with the Commission at least 14 days before the pre-construction meeting. At least 90 days prior to the preconstruction meeting, and after consultation with landowners, the DNR, and the affected counties, the Applicant shall make a tree replacement plan compliance filing including an estimate of costs. For Xcel Energy's share of any prudent and reasonable costs associated with any tree replanting requirement may be recoverable under its Renewable Resources Rider.

This condition was first proposed in the Draft Route Permit filed on January 21, 2026 and as a result was not previously addressed by Xcel Energy, or any other participant, as part of this proceeding. As a result, Xcel Energy would like the opportunity to address its concerns with the practicality and cost of implementing this proposed condition for a transmission project of the size and scale as the proposed Project.

While Xcel Energy supports minimizing impacts to trees, a tree replacement program would be difficult to successfully implement for the proposed Project. Xcel Energy's preferred route for the proposed Project is approximately 120-miles long and crosses approximately 720 parcels in six different counties across southern Minnesota. Even though Xcel Energy tried to minimize impacts to forested areas in developing its preferred route, the right-of-way for the preferred route will still cross over 100 acres of forested land.² In areas where tree removal is necessary along the approved route, the Company's current practice is to work directly with landowners during easement negotiations to understand and address impacts on a case-by-case basis for each unique landowner's unique property. This approach appropriately compensates landowners for the easement and allows individual landowners to determine whether and how to replace trees on their property as they deem appropriate. This current practice has worked well for past transmission projects.

² This estimate is based on a desktop review and has not been field verified.

In contrast, developing a tree replacement plan for the entire Project will require Xcel Energy to coordinate with not just impacted landowners, but also counties and the Minnesota Department of Natural Resources (MnDNR) to determine whether and where trees should be replaced on a landowner's property. This approach adds significant complexity and the potential for divergent views. As trees cannot be planted within the right-of-way, where Xcel Energy will have land rights, it is unclear where these trees will be planted and how Xcel Energy will legally access these areas. Implementing a tree replacement program of this size and scale will also require hiring a third-party contractor as Xcel Energy also does not have the experience or internal resources to carry out such a plan.

In addition to these practical concerns, given the size and scale of this Project, the costs of implementing a tree replacement plan should also be considered. Xcel Energy estimates that tree replacements will cost approximately \$1,000 per tree (cost of a tree plus installation) resulting in an additional cost of approximately \$10.8 million to the Project.³ These are only the costs to install the replacement trees and do not include the costs related to inventorying the trees prior to removal, developing a tree replacement plan, hiring a third-party contractor to implement this plan, maintenance, or restoration. All of these additional costs are costs that will be borne by both Minnesota customers and customers across the MISO footprint.⁴

If despite these practical and cost considerations, the Commission decides to adopt this proposed condition, Xcel Energy proposes modifications to this condition and to Decision Option 7(A). As Xcel Energy will be making multiple plan and profile filings for each construction segment, it is appropriate to time the filing of both the tree replacement plans and its associated costs to coincide with those plan and profile filings. As a result, Xcel Energy requests that both the tree replacement plan and costs for each segment be filed 14 days ahead of the preconstruction meeting, which is the same timeframe as the plan and profile filings. In addition, Xcel Energy requests that the condition be modified to allow the Company's costs for the tree replacement plan to

³ Xcel Energy notes that these costs are very preliminary and are based on costs from another recent project as well as certain assumptions about the number of trees that will need to be replaced. This assumes 100 trees per acre would need to be replaced based on a 20-foot spacing between trees.

⁴ The Project is part of the Midcontinent Independent System Operator, Inc.'s (MISO) LRTP Tranche 1 Portfolio, which has been determined to meet the criteria to be a Multi-Value Project and thus qualifies for regional cost allocation.

January 30, 2026

Page 4

be recovered through the Company's Transmission Cost Recovery (TCR) Rider rather than the Company's Renewable Resources Rider. The TCR Rider is where the rest of the costs for this Project will be recovered by the Company and it will be difficult to separately delineate all of the specific costs for the tree replacement plan. These proposed changes are shown below in redline:

The Permittee in coordination with impacted landowners, the DNR and the affected counties shall develop a plan to replace any trees that are removed for construction of the project by planting new trees first on impacted landowner property or if that's not practical in the affected counties near the project area, and file the plan with the Commission at least 14 days before the pre-construction meeting. At least ~~90~~ 14 days prior to the preconstruction meeting, ~~and after consultation with landowners, the DNR, and the affected counties,~~ the Applicant shall make a tree replacement plan compliance filing including an estimate of costs for that construction segment. For Xcel Energy's share of any prudent and reasonable costs associated with any tree replanting requirement may be recoverable under its ~~Renewable Resources~~ Transmission Cost Recovery Rider.

With regard to Decision Option 7(A), Xcel Energy requests that the Commission allow additional time for the Company to provide a final cost estimate for the Project. Currently, Decision Option 7(A) requires the Company to submit a final Project cost estimate within 60 days of the Commission's Order. If Special Condition 6.5 is adopted, the Company requests that Decision Option No. 7A be modified to allow the Company to provide the final Project cost estimate 14 days prior to the first preconstruction meeting rather than within 60 days of the issuance of the Commission's Order.

The Company also has additional minor corrections to the Draft Site Permit that are included in **Attachment A** to this letter.

B. Draft Route Permit – Condition 5.3.9 – Wetlands and Water Resources

The Draft Route Permit includes the following proposed Condition 5.3.9 related to wetlands and water resources:

The Permittee shall develop wetland impact avoidance measures and implement them during construction of the Transmission Facility. Measures shall include spacing and placing the power poles at variable distances to span and avoid wetlands, watercourses, and floodplains. Unavoidable wetland impacts as a result of the placement of poles shall be limited to the immediate area around the poles. To minimize impacts, the Permittee shall construct in wetland areas during frozen ground conditions where practicable and according to permit requirements by the applicable permitting authority. When construction during winter is not possible, the Permittee shall use wooden or composite mats to protect wetland vegetation.

The Permittee shall contain soil excavated from the wetlands and riparian areas and not place it back into the wetland or riparian area. The Permittee shall access wetlands and riparian areas using the shortest route possible in order to minimize travel through wetland areas and prevent unnecessary impacts. The Permittee shall not place staging or stringing set up areas within or adjacent to wetlands or water resources, as practicable. The Permittee shall assemble power pole structures on upland areas before they are brought to the site for installation.

The Permittee shall restore wetland and water resource areas disturbed by construction activities to pre-construction conditions in accordance with the requirements of applicable state and federal permits or laws and landowner agreements. The Permittee shall meet the USACE, Minnesota Department of Natural Resources (DNR), Minnesota Board

of Water and Soil Resources, and local units of government wetland and water resource requirements.

Xcel Energy recognizes the importance of avoiding and/or minimizing impacts to wetlands during construction of the Project and supports inclusion of this condition with the exception of the requirement that the permittee assemble power pole structures on upland areas before they are brought to the site for installation. In many cases bringing fully assembled structures into a wetland area would be more impactful than bringing separate pieces and assembling at the site of installation. This is because a fully assembled transmission structure will typically require more and/or larger equipment and impact a greater area on the ground in order to safely transport and raise the structure. In some cases, such as when access routes must traverse around existing obstacles or uneven terrain, the shortest route possible for transporting a fully assembled structure through a wetland will necessarily be longer than would be needed to transport smaller pieces to the site. In addition, transporting fully assembled structures, particularly in cases where the structures are very large or are H-frame or similar types, would pose much greater safety concerns for construction crews.

Xcel Energy proposes that Condition 5.3.9 be modified to remove the following text:

The Permittee shall assemble power pole structures on upland areas before they are brought to the site for installation.

C. Decision Options modified 9A, modified 9B, new 12A, and new 12B

Xcel Energy does not oppose Decision Option modified 9A, modified 9B, new 12A, and new 12B as filed on January 27, 2026. However, Xcel Energy requests that modified 9A, modified 9B, new 12A be changed to eliminate the requirement to have a single meeting where all affected landowners are invited to discuss potential route alternatives.⁵ Xcel Energy does not believe that such a meeting would be productive. Landowners will have conflicting views on these route alternatives based on impacts to their individual property and may be uncomfortable sharing their opinions in such a setting. Rather, Xcel Energy proposes to have individual meetings with landowners to

⁵ See e.g., “As part of the consultation with affected landowners, the applicant shall have a meeting at a location near the site such as either the township halls for Le Ray and Jamestown townships. The applicant shall present any refined alternatives and impact comparisons.”

January 30, 2026

Page 7

discuss potential route options and impacts and will document these communications as part of a filing with the Commission. Xcel Energy also notes that Special Condition 6.6, which is referenced in each of these decision options, is not included in the Draft Site Permit. Xcel Energy assumes that these references should be changed to Section 10 of the Draft Route Permit related to amendments to the permit. To accommodate these individual rather than group meetings, Xcel Energy proposes the following replacement language to these Decision Options:

Permittees shall consult with affected landowners on potential route alternatives and shall provide affected landowners with impact comparisons for these route alternatives. Landowners shall be given the opportunity to provide written statements to the Permittee that will be provided to the Commission as part of a route permit amendment filing under Section 10 for finalizing the route in this segment.

In addition, since modified 9A, modified 9B, new 12A could result in changes to the route for the Project, there could also be impacts to the estimated cost for the Project. As a result, if the Commission adopts any of these decision options, the Company requests that Decision Option No. 7A be modified, as requested above for Special Condition 6.5, to allow the Company additional time to file its final cost estimate for the Project. This additional time will ensure that any route changes are captured in this final cost estimate.

If you have any questions about this filing, please contact me at (612) 977-8501 or vherring@taftlaw.com.

Sincerely,

/s/ Valerie Herring

CERTIFICATE OF SERVICE

Gustav Gerhardson certifies that on the 30th day of January, 2026, on behalf of Northern States Power Company, doing business as Xcel Energy, he filed a true and correct copy of ***Response to Draft Route Permit and Proposed Decision Options*** via [eDockets](#). Said document was also served via electronic service or U.S. Mail as designated on the attached Official Service Lists on file with the Minnesota Public Utilities Commission in the above-referenced dockets.

/s/ Gustav Gerhardson
