

Commissioner Schuerger Revised Decision Options

Docket No. E002/M-12-383

Docket No. E002/CI-02-2034

January 20, 2021

- [NEW] 7. The Commission establishes, beginning with the first quarter of 2021, an Xcel Energy quarterly reporting requirement detailing the number of interconnection requests received, the number and status of interconnection requests in process, the number of interconnection requests withdrawn and the reason, and the number of interconnection requests successfully completed. The reports shall include, at a minimum, a detailed assessment of compliance with required timelines, the number and status of any disputes or complaints, and a description of any work in progress to improve the interconnection process. The Commission delegates authority to the Executive Secretary to establish the specific details for quarterly reporting of Xcel Energy's compliance with the interconnection process. The quarterly reporting will be guided by the updated temporary annual reporting required in Docket No. E999/CI-16-521.
- [NEW] 8. Direct the Executive Secretary to open a new docket and issue a notice seeking comments with the scope specifically limited to whether the QSP customer complaint threshold should be adjusted to better reflect the changing nature of customer service, and if so, to what extent. *[Alternative to Decision Option 5.A]*
