Xcel Energy Information Request No. 1
Docket No.: E002/M-24-432
Response To: Minnesota Public Utilities Commission
Requestor: Kit Gomez
Date Received: February 13, 2026

Question:

Please clarify the Company’ updated energy savings value estimate per event. In Xcel’s October 3, 2025 Reply Comments, the Company states that it modified the estimated energy savings value from 0.32 kW to 0.19 kW per event. However, under the “Conclusion” portion of the Reply Comments it stated that the estimated energy savings value was updated to 0.21 kW per event.

Response:

In both the Introduction and Cost Effectiveness sections of the October 3, 2025, Reply Comments, the Company noted that we modified the energy savings value from 0.32 to 0.19 kW.

Reference to 0.21 kW in the Conclusion portion of the Reply Comments was a typo and may have been erroneously pulled from Table 2 of the Reply Comments. The correct number for the Conclusion is 0.19 kW.
