Good afternoon,

Midwater BESS, LLC is writing to request your comments on the proposed battery energy storage project. The Project is an energy storage facility to be located in Freeborn County, Minnesota with a nameplate capacity of up to 150-megawatts (MW). We appreciate and welcome any comments your agency may have regarding the Project and resources under your jurisdiction, and respectfully ask for receipt of your comments within 30 days of receiving this email. All responses may be made publicly available upon submission of the Site Permit Application to the Minnesota Public Utilities Commission.

Please email Emily McMillan at Emily.McMillan@Westwoodps.com about any questions and concerns.

Thanks,

Sophia Fisher (she/her)

Re: Request for Comment and Notice of Proposed Midwater Battery Energy Storage System Project in Freeborn County, Minnesota

To Whom It May Concern:

Midwater BESS, LLC (“Midwater”) is proposing to construct and operate an up to 150-megawatt (“MW”) battery energy storage system (“BESS”), referred to as the Midwater Energy Storage Project (the “BESS Project”) and a 161 kilovolt (“kV”) gen-tie line that will be between 2,500 and 4,000 feet in length (the “Transmission Project”) in Freeborn County, Minnesota (the “Project”). On behalf of Midwater, Westwood Professional Services is gathering information and requesting agency comments on the proposed BESS and Transmission Projects.

The Project area is located in Sections 7, 8, and 17, Township 101 North, Range 20 West, Shell Rock Township, southeast of the city of Glenville. The current land cover consists of agricultural and rural vacant land. A Project location map is attached.

The associated facilities include battery storage containers, a Project substation, an above-ground gen-tie line from the Project Substation to an existing substation, access roads, fencing, and underground electrical connections within the storage system. The facility locations and engineering design have not been finalized at this time.

Midwater must obtain a Site Permit for the BESS Project and a Route Permit for the Transmission Project from the Minnesota Public Utilities Commission (“Commission”) to construct the proposed Project. There are multiple opportunities for stakeholder and public input in these proceedings. Midwater is currently gathering information in preparation for filing its applications and expects to file applications with the Commission later in 2024.

We welcome any comments your agency may have at this time and throughout the application process. If you have questions or would like to meet regarding the proposed BESS Project, please contact me at eric.hansen@westwoodps.com. Please provide comments within 30 days of receipt of this letter. Written comments will be incorporated into the applications and the Commission’s review.

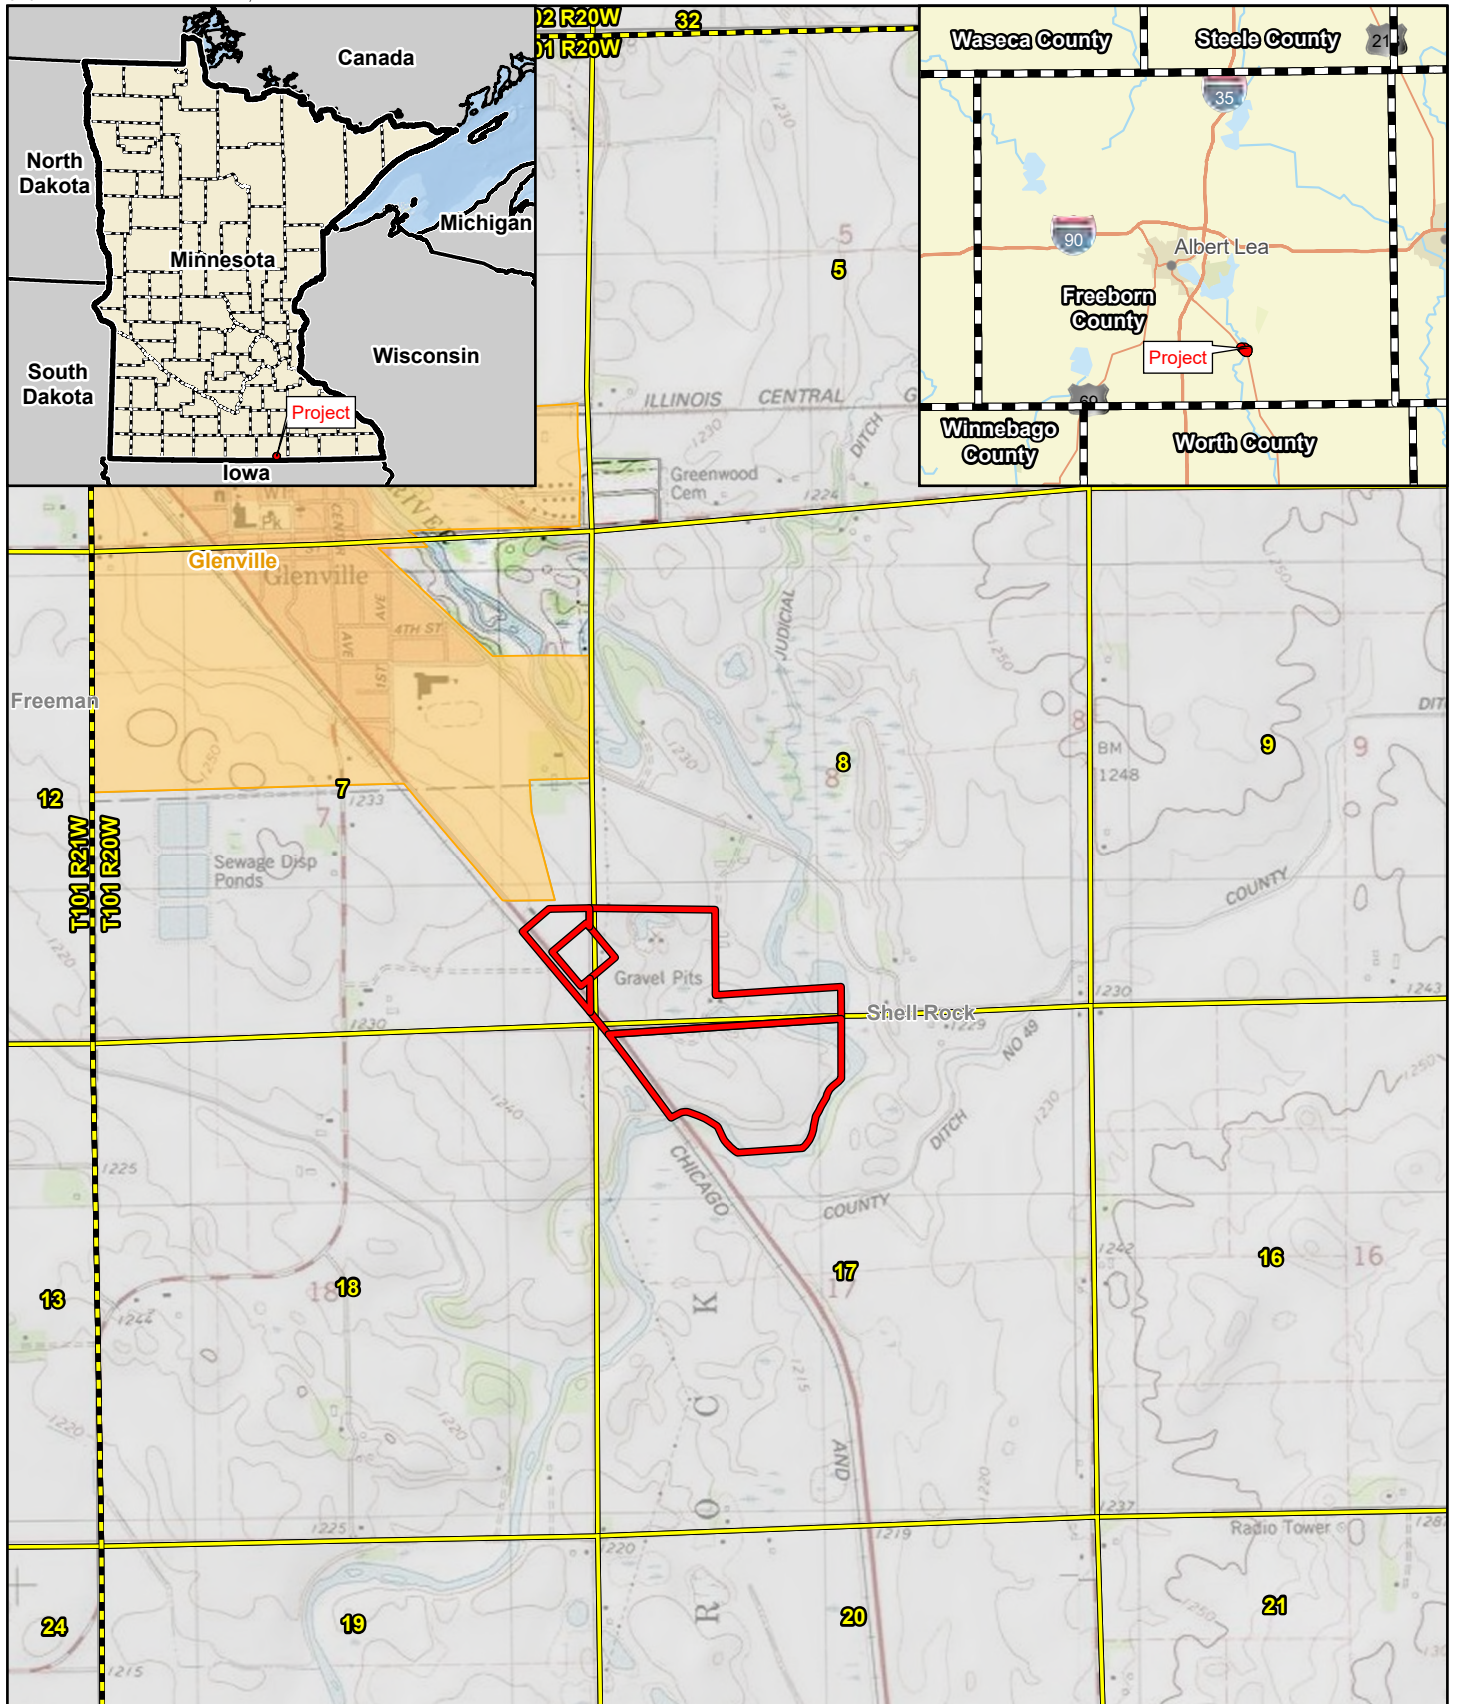

Sincerely,

WESTWOOD PROFESSIONAL SERVICES, INC.

Good afternoon,

Thank you for your response. We are currently working with Midwater BESS, LLC to prepare the design and application package, which they anticipate submitting in late July. In the meantime, please do not hesitate to reach out with any questions.

Thanks,

Thank you Eric, It does help, as long as there are no archaeological sites in the direct Project APE or within 500 feet I have no concerns...

Good afternoon Leonard,

We've conducted a literature search on these projects but have not yet compiled a desktop report as the projects are still early stage.

My cultural team indicates the following:

Snowshoe:

No known archaeological sites in the Project area or one mile buffer.

No historic/architectural resources in project.

Three historic/architectural resources in one mile buffer. All unevaluated or not eligible for the NRHP.

Midwater:

No known archaeological sites in the Project area. One site in the one mile buffer: Site 21FE0126 is a sparse lithic scatter consisting of four pieces of lithic debitage.

One historic/architectural resource in project. XX-ROD-00178 - TH 65 is in far western edge. It is unevaluated for NRHP.

One historic/architectural resource is right on boundary and may or may not be in Project Area. FE-SHE-000 – Bridge 24004 is just in or adjacent far SW corner. It is not eligible for NRHP.
Eight additional historic/architectural resources in one mile buffer. All unevaluated or not eligible for the NRHP.

I hope this helps in your early assessment of the site.

Dear Eric Hansen

Can you provide a desktop or literature study for these projects? Im trying to see if there are any recorded significant archaeological sites at either location, Thanks and have a Great Day!
