Re: Public Utilities Large Wind Energy Conversion System Site Permit  
for Bear Creek Wind Partners, LLC Project in Todd and Otter Tail Counties, IP-6629/WS-07-297  
Annual Compliance Review, Reply Requested

Dear Mr. Ihle:

The Energy Facility Permitting Unit of the Minnesota Department of Commerce recently completed a review of the Large Wind Energy Conversion System (LWECS) site permit's requirements for the Bear Creek Wind Partners, LLC Project and compared them to filings on the Minnesota Public Utilities Commission (PUC) and Department of Commerce e-Dockets website. We have been implementing a new compliance tracking system for these permits.

We are aware that the project has not yet proceeded to construction, but are writing now since in September it will be two years since the site permit was amended on September 28, 2011, to extend the dates for advising the Commission: (1) if a power purchase agreement or other enforceable mechanism has not been obtained and (2) if pre-construction surveys have not been completed and construction has not commenced. Please contact Larry Hartman, the Department of Commerce Energy Facility Permitting state permit manager for this project, at 651-296-5089, or [larry.hartman@state.mn.us](mailto:larry.hartman@state.mn.us), at your earliest convenience to discuss the project status.

Permit Condition III.J.4., Power Purchase Agreement, as amended, states:

“This Permit does not authorize construction of the Project until the Permittee has obtained a power purchase agreement or some other enforceable mechanism for sale of the electricity to be generated by the Project. In the event the Permittee does not obtain a power purchase agreement or some other enforceable mechanism for sale of the electricity to be generated by the project within two years of the issuance of this Permit Amendment, the Permittee must advise the Commission of the reason for not having such power purchase agreement or enforceable mechanism. In such event, the Commission may determine whether this permit should be amended or revoked. No amendment or revocation of this permit may be undertaken except in accordance with applicable statutes and rules, including Minnesota Statute 216F.05 and Minnesota Rule 7854.1300.”

Permit condition III.K.2., Failure to Commence Construction, as amended, states:

“If the Permittee has not completed the pre-construction surveys required in paragraph III.D., and commenced construction of the project within two years of the issuance of this Permit Amendment, the Permittee must advise the Commission of the reason construction has not commenced. In such event, the Commission may determine whether this Permit should be revoked. No revocation of this Permit may be undertaken except in accordance with applicable statutes and rules, including Minnesota Statute 216F.05 and Minnesota Rules 7854.1300.”

We are requesting that you e-file a reply regarding the power purchase agreement and construction before September 28, 2013, and that you e-file a reply before March 28, 2013, documenting that a copy of the final permit was provided to landowners and units of government in accordance with permit condition III.K.9. However, if this documentation cannot be provided, please only indicate this with an explanation; do not send out copies of the permit at this time.

Please e-file your replies on the Public Utilities Commission and Department of Commerce e-Dockets website at:
