Good morning,

Can you please file Patty Eiden's e-mail below as a public comment into the record for the Laketown 115 kV Transmission Line, docket 24-132? If you have any questions please let me know, thanks much!

Sam

Good Morning Sam.

Merry Christmas and Happy New Year.

I have a question for the Commissioners to consider.

Do I wait for the Final Decision meeting, or can I ask you to submit it to them?

If it is decided to approve Route B, can there be an Option to Modify Route B?

Where the Route goes North on Jersey Av., can there be the Option to

Go North on Juniper Av. instead?

This would eliminate the need for any powerline or big corner poles close to

The Lindgren and Greg Eiden homes.

I agree with my husband Tim's comment submitted, that the powerline should go along

The NEW COUNTY ROAD 10.

This project serves Local Load electric needs for Waconia, Victoria, and Laketown township
North of Airport Road,

As stated in the Power Engineers Report, Nov. 7, 2025 .

And not for Dahlgren Township residents where the Preferred Route is proposed to be built.

In closing, although I do think the route should go along NEW County Road 10,

If you do decide to permit Route B, please consider the option to Modify it.

Thank You

Patty Eiden
