RE: Reply Comments of the Minnesota Department of Commerce
Docket No. E002/M-25-142

Dear Ms. Bergman,

Attached are the reply comments of the Minnesota Department of Commerce (Department) in the following matter:

In the Matter of Xcel Energy's 2025 Integrated Distribution Plan.

The Petition was filed by Xcel Energy (Xcel or the Company) on October 31, 2025.

The Department recommends **denial without prejudice** and is available to answer any questions the Minnesota Public Utilities Commission may have.

Sincerely,

/s/ Dr. SYDNIE LIEB
Assistant Commissioner of Regulatory Analysis

Before the Minnesota Public Utilities Commission

Reply Comments of the Minnesota Department of Commerce

Docket Nos. E002/M-25-142

I. INTRODUCTION

The Northern States Power Company, doing business as Xcel Energy (Xcel) files its first ever Proactive Upgrade Proposal (Proposal).¹ In proactive installation, Xcel proposes projects with a forecasted grid need that is outside of its standard planning window of five years. These proposals forecast grid needs in years six to ten and will incorporate proactive sizing into the specification of the proactive installation project.

Proactive installation originated from Xcel's 2023 Integrated Distribution Plan (IDP). In its *Order Accepting the 2023 Integrated Distribution Plan and Modifying Reporting Requirements*, the Minnesota Public Utilities Commission (Commission) determined that additional record development was needed on proactive distribution grid upgrades and related cost allocation.² In Order Point 14 of its September 16, 2024 Order, the Commission authorized the Executive Secretary to convene a stakeholder workgroup to develop a framework for Commission approval following a comment process.

Per the *Order Establishing Framework for Proactive Distribution Grid Upgrades* in Docket No. E002/24-318³ and in conjunction with its 2025 IDP,⁴ Xcel files its first Proactive Upgrade Proposal.⁵ The proposed project requests approval for a new feeder in South Minneapolis in response to a forecasted loading need on feeder MDT077. The project is located at the Midtown substation, and has a project cost of \$3.7 million.⁶ As required by the September 2, 2025 Order, Xcel also proposes its tariff, which introduces a proactive cost-share fee.

These comments respond to Xcel's reply comments on its Proposal.

¹ *In the Matter of Xcel Energy's 2025 Integrated Distribution Plan*, Xcel Energy, Proactive Grid Upgrade Proposal, October 31, 2025, Docket No. E-002/M-25-142, (eDockets) [202510-224541-01](#), (hereinafter "Proposal").

² *In the Matter of Xcel Energy's 2023 Integrated Distribution Plan, Order Accepting 2023 Integrated Distribution Plan and Modifying Reporting Requirements*, September 16, 2024, Docket No. E002/M-23-452, (eDockets) [20249-210223-01](#), (hereinafter "September 16, 2024 Order").

³ *Order Establishing Framework for Proactive Distribution Grid Upgrades*, September 2, 2025, Docket No. E-002/CI-24-318, (eDockets) [20259-222635-01](#), (hereinafter "September 2, 2025 Order").

⁴ *In the Matter of Xcel Energy's 2025 Integrated Distribution Plan*, Xcel Energy, Integrated Distribution Plan, October 31, 2025, Docket No. E-002/M-25-142, (eDockets) [202510-224538-01](#), (hereinafter "2025 IDP").

⁵ Proposal.

⁶ *Id.* at 1-2.

II. PROCEDURAL BACKGROUND

November 1, 2023	Xcel Energy filed its 2023 Integrated Distribution Plan. ⁷
September 16, 2024	The Commission filed its Order Accepting Xcel's 2023 Integrated Distribution Plan and Modifying Reporting Requirements in Docket No. E002/M-23-452. The Commission delegated authority to the Executive Secretary to establish a stakeholder process to develop a framework on cost allocation and proactive upgrades for Xcel. ⁸
September 27, 2024	The Commission filed its Notice of Workgroup Processes and Soliciting Stakeholders to solicit stakeholder involvement in several workgroups, including the Proactive Upgrades workgroup, and issued notice of the opening of the corresponding dockets. ⁹
September 2, 2025	The Commission issued an Order establishing a framework for proactive distribution grid upgrades. ¹⁰
October 31, 2025	Xcel files its 2025 Integrated Distribution Plan and its first Proactive Upgrade Proposal, which includes a proposed tariff for the Proactive Cost-Share Fee. ¹¹
November 13, 2025	The Commission issues Notice of comment period for the Proposal. ¹²
January 28, 2026	The Department files initial comments in response to Xcel's first Proactive Upgrade Proposal. ¹³
February 18, 2026	Xcel files reply comments in the current proceeding. ¹⁴

⁷ *In the Matter of Xcel Energy's 2023 Integrated Distribution Plan*, Xcel Energy, Integrated Distribution Plan (filed in three parts), November 1, 2023, Docket No. E002/M-23-452, (eDockets) [202311-200132-09](#) (hereinafter "2023 IDP").

⁸ September 16, 2024 Order.

⁹ *In the Matter of Xcel Energy's 2023 Integrated Distribution Plan, Notice of Workgroup Processes and Soliciting Stakeholders*, September 27, 2024, Docket No. E-002/M-23-452, (eDockets) [20249-210530-01](#), at 2.

¹⁰ September 2, 2025 Order.

¹¹ Proposal.

¹² *Notice of Comment Period*, November 13, 2025, Docket No. E-002/M-25-142, (eDockets) [202511-224924-01](#) (hereinafter "Notice").

¹³ Department, Comments, January 28, 2026, Docket No. E002-M-25-142, (eDockets) [20261-227533-02](#) (hereinafter "Department Initial Comments on Xcel's Proactive Upgrade Proposal").

¹⁴ Xcel Energy, Reply Comments, February 18, 2026, Docket No. E002-M-25-142, (eDockets) [202602-228292-01](#) (hereinafter "Xcel Proactive Upgrade Proposal Reply Comments").

Topic(s) open for comment:

- Should the Commission approve, modify or reject Xcel Energy's Proactive Upgrade Proposal? In your response, please identify whether the Proposal aligns with the Proactive Distribution Grid Framework.
- What type and amount of cost cap should the Commission establish for total Proactive Distribution Upgrade costs?
- Should the Commission approve Xcel Energy's proposed tariff pages?
- Are there any other issues or concerns related to this matter?

III. DEPARTMENT ANALYSIS

A. APPROVAL OF XCEL'S PROACTIVE UPGRADE PROPOSAL

In its Proactive Upgrade Proposal Reply Comments, Xcel continues to recommend approval of the Proposal. Xcel puts forward the strongest case for approval with the following statement:

[T]he Company has intentionally selected a relatively small project—approximately \$4 million—as its first PDGU Framework proposal. This provides a measured, low-risk opportunity for the Company, stakeholders, and the Commission to gain experience with the new process, test its mechanics, and make procedural and analytical improvements informed by actual practice rather than theory.¹⁵

The greatest value of Xcel's Proposal is derived from the testing of the Proactive Distribution Grid Framework. All other assertions made by Xcel fail to justify the need for its Proposal. The Department addresses each of Xcel's replies on merits in the following subsections.

A.1. Compliance With the Proactive Distribution Grid Framework

Xcel claims that approval of its Proposal now would allow for future modifications if the need or scope of its project changes:

[T]he Framework's modification request process thoughtfully allows for adjustments over time—particularly for projects like this one, where the Company has sufficient runway to continue monitoring and assessing the need and refining its proposal. This approach enhances transparency and gives all parties an opportunity to test the PDGU Framework in real time, with no adverse consequences.¹⁶

¹⁵ Xcel Proactive Upgrade Proposal Reply Comments at 2.

¹⁶ Xcel Proactive Upgrade Proposal Reply Comments at 2.

The Department agrees that the Proactive Distribution Grid Framework allows for process modifications, particularly as required by the following subparts:

C.4 Xcel Energy is not obligated to initiate a project if it is approved in the Proactive Distribution Upgrade Proposal. If Xcel Energy does not proceed with an approved project, it shall explain why and the impact on the overall program budget with its Annual Report, as described in L. Reporting - 9 below.

C.5 If the Company wishes to propose significant changes to an approved Proactive Upgrade Project, Xcel shall request a modification to the project through a subsequent Proactive Upgrade Proposal with a detailed explanation and justification for the proposed changes, including changes to the forecast that impacts the need for project. Significant changes include scope changes to the project that would substantially impact overall project cost, timing, location, or technologies associated with the project.¹⁷

These subparts allow Xcel to modify its Proposal to abandon or modify its Proposal based on changing grid needs. However, Xcel neglects to mention subpart I.7, which states:

I.7 The Commission's Proactive Distribution Upgrade Proposal decision creates a rebuttable presumption, in a cost-recovery proceeding, that upgrades completed consistent with the decision are prudent.¹⁸

Subpart I.7 provides assurance to Xcel that it will likely not be denied cost recovery for its Proposal even if any specific project is later found to be unnecessary. Intervenors have little ability to influence proactive decisions after the approval of a proactive upgrade proposal, beyond seeking denial of cost recovery in a cost recovery proceeding. After approval, Xcel is the only entity tasked with making necessary changes to its proactive upgrade proposal, should the need for its project change, and subparts C.4 and C.5 do not require Xcel to modify its proposal, but rather allow Xcel the opportunity for modification.

In addition, the reporting requirements in Part K. do not require Xcel to disclose changes in its forecast for approved projects, which means that the burden of proof rests on intervenors to request that information from Xcel.¹⁹ In addition, the Proactive Distribution Grid Framework incents Xcel to proceed to construction as quickly as possible after Commission approval in order to nullify intervenors' ability to deny cost recovery on the basis of a forecasted need once construction has begun, as stated by Subpart I.8:

¹⁷ September 2, 2025 Order - PROACTIVE DISTRIBUTION UPGRADE FRAMEWORK at 3.

¹⁸ September 2, 2025 Order - PROACTIVE DISTRIBUTION UPGRADE FRAMEWORK at 9.

¹⁹ Subpart K.6 requires Xcel to report the status of its projects and cost deviations, but does not require the disclosure of changes to its forecast.

An interested person may submit substantial evidence to rebut the Proactive Upgrade Proposal findings and conclusions in a cost recovery proceeding. Substantial evidence does not include a change in forecasted need that occurs after the utility has initiated construction of a proactive upgrade.²⁰

This incentive structure, coupled with the nature of proactive upgrades to replace system assets before their end of life, run counter to the Department's entire theme of its initial comments on Xcel's 2025 Integrated Distribution Plan (IDP) to maximize utilization of existing assets to lower ratepayer costs.²¹ Approval of a proactive upgrade project makes it very difficult to rebut the prudence of a project, and therefore approval should be taken very seriously.

Despite these features, Xcel claims that its Proposal should be approved simply because it meets the requirements of the Proactive Distribution Grid Framework. Xcel states:

Approving this project now is in the public interest for the following reasons:

- Framework Fit: The proposal is a model proactive upgrade that identifies and addresses reliability and capacity needs emerging in the Framework's specified 6- to 10-year planning window in a constrained area and would advance a mitigation well before those constraints become urgent.
- Procedural Compliance: Our filing met all the PDGU Framework's requirements and applied the currently effective cost-share methodology.
- Risk Mitigation & Ratepayer Protection: Forward-looking planning reduces the likelihood of more costly and disruptive interventions in the future. If material conditions change—such as significantly different load forecasts or the emergence of a superior alternative—the PDGU Framework's modification request provisions ensure that any adjustments are made transparently and on the record, thereby protecting customers.
- Timeliness & System Value: Approving the proposal now preserves the planning window needed for efficient design and procurement, maintaining flexibility and minimizing costs. Delaying project approval would compress timelines, narrow viable alternatives, and increase execution risk, eroding the value of a proactive upgrade.²² [citation omitted]

²⁰ September 2, 2025 Order - PROACTIVE DISTRIBUTION UPGRADE FRAMEWORK at 9.

²¹ *In the Matter of Xcel Energy's 2025 Integrated Distribution Plan*, Department, Initial Comments, February 26, 2026, Docket No. E002/M-25-142, (eDockets) [20262-228738-02](#), (hereinafter "Department Initial Comments on Xcel's IDP").

²² Xcel Proactive Upgrade Proposal Reply Comments at 3.

The Department strongly asserts that meeting the requirements of the Proactive Distribution Grid Framework is not a free pass for approval of all proactive projects. As subpart C.3 states, the Commission has discretion to approve proactive upgrade proposals after Xcel meets the necessary precondition of compliance with the Proactive Distribution Grid Framework:

C.3 The Proactive Distribution Upgrade Proposal must demonstrate alignment with the framework, and the Commission shall review and approve, deny, or modify the Proposal with a goal of completion within 12 months from the date of the initial filing.²³

In addition, the Proactive Distribution Grid Framework includes an entire section: “G. Proactive Distribution Upgrade Proposal Evaluation Criteria,” which prescribes how a proactive upgrade proposal must be evaluated. Department’s Initial Comments on Xcel’s Proactive Upgrade Proposal focus on G.5 and G.7, which relate to the consequences of deferral and the forecasted need for the upgrade. Part G. would be meaningless if compliance with the framework was a sufficient condition for approval. While Xcel’s assertions that the Proactive Distribution Grid Framework would allow for abandonment or modification of its Proposal are true, these assertions also ignore the reality that the burden of proof to deny cost recovery is significantly higher after the Commission approves a proactive upgrade proposal.

A.2. Forecast

In its Initial Comments, the Department makes several assertions regarding Xcel’s forecast accuracy and the forecasted need for the MDT077 project. The Department demonstrated that Xcel’s IDP High scenario is very likely to be revised down due to lower electric vehicle and electrification adoption estimates with the recession of the Inflation Reduction Act (IRA) tax credits and with Xcel’s high forecast inaccuracy.²⁴ In addition, the Department demonstrated that the consequences of delay are low compared to the consequences of approval of a project that is unnecessary.²⁵

Xcel’s Proactive Upgrade Proposal Reply Comments notably do not address any of the Department’s criticisms regarding Xcel’s forecasted need. Instead, Xcel makes a process argument that the Company will modify its forecast if the forecast changes:

Under Requirement C.5, the Company “shall request a modification to the project through a subsequent Proactive Upgrade Proposal with a detailed explanation and justification for the proposed changes, including changes to the forecast that impacts the need for project.” This structure ensures that any material deviation from prior forecasts – whether affecting project timing, scope, cost, or overall need – is addressed proactively and

²³ September 2, 2025 Order - PROACTIVE DISTRIBUTION UPGRADE FRAMEWORK at 3.

²⁴ Department Initial Comments on Xcel’s Proactive Upgrade Proposal at 5-9.

²⁵ Department Initial Comments on Xcel’s Proactive Upgrade Proposal at 9.

transparently before the project proceeds to detailed engineering or procurement.

As reflected in our IDP filings, load forecasts are inherently uncertain due to evolving customer behavior, economic development, electrification trends, and technology adoption. Framework requirements A.5 and C.5 operationalize this reality by aligning project approvals with updated information and providing a clear, structured pathway to adjust a project when forecasts change. Together, these provisions mitigate the risk of over- or under-building and protect customers from bearing unnecessary costs tied to material forecast inaccuracies.²⁶

Again, Xcel does not state the totality of the Proactive Distribution Grid Framework. Subpart C.5 prefaces Xcel's quote with the statement: "If the Company wishes to propose significant changes to an approved Proactive Upgrade Project [...]"²⁷ Xcel may not wish to propose significant changes to its Proposal, even if the Proposal is later shown to be unnecessary: for example, if Xcel quickly moves a project to construction before the forecasted need later dematerializes. After approval, the requirements of the framework are only enforceable to the extent that Xcel can be denied cost recovery. The rebuttable presumption of prudence gives Xcel a near-certain path toward cost recovery given the uncertainty of proactive planning process.

While the Department finds value to these framework requirements for projects that demonstrate a legitimate need at the time of approval, there is no justification to approve a project that can be demonstrated to be unnecessary at the time of a Commission decision, such as the case with Xcel's Proposal.

In its Initial Comments, the Department recommended a new filing requirement for forecast accuracy which states:

The Department recommends the Commission create a new IDP filing requirement to provide a comparison of forecast accuracy for each vintage and scenario (IDP Low, Medium, High) in Xcel's LoadSEER forecasts compared to actuals.²⁸

In Xcel's Proactive Upgrade Proposal Reply Comments, the Company contests the need for a new filing requirement as onerous and misguided.²⁹ The Department withdraws its recommendation and does not respond to Xcel's response in these comments. Instead, the Department responded to Xcel's Reply Comments in its Initial Comments on Xcel's IDP.³⁰ Given the overarching nature of the Department's recommendation and the much larger applicability of capacity forecast error for Xcel system-wide

²⁶ Xcel Proactive Upgrade Proposal Reply Comments at 7.

²⁷ September 2, 2025 Order - PROACTIVE DISTRIBUTION UPGRADE FRAMEWORK at 3.

²⁸ Department Initial Comments on Xcel's Proactive Upgrade Proposal at 10.

²⁹ Xcel Proactive Upgrade Proposal Reply Comments at 6-8.

³⁰ Department Initial Comments on Xcel's IDP at 59-61.

forecasting, the recommendation is more appropriate for the IDP comment period than in the current comment period.

A.3. Final Recommendations

The Department withdraws the following recommendation:

The Department recommends the Commission create a new IDP filing requirement to provide a comparison of forecast accuracy for each vintage and scenario (IDP Low, Medium, High) in Xcel's LoadSEER forecasts compared to actuals.

The Department maintains the following recommendations:

The Department recommends the Commission deny the MDT077 project without prejudice.

The Department recommends Xcel file the MDT077 project forecast and upgrade need year in its next IDP.³¹

B. COST CAP

In compliance with the Proactive Distribution Upgrade Framework subpart I.5,³² the Department made the following recommendation:

The Department recommends the Commission order a Proactive Distribution Upgrade Framework cost cap of \$15 million.³³

Xcel asserts that a Commission order regarding a cost cap is unnecessary at this time:

We believe it is premature to establish a fixed cost cap applicable to all future PDGU proposals, and that the Phase 2 discussions—where procedural refinements are expected—provide a helpful venue for evaluating whether and when a broader cost-cap structure may be necessary.

If, however, the Commission determines that a forward-looking cost cap must be established in this proceeding, we propose a mechanism tied to the scale of the Company's overall distribution system investment. A cap based on the total five-year capital budget reflected in the Integrated Distribution Plan—or on the average of multiple five-year budgets—would allow PDGU Framework investment levels to scale proportionally with

³¹ Department Initial Comments on Xcel's Proactive Upgrade Proposal at 12.

³² September 2, 2025 Order - Proactive Distribution Upgrade Framework at 9.

³³ Department Initial Comments on Xcel's Proactive Upgrade Proposal at 11.

system needs, available resources, and the size of the Company's broader distribution investment plan. A percentage-based method would also enhance transparency and predictability while maintaining strong Commission oversight and ensuring alignment with overall capital planning.³⁴

Xcel also claims that the Department's recommendation for a \$15 million cost cap is arbitrary and "could unintentionally restrict the range of proactive investments the PDGU Framework is intended to support."³⁵ To the contrary, the Department's proposed cost cap is not arbitrary but is instead intended to limit the ratepayer risk of a highly speculative and uncertain process that has yet to demonstrate its merits. The specific \$15 million figure references Table 1 of the Proposal,³⁶ with a \$15 million upper limit for feeder upgrade projects. The Department reiterates its justification of a small cost cap until the efficacy of the Proactive Distribution Upgrade Framework can be demonstrated:

Based on the preliminary results presented in Section A, the Department urges caution regarding a cost cap. While the forecast uncertainty of Xcel's system-wide forecast is known, the forecast uncertainty of LoadSEER remains unknown, but initial results are concerning. A high cost cap could authorize tens of millions of dollars worth of projects that in ten years may prove to have not been necessary. The Department does not seek to impede the proactive planning process, rather it seeks strict cost controls until such time as LoadSEER forecasts are proven to be accurate and reliable in the proactive planning horizon. Based on Xcel's estimated upgrade costs, it is reasonable to allow several smaller projects similar to the MDT077 project to be constructed, or one or more larger projects, in order to pilot the proactive planning process until the LoadSEER forecast accuracy can be confirmed.³⁷

Again, Xcel does not respond to the Department's analysis regarding Xcel's forecast uncertainty, and instead claims that the Department's logic is arbitrary. The Department contrasts its logic with Xcel's justification of a percentage-based cost cap, which does not acknowledge the inherent risks of proactive spending.

Despite these concerns, the Department is not opposed to the delay of a Commission decision regarding a cost cap if the Commission sees merit to allowing Phase 2 discussions to inform the appropriate size of a cost cap.

³⁴ Xcel Proactive Upgrade Proposal Reply Comments at 4.

³⁵ Xcel Proactive Upgrade Proposal Reply Comments at 4.

³⁶ Proposal at 3.

³⁷ Department Initial Comments on Xcel's Proactive Upgrade Proposal at 11.

B.1. Final Recommendation:

The Department maintains the following recommendation:

The Department recommends the Commission order a Proactive Distribution Upgrade Framework cost cap of \$15 million.³⁸

C. PROPOSED TARIFF

In its Initial Comments, the Department recommended:

The Department recommends the Commission approve Xcel's tariff sheets with a modification to add each Commission approved proactive upgrade and its Proactive Distribution Upgrade Framework triggering threshold for cost recovery.³⁹

Xcel responds to the Department's recommendation to modify Xcel's tariff sheets as follows:

Tariffs are intended to inform retail customers about their utility service parameters and charges. Listing individual proactive upgrade projects would not be generally informative or useful to retail customers because these projects are not intended to be charged to retail customers. Rather, the costs will primarily be paid by developers and, potentially, certain large customers if the proactive upgrade project is driven by a load increase.

For these reasons, we do not support the recommended modification and request that the Commission approve the tariff sheet as filed. Including project-specific PDGU upgrade information in the tariff would not provide meaningful value to customers. This information is already captured through the PDGU Framework's required reporting and proposal filings. Adding detailed, project-specific content to the tariff would unnecessarily complicate the document without improving customer understanding or transparency.⁴⁰ [citation omitted]

The Department accepts Xcel's justification that the modification would not provide additional value to ratepayers, and the Department modifies its recommendation as follows:

The Department recommends the Commission approve Xcel's tariff sheets ~~with a modification to add each Commission approved proactive upgrade and its Proactive Distribution Upgrade Framework triggering threshold for cost recovery.~~

³⁸ Department Initial Comments on Xcel's Proactive Upgrade Proposal at 11.

³⁹ Department Initial Comments on Xcel's Proactive Upgrade Proposal at 12.

⁴⁰ Xcel Proactive Upgrade Proposal Reply Comments at 8-9.

C.1. Final Recommendation

The Department recommends the Commission approve Xcel's tariff sheets.

IV. DEPARTMENT RECOMMENDATIONS

Based on analysis of Xcel's Proactive Upgrade Proposal and the information in the record, the Department recommends denial of the Proposal without prejudice,

A. APPROVAL OF XCEL'S PROACTIVE UPGRADE PROPOSAL

- A.1. The Department recommends the Commission deny the MDT077 project without prejudice.
- A.2. The Department recommends Xcel file the MDT077 project forecast and upgrade need year in its next IDP.

B. COST CAP

- B.2. The Department recommends the Commission order a Proactive Distribution Upgrade Framework cost cap of \$15 million.

C. PROPOSED TARIFF

- B.2. The Department recommends that Xcel modify its tariff sheets.
