I am writing to express my concerns regarding the Summit Lake Solar Project and its impact on acreage owners who are not included in the leasing or purchasing agreements. While I understand the need for renewable energy development, I am deeply troubled by the lack of communication, consideration, and benefits offered to those whose acreages will now be surrounded by this project.

Some of the privately owned land acquired for this project directly surrounds existing acreages, yet the residents of these acreages have not been engaged in discussions, nor have they been offered any explanation, benefits, or accommodations. These families, who have long called this area home, are now facing significant changes to their surroundings without acknowledgment or input. It is disheartening to see their properties treated as an afterthought rather than as an integral part of the community impacted by this development.

I urge the developers and relevant authorities to engage with these acreage owners, address their concerns, and consider mitigation measures to ensure they are not left without a voice in this process. Thoughtful planning should include all affected residents, not just those who directly lease or sell their land.

Thank you for your time and consideration. I appreciate your attention to this matter and hope to see a more inclusive approach moving forward.
