Appendix M-1c, Mankato – Mississippi River Transmission Project Certificate of Need and Route Permit Application, E002/CN-22-532 and E002/TL-23-157

October 31, 2023

Johnny Johnson, President Noah White, THPO Prairie Island Indian Community 5636 Sturgeon Lake Road Welch, MN 55089

Re: Mankato-Mississippi River Transmission Line Project Blue Earth, Le Sueur, Waseca, Rice, Dodge, Olmsted, Goodhue, Winona, and Wabasha counties, Minnesota Docket No. E002/CN-22-532 and TL-23-157

Dear Johnny Johnson and Noah White:

In April, we reached out to let you know about the Mankato-Mississippi River Transmission Project (Project). I am writing to provide an update about the Project, and to provide you with an opportunity to request more information or to meet to discuss the Project. Xcel Energy is leading a proposal to construct the Project, which consists of about 120 miles of new 345 kilovolt (kV) transmission line from Xcel Energy's existing Wilmarth Substation located near Mankato, east to the Mississippi River, southeast of Kellogg. In addition, about 20 miles of an existing 161 kV line will need to be relocated between the North Rochester Substation near Pine Island, Minnesota and a point on that line northeast of Rochester.

In May 2023, we held initial public open houses within the Project area to inform landowners and community members about the Project and to receive feedback about the initial route options we identified. We held another round of open houses from Sept. 19-21 that provided additional project updates and opportunities for landowners to provide additional feedback about updated route options currently under consideration. We are also coordinating with potentially interested Tribes and regulatory and government agencies.

The enclosed map shows the Project study area, existing transmission lines and updated route options under consideration. The route options shown were developed based on analysis of publicly available data with a focus on minimizing socioeconomic and environmental impacts, avoiding known culturally significant sites and protected resources, and maximizing co-location with other infrastructure. These routes also take into account feedback received to date. We will continue to develop and refine the routes based on more detailed analysis, continued community and Tribal feedback, engineering best practices, environmental considerations, and regulatory guidelines.

This Project will require a Certificate of Need and Route Permit with the Minnesota Public Utilities Commission (PUC). We intend to file these applications in early 2024, in accordance with Minnesota Rules (Minn. R.) 7849 and Minn. R. 7850. Additional permitting processes and consultations will occur with applicable agencies and other jurisdictions.

Please let us know if you have information we should consider in evaluating and refining routes. If you would like to meet to discuss the Project and provide input, we would be happy to meet in-person or virtually. If you prefer to review the routes in a GIS shapefile or Google Earth format, please let us know.

We look forward hearing from you about this Project. If you have questions and would like additional information, please contact me at <u>Ellen.L.Heine@xcelenergy.com</u> or (612) 330-6073.

Sincerely,

fllenbeine

Ellen Heine Principal Siting and Permitting Agent

Cynthia Warzecha Energy Projects Reviewer Minnesota DNR 500 Lafayette Road St. Paul, MN 55155 Kate Fairman Environmental Review Operations Lead Minnesota DNR 500 Lafayette Road St. Paul, MN 55155

Re: Mankato-Mississippi River Transmission Project Blue Earth, Le Sueur, Waseca, Faribault, Goodhue, Olmstead, and Wabasha Counties, Minnesota

Dear Ms. Warzecha and Ms. Fairman:

I am writing to let you know about an upcoming transmission line project, and to provide you with an opportunity to request more information or meet to discuss the project. This project is part of a portfolio of long-range electric transmission projects identified by the regional grid operator, Midcontinent Independent System Operator (MISO), intended to improve reliability, relieve capacity on the grid as electricity use increases, create more system resiliency during extreme weather and support bringing on more renewable energy in Minnesota and throughout the Midwest.

Xcel Energy is leading a proposal to construct the Mankato-Mississippi River Transmission Project (Project), which consists of about 120 miles of new 345-kilovolt (kV) transmission line from Xcel Energy's existing Wilmarth Substation located in Mankato in Blue Earth County, east to the Mississippi River in Wabasha County, southeast of Kellogg, Minnesota. The enclosed map shows the study area for the Project, existing transmission facilities and preliminary route options currently under consideration.

In addition to the new 345-kV line, about 20 miles of an existing 161-kV line will need to be relocated between the North Rochester Substation near Pine Island, Minnesota and a point on that line northeast of Rochester. This is needed because a portion of the new 345-kV line would displace the 161-kV line where it is currently double-circuited with an existing 345-kV line.

The preliminary route options shown in the attached map were developed based on analysis of publicly available data with a focus on minimizing socioeconomic and environmental impacts, avoiding culturally significant sites and protected resources, and maximizing co-location with other infrastructure. We will continue to develop and refine the routes based on more detailed analysis, community feedback, engineering best practices, environmental considerations and regulatory guidelines.

Xcel Energy has incorporated several Minnesota Department of Natural Resources (MnDNR) mapping layers in our project development map, including, but not limited to: NHIS data, MBS sites, native plant communities, state parks and other state lands, and calcareous fens. The project study area was also uploaded into the MnDNR Minnesota Conservation Explorer on April 6, 2023, to identify ecologically significant areas within the project study area. A copy of the Conservation Planning Report associated with the project study area is enclosed and is summarized below:

- One hundred and four MBS Sites within the study area are designated with Biodiversity Significance Ratings ranging from "Below" to "Outstanding"
- MnDNR Native Plant Community Classification types with 395 total mapped communities were identified within the study area
- Six Calcareous Fens, and eight DNR Old Growth Stands were identified within the study area
- No MN Prairie Conservation Plan areas were identified within the study area
- Three Important Bird Areas, identified by Audubon Minnesota in partnership with the MnDNR, are mapped within the study area and include the Upper Minnesota River Valley IBA, the Upper Mississippi NWR IBA, and the Whitewater Valleys IBA. These areas are non-regulatory, but the designation of these sites demonstrates the significant ecological value of the area
- Twelve Lakes of Biological Significance are mapped within the study area, with their biological significance ranking from "Moderate" to "Outstanding"

Additional information regarding the purpose of these designations is available within the attached Conservation Planning Report. As we continue to develop the Project, this information will be used to help refine route alternatives. A formal Natural Heritage Review Request for formal NHIS consultation and additional coordination with MnDNR staff will be completed as Project routes become more defined.

This Project will require a Certificate of Need and Route Permit with the Minnesota Public Utilities Commission (PUC). We intend to file these applications in late 2023, in accordance with Minnesota Rules (Minn. R.) 7849 and Minn. R. 7850. Additional permitting processes and consultations will occur with applicable agencies and other jurisdictions.

As part of this process, Xcel Energy is conducting stakeholder outreach and holding public meetings starting this spring and continuing throughout 2023, as well as coordinating with applicable Tribes, regulatory and government agencies. There will be several future opportunities for input regarding the Project and we will provide schedule updates in future communications.

At this stage of Project development, we want to make you aware of the Project and begin gathering information to help refine or develop additional potential route options or identify

potential constraints. Please let us know if you have information we should consider in evaluating and refining routes. If you would like to meet to discuss the Project and provide input, we would be happy to meet in-person or virtually. If you prefer to review the routes in a GIS shapefile or Google Earth format, please let us know.

We look forward hearing from you about this Project. If you have questions and would like additional information, please contact me at <u>Ellen.L.Heine@xcelenergy.com</u> or (612) 330-6073.

Sincerely,

Ellen Heine Principal Siting and Permitting Agent

Dear M(s. or r.) Fogarty:

I am writing to let you know about an upcoming transmission line project, and to provide you with an opportunity to request more information or to meet to discuss the project. This project is part of a portfolio of long-range electric transmission projects identified by the regional grid operator, Midcontinent Independent System Operator (MISO), intended to improve reliability, relieve capacity on the grid as electricity use increases, create more system resiliency during extreme weather and support bringing on more renewable energy in Minnesota and throughout the Midwest.

Xcel Energy is leading a proposal to construct the Mankato-Mississippi River Transmission Project (Project), which consists of about 120 miles of new 345-kilovolt (kV) transmission line from Xcel Energy's existing Wilmarth Substation located in Mankato in Blue Earth County, east to the Mississippi River in Wabasha County, southeast of Kellogg, Minnesota. The enclosed map shows the study area for the Project, existing transmission facilities and preliminary route options currently under consideration.

In addition to the new 345-kV line, about 20 miles of an existing 161-kV line will need to be relocated between the North Rochester Substation near Pine Island, Minnesota and a point on that line northeast of Rochester. This is needed because a portion of the new 345-kV line would displace the 161-kV line where it is currently double-circuited with an existing 345-kV line.

As part of this process, Xcel Energy is conducting stakeholder outreach and holding public meetings starting this spring and continuing throughout 2023, as well as coordinating with applicable Tribes, regulatory and government agencies. There will be several future opportunities for input regarding the Project and we will provide schedule updates in future communications.

At this stage of Project development, we want to make you aware of the Project and begin gathering information to help refine or develop additional potential route options or identify potential constraints. Please let us know if you have information we should consider in evaluating and refining routes. If you would like to meet to discuss the Project and provide input, we would be happy to meet in-person or virtually. If you prefer to review the routes in a GIS shapefile or Google Earth format, please let us know.

We look forward hearing from you about this Project. If you have questions and would like additional information, please contact me at <u>Ellen.L.Heine@xcelenergy.com</u> or (612) 330-6073.

Sincerely,

Ellen/ Serie

Hey Alex,

Sorry for the extended delay on this one. We have been working on refining routes based on public and agency feedback. At this point we are preparing for a second round of open houses, and feel that we are close to what will be our "final" proposed routes, with an expected application to the Public Utilities Commission in late 2023/early 2024. Sometime in the next few weeks we'd like to schedule some time to go over the project with you. We can come up with a few potential times and send them over to you if that works best? Or there are specific times that do or do not work for you feel free to let us know and we can plan around that.

Thanks,

Ellen

Hello Ellen,

On May 1, 2023, you requested a preapplication meeting to discuss an upcoming project. This file has been inactive because you have not responded to our email to set up a preapplication meeting. If the project has been abandoned or if problems have arisen, please let us know. We will expect your reply within 30 days of receipt of this email, after which time we will consider your application withdrawn.

If you have any questions, please reach out to me. My contact information is listed below.

Alex Meincke Lead Project Manager, North Branch, Regulatory Division St. Paul District, US Army Corps of Engineers 332 Minnesota Street, Suite E1500 St. Paul, Minnesota 55101 Office Phone: (651) 290-5485 Cell Phone: (952) 679-0744

I think once we see the text of the new eagle regs we'll have a better idea of the best path forward, so I think early next year is the best time for us to brainstorm. Have a good weekend, Mags

Thanks Mags. I got some more guidance on bat requirements yesterday, so I think your advice to wait to meet on eagles (and bats) will work well. Let us know if there are any other specific species we should plan to discuss when we do meet.

Have a lovely weekend. 😊

Ellen

Hi Ellen,

as you likely know, we are currently waiting for a final decision on the update on the eagle rule, which will likely influence how this project obtains coverage for eagle take. We are expecting to have the final rule by the end of the year - I would recommend waiting for the final rule and then seeing how it could apply to this project. You could also plan to do eagle nest surveys the year prior to construction begins (when the leaves are off the trees) - however, there might be some additional recommendations about surveys in the new regulations, so I would recommend reviewing the new regs prior to planning any eagle nest surveys. I'm happy to touch base with you at the beginning of next year and discuss options once the new rule is finalized. I don't think meeting before then would be productive. Thanks,

Mags

Hi Shauna and Mags,

I sent the attached letter and IPaC report this spring (right around the same time I sent one for the Sherco Solar 3 Project) and hadn't heard back on this one so am reaching out to see if you would be interesting in setting up a teams call to discuss the project. I'm also cc'ing Jill, who I realize didn't get the letter. With all the bat listings it would probably be a good idea for talk about what might be required for surveys etc..

Brief project summary/update: Since the agency letters went out this spring we held a round of public open houses in May. A second round of in-person open houses are scheduled September 19, 20, 21 with a virtual open house on the 26th. The attached map and kmzs show the updated routes. These latest ones include changes based on additional map and site visit reviews, landowner feedback and input from other agencies and LGUs. We are currently planning to file our application with the PUC in late December/Early January.

Let me know if you would like to set up some time to have a Teams call and review the routes and such.

Thanks,

Ellen

Thank you Robert. We've got some flight surfaces for the Mankato Airport that we've been using to help evaluate and design preliminary structures. We will make sure to submit the structures in that area as well as at Faribault through the OE system. I'll let the engineers know that you are available to meet if there are any questions or things they would like to discuss.

Thanks!

Ellen

Ms. Heine,

See my response below on the Mankato-Mississippi River Transmission Project.

You had originally sent in a mailing to our office DTD 5/1/2023. I have taken over Andy Peek's duties on airspacing.

No problem if you want to meet on this. Probably virtual would work best.

Thanks,

Robert Hahn FAA - Dakota-Minnesota ADO 6020 28th Ave S Suite 102 Minneapolis, MN 55450-2700 W 612-253-4639 E-mail: <u>Robert.Hahn@faa.gov</u>

From: Hahn, Robert (FAA)
Sent: Tuesday, May 9, 2023 3:41 PM
To: contact@mankatomississippirivertransmission.com
Subject: FAA DAK-MIN-ADO Proposed Transmission Line Comments

To whom it may concern:

In reviewing the mailed brochure, I just wanted to remind about the FAA filing requirements per the public OE/AAA system:

Obstruction Evaluation / Airport Airspace Analysis (OE/AAA) (faa.gov)

Specifically,

any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:
 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in 14 CFR 77.9(d) with its longest runway more than 3,200 ft. in actual length, excluding heliports

Looking at the MN Aero Chart, I see two airports in the vicinity of the proposed transmission line path:

Mankato (MKT)

Faribault (FBL)

When it comes time to submit points per the above, I would expect a significant number of line pole points around the two airports mentioned above and strategic points (i.e., that help to define the pole configuration) going from east/west.

Sincerely,

Robert Hahn FAA - Dakota-Minnesota ADO 6020 28th Ave S Suite 102 Minneapolis, MN 55450-2700
