To who it may concern, We are a land owner who is in the process of leasing land for two 1-Mega watt solar gardens. We have had our conditional use permit for the first 1-Mega watt site since May 12, 2020 and are waiting for XcelEnergy to ok the interconnection to there grid. We have been told that process should be able to be completed in a day. We are reaching out to anyone who can possibly help to explain why there should be such a long timeline to get this done. Being it holds up a lot of economic activity for the state of Minnesota and what to tell the ag producer who rents my land now if he should be buying additional seed and inputs for the acres that will have the solar gardens. Hope fully we can come up with a solution that will address this concern, as it seems the clock is ticking to help keep our environment better for generations to come. Sincerely Dale Lindquist
