1 MR. MICHAEL KAUZNIAK: Good evening. My 2 name is Mike Kaluzniak. I'm a staff person with the Minnesota Public Utilities Commission. 3 Thank you for coming out today. 4 We are here for the public information 5 and the environmental report scoping meeting for the 6 Second Circuit Project for the Brookings to Hampton 7 8 line, which most of you are obviously familiar with. 9 We are here in Marshall and we do 10 appreciate you coming out. The purpose of the meeting is to provide 11 12 more information about the proposed project, as well as the review for the certificate of need 13 application for the two applications that the 14 applicants have before the Commission; and one is 15 the certificate of need, which speaks to whether the 16 17 project is needed and in the best interests of the 18 ratepayers and consumers; and, secondly, a minor 19 alteration process to amend a permit that was issued in 2012. 20 21 In fact, we were out here with the 22 original routing and siting out here a few years 23 I think many of us were here. ago. Oh, come on in. We are just getting 24 25 started.

> Shaddix & Associates - Stenographic Court Reporters (952)888-7687 - reporters@janetshaddix.com

1 So again we are here to ask your 2 participation in developing a record for the development of the scoping report, which is an 3 analysis of the environmental impacts of the project 4 itself. We would also appreciate any comments you 5 might have on the need for the project or whether 6 there is potential impacts from the project and 7 commenting about any methods you can think of that 8 might minimize, mitigate or avoid any of those 9 10 potential impacts. Again, I'm Michael Kaluzniak, a staff 11 person with the Commission. The Commission, as you 12 13 know, regulates utilities. And as part of that, we approve and analyze -- not always approve -- but we 14 15 analyze and consider permits for transmission lines, pipelines, energy facilities, nuclear, solar, wind, 16 17 and the like. 18 Also with us is Tim Rogers here from Xcel He will be speaking next about the project 19 Energy. 20 information, so going through what the project looks 21 like and the timeframes. 22 Suzanne Steinhauer is here from the 23 Department of Commerce. The Department of Commerce is a sibling agency of ours that helps develop the 24 record for the Commissioner's decisions on these 25

1 things -- typically through an environmental 2 document and an environmental assessment record, an 3 environmental impact statement. Tonight we have an environmental review 4 and I know this is assertoric to a lot of people but 5 the environmental review document is directed 6 towards the certificate of need portion of the 7 application. 8 9 But, again, we are a small group here so 10 we will be very casual about comments and questions. Suzanne will be moderating that portion of the 11 evening. 12 Again, the certificate of need for this 13 line is a large energy facility. 14 And the next bullet down shows the 15 statutes and rules that are mandating and regulating 16 17 this process as the Commission goes through these 18 processes. And the second part, as I mentioned, is 19 the minor alteration to the existing transmission 20 21 line permit that has been effective from the 22 Commission that was ordered and was approved in 23 December of 2012. And so I will talk a bit about the process of how we are reviewing those as well. 24 We are here for the environmental 25

1	scoping. The Department of Commerce will write a
2	formal report after we take your comments and say
3	this is what we are going to look at and then write
4	the report that comes back. We will probably be
5	back out here in the March timeframe something
6	like that March - April to have a public hearing
7	with an Administrative Law Judge that is similar to
8	this.
9	You can see, by the way, we have a court
10	reporter here, Jolene, who is taking notes for us
11	tonight.
12	If you have questions or wish to speak,
13	please introduce yourself with your name and
14	spelling and that helps her out to make the record.
15	Anyhow, we will be out here with a public
16	hearing with an administrative law judge. A similar
17	sort of process: We will be evaluating more of the
18	record retrospectively because there is an
19	environmental report that looks to these things.
20	There will some filings, additional filings by the
21	applicants about the need for the project, and those
22	sort of things.
23	If you did not get a copy of the notice
24	here, please take one with you. There is also
25	copies of this presentation tonight that are over

Shaddix & Associates - Stenographic Court Reporters (952)888-7687 - reporters@janetshaddix.com

1 here. 2 There is also a QR code for a survey that I will talk good but, yeah, that should help 3 4 you. And if you have any information you would 5 like to find on the project, you can go to our 6 website any time. All of our documents and 7 8 everything the Commission uses to make its decision is online at our website and available. 9 And if you 10 have any questions, feel free to contact us any time. 11 12 And with that, I would just note, again there is a survey. Our communications people have 13 us doing a survey of these meetings to see if you 14 appreciate or do not like the format and content of 15 16 the meetings. Feel free to do that. There is a OR 17 code that you can scan. There is a copy of the 18 papers over there as well, or you can take a copy of the survey home with you or drop it off here and 19 20 just respond directly and we will take those back to 21 our people. But we are not looking for those 22 comments to be about the line and where it goes or 23 the impacts of the line. Just this is for purposes 24 of organizing these meetings. So with that, I think I will turn it over 25

1 to Tim Rogers. 2 If you have any questions, we are happy to talk about this so, thank you once again. 3 MR. TIM ROGERS: Good evening. 4 I'm Tim Rogers, I'm a manager of the site line rights group 5 6 at Xcel Energy. My group does a lot of the permitting and kind of the land control. We have 7 land agents that work with the landowners on these 8 9 type of projects. I have Tony Wendland with me, who is the 10 project manager with me on this project, and other 11 12 associates that can help out with any type of 13 questions that we can't handle. Xcel is the utility that we are the lead 14 15 applicant on this project but there are other --16 there are other owners of the line that I need you 17 all to be aware of. They are co-owners of this line 18 so we need to knowledge them. So I will describe the project here a 19 bit. 20 21 So we are asking the Commission for 22 approval to put on a second circuit on the existing 23 lines that you are all pretty aware of. You can see 24 that the structures have been up for, you know, 12 25 years or so.

1 And there is two segments of the line on 2 the east and the west that have the davit arms already for the second circuit. 3 The two segments are 98 miles in length 4 The Western Segment goes from White, 5 in total. South Dakota, to Milroy, Minnesota. That's this 6 Western Segment. And then there is an Eastern 7 8 Segment that goes from a substation in New Prague, 9 Minnesota, to Hampton, Minnesota. A little background on this. When we 10 first got approval to build this line, the 11 12 Commission asked us, they said, you know, you can build it double circuit capable but when you are 13 ready to put that second line on, why don't you come 14 15 back before us to make sure that the project makes sense, it is economical, and there is a need for it. 16 17 So that's kind of where we are at right 18 now is we are finding that the existing line has congestion on it so it's kind of inhibiting us from 19 20 delivering renewable energy. So now is the time to 21 put on this second circuit. 22 The two segments, the east and west 23 there, I could get into the details. On the west side here, we only have one structure I believe that 24 is going to be new, and that's to cut in to Chub 25

> Shaddix & Associates - Stenographic Court Reporters (952)888-7687 - reporters@janetshaddix.com

1 Lake -- Steep Bank Substation. So we will have one 2 new structure. All the activities on both segments are 3 going to be within existing easements so we won't 4 5 need any new land rights. Most of the project will be helicopter 6 use so we will string that second circuit using a 7 helicopter. There will be like dead-end structures, 8 9 corner structures where the helicopter can't put on that second circuit and so we need to get approval 10 up on the structure with a bucket truck or we need 11 to do kind of a pulling staging area. 12 13 So there are a few spots on each segment where we will have some access roads and staging 14 15 areas around a few structures but all still within the existing easements. 16 17 The Eastern Segment is pretty much the 18 same. We do have more structures that need to go in 19 on this segment and that's due to the Airlake 20 Airport. We have to have a low profile, you know, 21 for the airplane -- or the airport approach. We 22 have got to put some structures in that keep the 23 profile low. We can't have taller structures. And then once again, we have another 24 substation where we have to cut in the lines to the 25

Information and Scoping Meeting - 12-12-23

1 substation that will require two new structures at 2 Chub Lake. And we can see where the green is, that's where we will need some new structures. 3 On the Western Segment -- I forgot to 4 mention -- our construction is expected to start 5 2024 of quarter 2 and the Eastern Segment, our 6 construction is going to start in quarter 2 of 2025. 7 8 I think that's about it. Yeah, okay. Ιf 9 you have any questions or need to contact us, here is some information on how to do that. 10 And with that, I will turn it over to 11 12 Suzanne. MS. SUZANNE STEINHAUER: 13 Thank you. Thanks for coming. My name is Suzanne Steinhauer. 14 15 I'm with the Minnesota Department of Commerce, Energy Environmental Review and Analysis Division. 16 17 The Department of Commerce has a number of 18 responsibilities. Most of those are sort of in that area of consumer protection. We have an insurance 19 20 fraud investigation unit. We do weights and 21 measures. 22 And my unit, Energy Environmental Review 23 Analysis or EERA, serves as technical advisors to the Commission. We provide neutral third-party 24 25 analysis of potential human and environmental

> Shaddix & Associates - Stenographic Court Reporters (952)888-7687 - reporters@janetshaddix.com

impacts on large energy facilities that are seeking 1 2 permit permission from the Commission. We don't advocate for a particular 3 We try to focus on the facts. The goal is 4 outcome. an informed decision by the Public Utilities 5 Commission; and information for anybody who is 6 participating in the project, to advocate for their 7 8 desired outcome. 9 So we talked a little bit that it needs two approvals: A certificate of need and the minor 10 alteration of the existing permit. 11 12 So the difference -- From my perspective, the difference is that the certificate of need 13 requires an environmental report, which is sort of a 14 15 high level look at what are the potential human environmental impacts for the project as proposed; 16 17 and the other is what we call system alternatives, 18 other ways of meeting that need. The minor alteration, we are taking 19 20 comments on that also. That doesn't have a separate 21 environmental review documents but those comments 22 get kind of incorporated into what our 23 recommendations would be and the Commission's decision on any permit conditions. 24 So as I mentioned, the environmental 25

1 report describes the proposed project and system 2 alternatives. It looks at the potential human impacts and identifies strategies to avoid and 3 minimize and mitigate those impacts. 4 So by law, there are certain categories 5 of impacts that we need to look at. We look at 6 impacts to natural resources that are air, soils, 7 geology, vegetation, wildlife, human settlements, 8 aesthetics, noise, socioeconomics, cultural 9 resources, public services, and then land based 10 economics which are agriculture, forestry, mining, 11 12 recreation and tourism. So those are -- that's sort of the 13 background. Those are things we know we are going 14 15 to have to look at. One of the reasons we come out to the 16 17 public for scoping is we want to try to move from 18 the general categories to specific categories: What are the impacts of the particular project in the 19 20 particular place. 21 So we are looking for help identifying 22 particular human and environmental impacts that 23 people may be concerned about that they have local knowledge of, and then how ideas for how the 24 project can avoid, minimize or mitigate those 25

> Shaddix & Associates - Stenographic Court Reporters (952)888-7687 - reporters@janetshaddix.com

1 impacts that may wind their way into specific permit 2 conditions. So with that general background, these 3 are the comments that are most helpful to us: 4 What impacts are you concerned about, strategies to avoid 5 them, minimize or mitigate, other ways to meet the 6 stated need for the project, unique characteristics 7 of the proposed route of the project, items that are 8 mischaracterized or missing from the applications --9 I think there are a couple of applications in the 10 back if people had an opportunity to look at them --11 and other project-related issues or concerns. 12 13 So we are going to open it up in just a minute for comments and questions. I encourage you 14 15 to ask questions tonight. We will try to answer We have a lot of people who know about the 16 them. 17 project and can answer them hopefully. That feeds into what their court will address. 18 19 So this is the last opportunity to take verbal comments. 20 21 We have a court reporter. Jolene is here 22 and she is taking a record of that. 23 You are free to contact me, call me or If you email me, I will keep that comment 24 email me. 25 and that goes in the record. If you call me, I'm

Information and Scoping Meeting - 12-12-23

happy to talk to you but I don't keep a record of 1 2 those conversations. So that in order to get it in the record and make sure the decision makers can see 3 it, that after tonight, it needs to be in writing. 4 There are comment sheets available. 5 You don't have to use that but it has all my contact 6 7 information. So if you wanted to bring some to neighbors, you are certainly welcome to pick one up. 8 9 If you have a comment, you can just drop it in and I will collect them tonight. 10 I do want to make clear we have a written 11 12 comment period that is open until January 3rd. You can have a comment tonight and then if you think of 13 something later, as long as I get them by January 14 15 3rd, they will be part of the record. So I'm going to open it up for comments 16 17 and questions in just a minute. 18 I'm going to go real briefly over sort of 19 the rules of engagement here. 20 One speaker at a time. As Mike 21 mentioned, we have a court reporter. She is keeping 22 an accurate record. We can only hear from one 23 person at a time. Please state and spell your name for the court reporter. Please keep and direct your 24 25 comments and questions to the scope of the ER that

> Shaddix & Associates - Stenographic Court Reporters (952)888-7687 - reporters@janetshaddix.com

1 is useful to us. 2 As I mentioned, we are also here to try 3 to answer questions you have. Please limit your comments, your initial 4 comments, to five minutes. I think it is a small 5 enough group here that we can get to everybody but I 6 just do want to make sure that everybody has an 7 8 opportunity. 9 And then finally, maintain respect for People can have reasonable differences of 10 others. opinion on a particular project. 11 12 I don't think there is anybody who signed up so I'm going to open it for comments and 13 questions and I would ask you to come up and take 14 15 the mic and then just state and spell your name, please. So we will go by show of hands. 16 17 I am opening it up for public comments 18 and questions. Does anybody have any? So comments, questions? Going once. 19 20 Going twice. I do want to respect your time but I 21 want to make sure everybody has an opportunity. So 22 going three times. 23 Thank you for coming out tonight. Τ appreciate it. We are going to close the formal 24 25 part of the meeting but we will be around for a

1	while if	you have	questions	or comments.	Thanks.
2	Bye.
