## **NOTICE OF PUBLIC INFORMATION AND ENVIRONMENTAL IMPACT STATEMENT SCOPING MEETINGS**

Issued: June 24, 2024

### **In the Matter of the Application of Xcel Energy for a Certificate of Need and Route Permit for the Mankato – Mississippi River 345 kV Transmission Line Project in Southeast Minnesota**

**Docket Number:** E002/CN-22-532, E002/TL-23-157

**PLEASE TAKE NOTICE** that the Minnesota Public Utilities Commission (Commission) and Minnesota Department of Commerce will hold public information and Environmental Impact Statement (EIS) scoping meetings on the application of Xcel Energy for a certificate of need and a route permit for the Mankato – Mississippi River Transmission Line Project. The proposed Project is a new approximately 130-mile 345-kilovolt (kV) transmission line between the existing Wilmarth Substation in Mankato to the Mississippi River near Kellogg and a new 20-mile 161 kV transmission line between the existing North Rochester Substation near Pine Island and an existing transmission line northeast of Rochester. The Project may cross portions of Blue Earth, Le Sueur, Waseca, Rice, Dodge, Olmstead, Goodhue, Winona, and Wabasha counties and is divided into the four segments described below (see attached Project Overview Map):

- Segment 1: a new 48- to 54-mile 345-kV transmission line between the Wilmarth Substation and a point near the West Faribault Substation;
- Segment 2: a new 34- to 42-mile 345-kV transmission line from a point near the existing West Faribault Substation to the existing North Rochester Substation;
- Segment 3: conversion of 27 miles of existing 161/345-kV transmission line to 345/345-kV operation and installation of a new 16-mile 345-kV circuit on the existing 345/345-kV double-circuit capable structures between the existing North Rochester Substation and the Mississippi River; and
- Segment 4: a new 19.6-to 23.7-mile 161-kV transmission line between the existing North Rochester Substation and the existing 161-kV Chester Line northeast of Rochester.

For this Project, Xcel Energy proposes a route width of 1,000 feet along most of the proposed alignments (500 feet to either side of proposed centerlines), with wider areas (up to 1.25 miles wide) around Project substations, locations with routing constraints, and where route options come together. The 345 kV portion of this Project typically requires a permanent 150-foot-wide right-of-way. For the 161 kV portions of the Project, a 100-foot-wide right-of-way is typically

required.

Xcel Energy indicated that this Project, along with other Long Range Transmission Projects (LRTP) that were studied and approved by the Midcontinent Independent System Operator, Inc. (MISO) are needed to provide reliable, resilient, and cost-effective delivery of energy as the generation resource mix continues to evolve over the coming years. Specifically, this Project and the other LRTP projects in Wisconsin<sup>1</sup> are needed to address loading and congestion issues on the existing 345 kV transmission system across southern Minnesota and Wisconsin.

The purpose of the meeting is to: (1) provide information about the proposed project and the state's permitting process; and (2) provide an opportunity to participate in developing the scope of the Environmental Impact Statement, including alternative route segments.

---

<sup>1</sup> Tremval - Eau Claire - Jump River and Tremval - Rocky Run - Columbia transmission projects both located in Wisconsin.

For the pre-meeting portion of the event, doors will open one hour prior to each meeting to provide attendees an opportunity to review the application, maps, and other materials for the proposed project and ask questions of state staff and the applicant. ***During this time, comments made by attendees will become a part of the record for Commission consideration only if the attendee submits the comment in writing.*** Forms will be available for this purpose.

During the meeting, state staff and the applicant will both make presentations. State staff will explain the permitting and environmental review processes, and the applicant will provide an overview of the proposed project. Following the presentations, attendees will have the opportunity to offer oral and written comments for the record. The meetings will end when all attendees have had the opportunity to comment and all other business has been concluded, or the scheduled end time of the meeting, whichever occurs first. The information presented will be the same at all in-person and online meetings.

If any reasonable accommodation is needed to enable you to fully participate in these meetings, please contact the Commission at 651-296-0406 or 1-800-657-3782 at least one week in advance of the meeting. To find out if a meeting is canceled due to bad weather or other call 1-855-731-6208 or visit [mn.gov/puc](https://mn.gov/puc).

### **Comment Period**

Written comments will be accepted through **August 1, by 4:30 p.m.** Please include the docket number in all communications. Comments received after the close of the comment period may or may not be considered by the Commission.

### **Topics for Comment**

- Are there other ways to meet the stated need for the project, for example, a different size project or a different type of facility?
- What potential human and environmental impacts of the proposed project should be considered in the EIS?
- Are there any methods to minimize, mitigate, or avoid potential impacts of the proposed project that should be considered in the EIS?
- Are there any alternative routes or route segments that should be considered in the EIS to address or mitigate potential impacts associated with the proposed project?
- Are there any unique characteristics of the proposed project area that should be considered in the EIS?
