Dear Ms. Kahlert:

The North American Water Office is requesting that the PUC hold a public hearing on the "Proposed Permanent Rules Relating to Power Plants and Lines; Revising the Certificate of Need and Site and Route Permits Requirements." NAWO opposes the proposed rule in its entirety. Why does the PUC insist on preserving and protecting market share for large energy corporations regardless of massive costs and adverse consequences to public interests?

Shame on you.

Sincerely,

George Crocker | Executive Director | North American Water Office
