I am voicing my concerns about the proposed Solar Farm in Summit Lake Township. I live in section 10 and I only own the acreage. Mike Harberts owns the farmland around my property. My husband was born and raised in this area and farmed all his life, he died at the age of 60 in a tragic farming accident. Due to his death many changes have been made in my life. My daughter and son in law relocated, and my son in law is now farming. They wanted to build a house on my acreage and we were told NO. Nobles County is a preservation County for farmland.. So now we are allowing 1900 acres of mostly excellent farmland to be turned into a solar farm...Does not make any sense. There will be a solar farm and a fence around my acreage and I would like to know what this will do to the value of my acreage and do I get any compensation for when I sell and I do not get what the asking price is..... My husband would be devastated that this is happening. It always comes down to the almighty dollar.

Why have any local government when they do not have a say in this project. Shame on all involved. This solar farm should be put on farmland that is not productive and not around people's homes. I have no say on this and it is like beating my head against the wall... I hope and pray that this Solar Farm project is rejected....
