Re: Public Utilities Large Wind Energy Conversion System Site Permit, IP-6851/WS-10-1238
for the Big Blue Wind Farm, LLC Project in Faribault County
Annual Compliance Review, Reply by September 9, 2013

Dear Mr. Plagge:

The Energy Facility Permitting (EFP) staff of the Department of Commerce recently completed a review of the LWECs site permit requirements for the Big Blue Wind Farm, LLC project and compared the requirements to filings on the Minnesota Public Utilities Commission (Commission) and Department of Commerce E-Dockets system and documents in the Department of Commerce files. We are implementing a new compliance tracking system for these permits.

Please contact Larry Hartman, who was the Department of Commerce Energy Facility Permitting state permit manager, at 651-539-1839 or larry.hartman@state.mn.us, at your earliest convenience to discuss the project status, as needed.

Compliance submittals (filings) were identified in this review for nearly all of the LWECs site permit conditions and we thank those who have been involved in the project for attention to permit compliance.

We did not identify monthly complaint reports in the project e-Docket for the time period of construction, although a monthly complaint report has been e-filed covering each month since December 2012, shortly after the new project ownership informed the Commission of that change. Also in reviewing Department of Commerce files, we identified a later version and supplemental information for the Avian and Bat Protection Plan which are discussed below. We are also requesting a filing of documentation regarding the final permit mailing to local residents.

Response Requested by September 9, 2013.

- 1. Notice to Local Residents and Complaint Procedures.** We did not identify documentation that a copy of the final (not draft) permit had been mailed to the units of government listed in the permit and to local residents. If this was done as required, shortly after the approval of the LWECs permit in August 2011, **we request an e-filing of the cover letter, list of recipients and affidavit of the**

mailing of the final site permit. If the mailing was not done, please complete this requirement with an explanation to recipients and e-file the documentation.

We request an e-filing of the current complaint procedures that the new owner will use to receive and respond to complaints.

Also, because the complaint attachment 2 to the permit contains contact information for the prior owner, we request that a copy of the current Permittee's complaint procedures and current contact information be included in a mailing of the final permit, if the mailing of the permit had not been previously done in 2011.

Permit condition 5.2., Notice to Local Residents, states:

“Within ten (10) working days of approval of this Permit, the Permittee shall send a printed copy of the permit to the office of the auditor of each county in which the site is located and to the clerk of each city and township within the site boundaries. If applicable, the Permittee shall also, within ten (10) working days of permit approval, send a printed copy of this permit to each regional development commission, local fire district, soil and water conservation district, watershed district, and watershed management district office with jurisdiction in the county where the site is located. Within 30 days of approval of this Permit, the Permittee shall send a printed copy of the permit to each landowner within the Project boundary. In no case shall the affected landowner receive this site permit and complaint procedure, developed pursuant to Section 5.8, less than five (5) days prior to the start of construction on their property.”

Permit condition 5.8., Complaints, states:

“At least ten (10) working days prior to the pre-construction meeting, the Permittee shall submit to the Commission the company's procedures to be used to receive and respond to complaints. The Permittee shall report to the Commission all complaints received concerning any part of the Project in accordance with the procedures provided in Attachments 2 and 3 of this permit.”

2. Monthly Complaint Reports.

Complaint reports have been filed regularly each month since the new ownership. We did not identify complaint filings for the period of the project construction. **We request that a summary of complaints received from the start of construction through November 2012 be e-filed in the project e-Docket.**

Attachment 2 to the permit, paragraph F., Monthly Reports, states, in part:

“By the 15th of each month, a summary of all complaints, including substantial complaints received or resolved during the preceding month, shall be eFiled to Dr. Burl W. Haar, Executive Secretary, PUC using the Minnesota Department of Commerce eDocket system....If no Complaints were received during the preceding month, the permittee shall submit (eFile) a summary indicating that no complaints were received.”

3. Avian and Bat Protection Plan.

The following were approved in the Commission order dated October 27, 2011:

- October 5, 2011, filing of the Avian and Bat Protection Plan (ABPP) required by the LWECS permit, as amended by
- the October 20, 2011, Supplemental Filing for the ABPP Construction Monitoring Plan, and
- the recommended additions of the U.S. Fish and Wildlife Service, in a letter dated October 19, 2011.

Revised ABPP. It appears that a subsequent revision to the ABPP, found in Department of Commerce files and dated January 3, 2012, incorporates the U.S. Fish and Wildlife Service recommendations. **For clarification, please briefly summarize the revisions to this later version of the document and e-file that information along with an e-filing of the January 3, 2012, ABPP.**

Post-construction protocol. Also in Department of Commerce files, we identified a post-construction protocol for avian and bat studies dated April 11, 2013, and revised May 9, 2013. This document states that it “serves as the Post Construction Avian and Bat Study Protocol for the Big Blue Wind Farm ... The purpose of the proposed protocol is to satisfy the requirements of the Site Permit and associated Avian and Bat Protection Plan.”

This protocol includes post-construction eagle nest and use survey procedures but it was not clear that a third-party monitor would conduct the first two years of monitoring, as indicated in the approved October 5, 2011, ABPP and in the January 3, 2012, revised ABPP, which state: “Eagle nest and use monitoring will occur for two years post construction utilizing third party contractor biologists...After the two years of nest surveys and monitoring, operations personnel will continue to survey for bald eagle nests for the life of the permit.”

Please e-file in response:

- **the May 9, 2013, post-construction avian and bat study protocol;**
- **a clarification regarding whether a third-party monitor has been or will be conducting this monitoring, and**
- **if not, an explanation for any change from the approved ABPP.**

Wildlife Baseline Report. An interim wildlife baseline report was included in the October 2011 approved ABPP and in its January 3, 2012, revision. A final version of this wildlife baseline report dated October 9, 2012, was found in Department of Commerce files. The comments and recommendations attached to the October 27, 2011, Commission order state that the final report would be provided at a later date. **We request that the Permittee e-file the “Wildlife Baseline Studies for the Big Blue Wind Energy Project, Faribault County, Minnesota, Final Report November 2010 – November 2011.”**

Permit condition 6.1., Biological and Natural Resource Inventories, states:

“The Permittee, in consultation with the Commission and DNR, shall design and conduct pre-construction desktop and field inventories to ... assess the presence of state threatened, endangered, or species of special concern or federally listed species... The Permittee shall provide to the Commission any biological surveys or studies conducted on this Project, including those not required under this permit.”

4. **Noise Study Protocol under review.** We have attached a table that summarizes the permit conditions and related filings in the e-Docket system for each. Note that the e-filed noise study protocol for the project is under review. Comments on that protocol will be provided separately.

Please e-file your reply to this letter including the various requested compliance filings by September 9, 2013, on the Public Utilities Commission and Department of Commerce E-Dockets system at:

<https://www.edockets.state.mn.us/EFiling/security/login.do?method=showLogin>
