RE: In the Matter of the Petition of CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Minnesota Gas, for Approval of an Affiliated Interest Agreement Between CenterPoint Energy Minnesota Gas and Minnesota Limited

Supplemental Comments

Docket No. G-008/AI-18-517

Dear Mr. Wolf:

CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Minnesota Gas ("Company") respectfully submits these Comments in response to the Comments filed by the Department of Commerce ("Department") in this docket.

CenterPoint Energy Minnesota Gas has designated certain information in this filing as TRADE SECRET. The identified trade secret information meets the definition of trade secret information in Minn. Stat. §13.37 subd.1(b) as follows:

- 1) the information was supplied by CenterPoint Energy Minnesota Gas, the affected organization;
- 2) CenterPoint Energy Minnesota Gas has taken all reasonable efforts to maintain the secrecy of the information, including protecting it from disclosure in this proceeding; and
- 3) the protected information contains contractual details that have not been previously released to the public which derive independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use.

The Company appreciates the Department's thorough review of the 2018 Construction Contract between the Company and Minnesota Limited and its conclusion that the Company's "selection of Minnesota Limited as its construction contractor for the initial scope of work included in the request for proposal ("RFP") was reasonable and that the actual costs incurred for that work were reasonable." *Department Comments*, p. 3. The Department raises a number of concerns, however, with the costs incurred under the additional scope of work assigned to Minnesota Limited at the end of the 2018 construction season. The Company addresses the Department's concerns below. To support the discussion the Company provides the following information in Exhibits:

- Exhibit A: Engineering estimates for the 3,300-foot beltline segment and each of the three large-diameter distribution work projects;

- Exhibit B: Per unit pricing and actual costs incurred for the 3,300 foot beltline segment;¹
- Exhibit C: Per unit pricing and actual costs incurred for the three large-diameter distribution projects;
- Exhibit D: Per unit pricing and actual costs incurred for the pipeline integrity digs;
- Exhibit E: Additional detail about the component prices for Change Orders prepared for the large diameter distribution projects;
- Exhibit F: Additional detail about costs approved on-site; and
- Exhibit G: Contract Change Orders.

In exhibits B, C, D, E, and F, the Company has identified per line item each expense priced according to the original contract and identified the page in the original contract where the pricing is specified.

A. Comparison of Actual Costs with Engineering Estimates Demonstrates that the Expenses were Reasonable.

The Department has concluded that the Company's selection of Minnesota Limited for the initial scope of work included in the RFP was reasonable, and that the actual costs incurred for that work were reasonable. The Department concluded that the actual costs to complete the initial scope of work were reasonable because the costs were quite close to the initial estimate the Company developed in the evaluation process. *Department Comments*, p. 3. In contrast, the Department was not able to tie the Company's cost estimates to the additional scope of work to the pricing terms set forth in the initial contract and stated that it was therefore unable to conclude that the Company's cost estimates were reasonable. To facilitate the Department's analysis the Company provides additional detail regarding the cost estimates for the additional scope of work and the sources for pricing for the actual costs incurred.

As shown in Table 1 of the Company's April 3, 2019, Reply Comments in this docket, the additional work completed in the fall of 2018 can be segmented in three categories: (1) the 3,300-foot beltline segment (24-inch steel); (2) large-diameter distribution work; and (3) 27 pipeline integrity digs. The second category – large-diameter distribution work – can be further divided into three projects: 10th Avenue Bridge, Bluff Street, and River Street.

Before the supplemental scope was assigned to Minnesota Limited, the Company completed detailed engineering estimates for the beltline segment and the three large-diameter distribution work projects. The estimates are included as Exhibit A to this filing. Our engineers developed each estimate based on the per-unit pricing included in the original 2018 contract. Detailed engineering estimates were not completed for each of the 27 pipeline integrity digs; instead, the Company estimated costs based on the average cost included in the Company's last rate case.

¹ Several exhibits reference original contract page numbers. CenterPoint Energy's 2018 contract with Minnesota Limited was filed in the Company's initial July 30, 2018 Petition in this docket. Original contract page numbers in the exhibits are references to the page of that filing.

The table below compares the engineering estimates for the 3,300-foot beltline segment and the large-diameter distribution projects.²

Table 1: Estimated and Actual Pricing for the 3,300-Foot Beltline Segment and Large-Diameter Distribution Projects

	3,300-Foot Segment	10 th Avenue Bridge	Bluff Street	River Street
	[Trade secret information begins...			
Labor Charges				
Construction Overhead				
Contingency % ³				
Total Estimated Cost ⁴				
Estimated Cost Plus Contingency				
Actual Cost Paid to Minnesota Limited				

As shown above, actual costs are generally in line with engineering estimates, except for the 10th Avenue Bridge project. In that case, the soil was poorer quality than anticipated, requiring more backfill, sand padding, and gravel to restore the area. This high cost is unrelated to the contractor selected.

² Note that the engineering estimates show in Exhibit A include other project costs not associated with Minnesota Limited. For ease of comparison, this table identifies only the costs associated with Minnesota Limited and applies the contingency percentage to those costs in isolation.

³ The contingency percentage is selected based on engineering judgment. In general, an engineer is more likely to pick a higher contingency percentage if they anticipate the work to be unusually difficult or there is a high level of uncertainty about final costs.

⁴ Engineering estimates may be refined as a project progresses. The estimates shown in the table above were developed at a later stage than the estimates shown in the Company's April 3, 2019 Reply Comments and are slightly different.

While, as discussed below in section C, it would not have been possible to test the cost of these additional projects through an RFP, the fact that the actual costs line up with those Company engineering estimates provides evidence of the reasonableness of those costs. As discussed immediately below, the Company believes that a review of the actual expenses also demonstrates the reasonableness of costs incurred.

B. The Actual Costs Incurred Were Reasonably Priced.

All of the project components for the additional scope of work performed by Minnesota Limited were priced using one of three sources: (1) the 2018 Minnesota Limited contract; (2) contract Change Orders (which largely used the 2018 Minnesota Limited component pricing as discussed in Section B1 below); and (3) actual costs of additional work approved on site. Exhibits B, C, and D set forth the pricing components for each of the supplemental projects. The tables below compare the proportions of actual spend that were priced according to the original contract, according to a Change Order, but using original contract pricing, according to a Change Order not using original contract pricing, or approved on site.

Table 2: Source of Pricing for Actual Spend on Additional Work (Dollars)

	Original Contract	Additional Pricing from Change Orders	Approved on Site	Total
	[Trade secret information begins...]			
3,300-foot Beltline Segment Subtotal				
<i>3,300-foot Beltline Segment - Non-Change Order, original contract pricing</i>				
<i>3,300-foot Beltline Segment - Change Order 3, original contract pricing</i>				
<i>3,300-foot Beltline Segment - Change Order 3, additional pricing</i>				
<i>3,300-foot Beltline Segment - Change Order 1</i>				
<i>3,300-foot Beltline Segment - Approved on Site</i>				
Large-Diameter Distribution Work Subtotal				
<i>Large Diameter - Non-Change Order, original contract pricing</i>				
<i>Large Diameter - Change Orders 4, 7 and 8</i>				
<i>Large Diameter - Change Order 1</i>				
<i>Large Diameter - Approved on Site</i>				
Pipeline Integrity Digs Subtotal				
<i>Pipeline Integrity - Non-Change Order, original contract pricing</i>				
<i>Pipeline Integrity - Approved on Site</i>				
Total Additional Work				
	...Trade secret information ends]			

Table 3: Source of Pricing for Actual Spend on Additional Work (Percent)

	Original Contract	Additional Pricing from Change Orders	Approved on Site
3,300-foot Beltline Segment	94%	6%	1%
Large-Diameter Distribution Work	91%	0%	9%
Pipeline Integrity Digs	81%	0%	19%
Total Additional Work	89%	3%	8%

As can be seen in the tables above, approximately eighty-nine percent of the additional work was priced in accordance with component pricing established in the original contract. The Company discusses below how each component of pricing for additional work was reasonable and justified.

1. Pricing Established by the Change Orders was Reasonable and Justified

Five Change Orders⁵ established additional pricing for the large-diameter distribution work. The Change Orders are set out in the table below, along with the source of the component prices used. The Change Orders themselves are provided in Exhibit G.

Table 4: Change Order Description

Change Order	Description and Component Price	Source of Pricing	Actual Expenses Priced per Change Order [Trade secret information begins...
18-01	Set a price per square foot for the grading of hard and soft surface areas at [Trade secret information begins... [REDACTED] ...Trade secret information ends] per square yard; Component was inadvertently omitted from the 2018 Minnesota Limited Contract	2017 Minnesota Limited contract	[REDACTED]

⁵ Contract Change Orders 2, 5, and 6 were held for amendments that were not required and those orders were not used.

18-03	Set a price for trenched 24-inch steel main in urban areas at [Trade secret information begins... [REDACTED] per foot;...Trade secret information ends]	Trenched 24-inch steel main in suburban areas was priced under the 2018 contract at [Trade secret information begins... [REDACTED]... Trade secret information ends] per foot; [Trade secret information begins... [REDACTED]...Trade secret information ends] adder was based on recent prices for similar work	[REDACTED]
18-04	Fixed price of [Trade secret information begins... [REDACTED]...Trade secret information ends] for work to be performed for 10 th Avenue Bridge, including, for example, weld fittings and stopper lines	2018 Minnesota Limited Contract	[REDACTED]
18-07	Fixed price of [Trade secret information begins... [REDACTED]...Trade secret information ends] for work to be performed for River Street project, including, for example, for fabrication on new valve settings	2018 Minnesota Limited Contract	[REDACTED]
18-08	Fixed price of [Trade secret information begins... [REDACTED]...Trade secret information ends] for work to be performed for Bluff Street project, including, for example, fabrication of regulator runs	2018 Minnesota Limited Contract	[REDACTED]...Trade secret information ends]

Change Order 1: Set a price per square foot for the grading of hard and soft surface areas. The price was set as by reference to the Company's 2017 contract with Minnesota Limited.

Change Order 3: Set a price for trenched 24-inch steel main per foot and a price per foot of directional bore under Highway 94 in Minneapolis.⁶ The Change Order increased the price per 24-inch steel mains by **[Trade secret information begins... Trade secret information ends]** per lineal foot for certain work orders: the original contract price was competitively bid assuming construction in suburban areas, and the work orders affected by Change Order 3 were more urban areas that are more expensive to work in due to congestion, narrower streets, and more underground obstructions. The price established for horizontal boring under Highway 94 was based on recent historical prices for similar work.

Change Orders 4, 7, and 8: Established fixed prices for certain work associated with the 10th Avenue Bridge, River Street, and Bluff Street projects, respectively. CenterPoint Energy's engineers requested that Minnesota Limited provide a fixed price for the work, based on component prices in the 2018 Minnesota Limited contract. After determining that Minnesota Limited's fixed price was reasonable, and developing the engineering estimates for each project, the Company agreed to the fixed price in each Change Order. CenterPoint Energy's engineering estimates for each of these projects are included in Exhibit A. Details on the agreed upon Change Order prices, including per unit counts of materials used, are included in Exhibit E.

Whenever possible, the Company used component pricing established in the original contract. Pricing established in Change Orders also references back to the original contract or is reasonably derived from another source and is therefore reasonable and justified.

2. Additional Expenses Approved by Inspectors On-Site are Reasonable and Justified

The Company's engineers complete design and cost estimates for each project before it is awarded to a contractor. Though the engineers endeavor to predict every major component that will be required to complete the project, some work is not known until implementation in the field and it is not possible for the Company to anticipate every expense that might be necessary before work begins. In addition, CenterPoint Energy had originally anticipated that another contractor would complete restoration work for the pipeline integrity digs, but that contractor was fully engaged with other Company work at the time of the pipeline integrity digs. Therefore, some costs incurred (8% of the additional scope) were not included in the original scope of the 2018 contract or a Change Order. Examples of expenses that were not included in the 2018 Minnesota Limited contract include security officers, temporary fencing, crushed rock, grass seed, and plants needed to restore landscaping in accordance with environmental best management practices, and gravel used to restore concrete and blacktop. On-site Company inspectors verify all costs before they are authorized. Exhibit F includes details about each of the costs approved on-site to complete the additional work in the fall of 2018.

Examples of expenses shown in the additional detail include:

⁶ The Change Order also reiterated a price per offset weld which is the same as the original contract price.

- Pipe coating supplies: blasting sand, coating materials (2 part epoxy), pipe outerwrap;
- Safety fencing;
- Backfill concrete;
- Portable restrooms
- Dirt, grass seed and fertilizer to restore certain boulevard areas;
- Disposal of materials in compliance with environmental regulations;
- Best Management Practices (BMPs) to support erosion control per environmental regulations;
- Excavation shoring equipment to ensure work safety and compliance with OSHA regulations;
- Road way restoration, asphalt paving, after PI dig was completed;
- Excavation site dewatering; and
- Chiseling Tools to remove coating from excavated pipe.

3. The Costs Incurred to Complete the 27 Pipeline Integrity Digs Were Reasonable

The Department noted that the actual costs for some of the additional work exceeded the initial estimates. In particular, the Department questioned how the Company arrived at its **[Trade secret information begins...\$46,000...Trade secret information ends]** cost estimate per pipeline integrity dig and why the actual costs for pipeline integrity digs exceeded that estimate. (Department at 7-8).

The Company uses an average cost of **[Trade secret information begins... ██████████ ...Trade secret information ends]** per dig site which is based upon the average cost estimate included in the Company's latest rate case.⁷ However, the average cost of a dig in this particular area was **[Trade secret information begins... ██████████ ...Trade secret information ends]** due to the unique conditions of the dig sites. All of the 27 pipeline integrity digs were near each other along one line in the cities of Fridley and Coon Rapids. Abnormal conditions, such as a high water table, were found at several of the pipeline integrity digs and the extent of inspection activity leading to remedial action resulted in the additional costs. This cost increase was not related to the contractor selected, but instead a result of longer excavations and pipeline cut outs or weld sleeves necessary to mitigate identified pipeline anomalies. Because cut outs were necessary for some of the digs, the Company was required to provide bypasses to keep gas flowing. Examples of additional expenses necessitated by the high water table include additional pipe coating supplies such as blasting sand, epoxy, and pipe wrap, as well as additional safety fencing, backfill concrete, and landscape restoration materials.

⁷ This figure can be calculated from the information in Witness Tal Centers Workpaper 2 from the Company's 2017 rate case. Docket No. G-008/GR-17-285. Pages 18, 24, and 25 each include estimated costs for certain PI digs. On page 18, 17 digs are estimated to cost a total of **[Trade secret information begins... ██████████ ...Trade secret information ends]**. On page 24, 4 digs are estimated to cost a total of **[Trade secret information begins... ██████████ ...Trade secret information ends]**. On page 25, one dig is estimated to cost **[Trade secret information begins... ██████████ ...Trade secret information ends]**. Combining these estimates, the average cost per dig is approximately **[Trade secret information begins... ██████████ ...Trade secret information ends]**.

Each of the 27 digs were completed as a result of an inspection of pipeline in the Fridley/Coon Rapids area. When the Company finds an anomaly during an integrity assessment, it complies with 40 C.F.R. § 192.933 to remedy the situation. In some cases, CenterPoint Energy must repair anomalies within five days of detection. 17 of the 27 pipeline anomalies identified in the Fridley/Coon Rapids area required repair within five days. The other ten anomalies could have been repaired later in compliance with the federal rule, but since they were in the vicinity it was more cost effective and efficient to repair them at the same time as anomalies that required immediate repair. Because of the need for immediate repair, it was most reasonable for the Company to employ Minnesota Limited to complete repairs. Other resources were not available at the time the repairs were completed and Minnesota Limited's 2018 contract included pricing for the majority of the work.

A description of each expense, including component pricing, for the pipeline integrity digs is included in Exhibit D. As shown in table 1 and Exhibit D, 81% of the costs associated with the pipeline integrity digs were determined based on per unit pricing in the original contract. Exhibit F describes each expense not priced in the original contract, each of which was approved by a Company inspector on site, and includes component pricing. The cost detail shows the approved items that impacted the cost of each pipeline integrity dig as well as the amount of time and equipment ("T&E") required to complete each dig.

C. It Was Reasonable for the Company to Use Minnesota Limited Rather than Another Bidder to Complete Additional Work at the End of the 2018 Construction Season

The Department suggests that some of the subprojects that were assigned to Minnesota Limited should have been given to another bidder because that bidder quoted lower costs for certain units that were necessary to complete that subproject work. For example, based on some of the bid information provided in the original RFP process, the Department speculates that a different bidder could have completed the subproject for a lower cost than Minnesota Limited. The Company disagrees with the Department's speculation for two reasons that are important to the Company's overall beltline contracting process.

First, the comparison to the other bidder's pricing is irrelevant because, at the time the additional scope was assigned to Minnesota Limited toward the end of the 2018 construction season, the other bidder was not available to complete the work. The other contractor was completely engaged on other construction work for the Company, and it did not have any crews available to complete additional work. The fact that other contractors were not available is not surprising – at the beginning of each construction season contractors typically attempt to secure enough work to be able to maximize the use of their construction season and plan for complete employment through the entirety of the season. The Department's observation that another contractor offered, at the beginning of the construction season, to complete some of the work for a lower cost is not relevant because, at the time the additional scope was assigned to Minnesota Limited, the other contractor was not available to complete any of the work.

Secondly, it has been the Company's consistent practice each year to bid the beltline and some large-diameter pipeline work as a whole for the entirety of the construction season. While the Company's selection of a contractor is necessarily based on expected beltline and large

diameter pipeline work, the Company strives to maximize the available construction season time by having the winning bidder complete additional work at the end of the season if time allows. Once a bidder is initially selected the Company negotiates the final contract, and, once that final contract is entered into, the Company cannot use prices that were included in other bidders' contracts. The final contract with the winning bidder will contain some terms with higher prices than losing bids, and some terms with lower prices, but the contract as a whole is reasonable, even if other bidders offered particular terms lower than the winning bidder.

D. The Company Agrees to Provide Reports Regarding the Actual Costs and Scope of Work Assigned to Minnesota Limited under the 2019 Construction Contract

Finally, the Company agrees that the analysis and review of this 2018 AIA with Minnesota Limited took an unconventional path and much of the review was focused on the transaction by which the Company became affiliated with Minnesota Limited.⁸ The Company appreciates the review of the costs incurred under the contract and believes such review is most efficient if it is done in conjunction with the review of the contract as a whole. The Company has contracted with Minnesota Limited for the beltline and other large diameter pipeline work scheduled for this 2019 construction season. The Company submitted that contract for Commission approval in Docket No. G-008/AI-19-292 on April 29, 2019. To assist the Department in its review of that affiliated interest contract the Company proposes an annual report including:

- 1) A description of any changes in the affiliated interest relationship with Minnesota Limited;
- 2) A spreadsheet of ongoing individual component products and services purchased from Minnesota Limited in the prior calendar year;
- 3) A complete explanation of any increase in the overall payment amounts from the prior calendar year of more than three percent; and
- 4) Copies and summaries of all proposals to provide services when Minnesota Limited is a bidder.⁹

E. Conclusion

Because the Company's reasons for assigning additional work to Minnesota Limited at the end of the construction season, and the Company's methods for determining pricing for that additional work are reasonable, the Commission should find that the costs of the additional work were reasonable and this issue need not remain open until the Company's next general rate filing. The expenses are largely in line with engineering estimates and/or priced according to the terms of the original contract, which the Department has concluded to be reasonable.

The Company respectfully requests that the Commission approve the Contract, as recommended by the Department.

⁸ As discussed in prior comments, the Company filed the petition in this docket recognizing that it was possible that Minnesota Limited would become an affiliate during the term of the Contract between the Company and Minnesota Limited, and the Company and Minnesota Limited became affiliates on the final day of the term of the Contract, after completion of all work performed pursuant to that Contract.

⁹ See *In the Matter of the Petition of Otter Tail Power Company for Approval of Continuing Business with Nalco Water, an Affiliated Interest of Otter Tail Power Company*, Docket No. E-017/AI-17-682, Order Approving Affiliated Interest Arrangement and Requiring Reporting (Apr. 24, 2018).

Exhibit B

CenterPoint Energy Minnesota Gas has designated certain information as TRADE SECRET. The identified trade secret information meets the definition of trade secret information in Minn. Stat. §13.37 subd.1(b) as follows:

- 1) the information was supplied by CenterPoint Energy Minnesota Gas, the affected organization;
- 2) CenterPoint Energy Minnesota Gas has taken all reasonable efforts to maintain the secrecy of the information, including protecting it from disclosure in this proceeding; and
- 3) the protected information contains contractual details that have not been previously released to the public which derive independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use.

Exhibit E

CenterPoint Energy Minnesota Gas has designated certain information as TRADE SECRET. The identified trade secret information meets the definition of trade secret information in Minn. Stat. §13.37 subd.1(b) as follows:

- 1) the information was supplied by CenterPoint Energy Minnesota Gas, the affected organization;
- 2) CenterPoint Energy Minnesota Gas has taken all reasonable efforts to maintain the secrecy of the information, including protecting it from disclosure in this proceeding; and
- 3) the protected information contains contractual details that have not been previously released to the public which derive independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use.

Exhibit F

CenterPoint Energy Minnesota Gas has designated certain information as TRADE SECRET. The identified trade secret information meets the definition of trade secret information in Minn. Stat. §13.37 subd.1(b) as follows:

- 1) the information was supplied by CenterPoint Energy Minnesota Gas, the affected organization;
- 2) CenterPoint Energy Minnesota Gas has taken all reasonable efforts to maintain the secrecy of the information, including protecting it from disclosure in this proceeding; and
- 3) the protected information contains contractual details that have not been previously released to the public which derive independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use.

Exhibit G

CenterPoint Energy Minnesota Gas has designated certain information as TRADE SECRET. The identified trade secret information meets the definition of trade secret information in Minn. Stat. §13.37 subd.1(b) as follows:

- 1) the information was supplied by CenterPoint Energy Minnesota Gas, the affected organization;
- 2) CenterPoint Energy Minnesota Gas has taken all reasonable efforts to maintain the secrecy of the information, including protecting it from disclosure in this proceeding; and
- 3) the protected information contains contractual details that have not been previously released to the public which derive independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by other persons who can obtain economic value from its disclosure or use.

The public and non-public contents are so intertwined and interspersed throughout as to make the entire contract non-public.

In accordance with Minn. Rule 7829.0500, Subp. 3, CenterPoint Energy furnishes the following description of the document:

- **Nature of the Material:** pdf document showing text of contract change orders between CenterPoint Energy and Minnesota Limited
- **Author:** CenterPoint Energy
- **General Import:** Document shows the content of the change orders to the Minnesota Limited contract at issue
- **Date the Document was Prepared:** Change Order 1 was prepared on June 4, 2018, Change Order 3 was prepared on September 26, 2018, Change Order 4 was prepared October 15, 2018, Change Order 7 was prepared on November 1, 2018, and Change Order 8 was prepared on November 8, 2018
