**VIA ELECTRONIC FILING**

Mr. Will Seuffert  
Executive Secretary  
Minnesota Public Utilities Commission  
121 Seventh Place East, Suite 350  
Saint Paul, MN 55101-2147

The Honorable Barbara J. Case  
Office of Administrative Hearings  
600 North Robert Street  
P.O. Box 64620  
Saint Paul, MN 55164-0620

**Re: In the Matter of the Applications of Byron Solar, LLC, for a Certificate of Need, Site Permit, and Route Permit for the up to 200 MW Byron Solar Project and 345 kV Transmission Line in Olmsted and Dodge Counties, Minnesota**

**MPUC Docket Nos. IP-7041/GS-20-763, IP-7041/CN-20-764, and IP-7041/TL-20-765  
OAH Docket No. 82-2500-38038**

Dear Mr. Seuffert and Judge Case:

Byron Solar, LLC (“Byron Solar”) submits these comments in response to the oral public comments made at the in-person and virtual public hearings held on November 9 and 10, 2022, respectively, on Byron Solar’s proposed up to 200 megawatt (“MW”) photovoltaic solar energy generating facility and associated systems (“Solar Facility”) and 345 kilovolt (“kV”) high voltage transmission line and associated facilities (“Transmission Line”) in Olmsted and Dodge Counties, Minnesota (the “Project”). Byron Solar will respond to written comments submitted during the comment period ending November 29, 2022 through a separate filing by December 9, 2022 in accordance with the schedule established for these proceedings.

**I. Response to Comments Regarding Blue vs Red Routes.**

Several public comments focused on Byron Solar’s proposed route (the “Blue Route”) and the alternative route (the “Red Route”). A few commenters suggested that economic reasons were the primary factors weighing in favor of the Blue Route over the Red Route, but Byron Solar notes that the record demonstrates the numerous non-economic reasons why the Blue Route is superior to the Red Route. For example:

- The Red Route would require construction of more infrastructure, resulting in increased environmental and human impacts – namely, the Red Route would be approximately 4.5 miles long (as compared to the Blue Route’s three-mile length) and the associated

alternative substation location would require over three miles of additional collection line length.<sup>1</sup>

- The Red Route would require more tree clearing. By contrast, the Blue Route is designed to avoid tree clearing to the greatest extent practicable, and the corridor does not contain significant trees, shrubs, or other vegetation that will be impacted during construction.<sup>2</sup>
- The Red Route crosses more wetland areas (4.7 acres), while the Blue Route only crosses approximately 0.7 wetland acres.<sup>3</sup>
- The Red Route could result in increased geologic and groundwater impacts. Due to the Red Route's proximity to identified active karst features, construction of the alternate substation location and transmission structures in the southern-most area of the Red Route has an increased potential for groundwater contamination.<sup>4</sup>
- The Red Route is located closer to the nearest residence (250 feet).<sup>5</sup>

Additionally, the Blue Route was voluntarily negotiated with landowners, and Byron Solar has secured 100 percent of the total necessary private easements from landowners for the 52.7 acres of right-of-way required for the Blue Route. By contrast, Byron Solar does not have land rights to construct the Red Route, and it is not guaranteed that Byron Solar would be able to secure the additional leases. In fact, based on conversations with landowners along the Red Route, it seems unlikely that Byron Solar could obtain voluntary land rights necessary to construct along the Red Route.

In developing the Blue Route, Byron Solar undertook to analyze a number of human and environmental factors to identify a route that best meets the Commission's routing criteria, including following existing rights-of-way for approximately 35 percent of its length.<sup>6</sup> The Blue Route is also designed to avoid or minimize impacts on residences, the environment, and other sensitive resources. Further, the Blue Route takes into consideration comments and requests from individual landowners. No adverse comments from landowners along the Blue Route have been received.

Overall, the Red Route (and associated alternative substation location) presents no specific benefits as compared to the Blue Route and would result in greater human and environmental impacts.

---

<sup>1</sup> See Ex. 212 at 4 and Appendix E (Responses to Data Requests) (Environmental Assessment ("EA")).

<sup>2</sup> See Ex. 212 at 88, 93 (EA) and Ex. 108 at 116 (Joint SP/RP Application).

<sup>3</sup> Ex. 212 at 91 (EA).

<sup>4</sup> Ex. 212 at 83 (EA).

<sup>5</sup> Ex. 212 at 48 (EA).

<sup>6</sup> See Ex. 212 at 26, 29 (EA).

## **II. Response to Comments Regarding Dodge County Performance Standards.**

Comments were made during the public hearings regarding the Dodge County Ordinance performance standards for solar energy farms (40 kW or greater) and transmission lines, which are authorized as conditional uses under the Ordinance. However, the Dodge County Ordinance applies to solar energy systems and transmission lines that are not otherwise subject to siting and oversight by the Commission under the Power Plant Siting Act (Minnesota Statute Ch. 216E). Pursuant to Minnesota Statute § 216E.10, subdivision 1, the site permit and route permit issued by the Commission are the only site approvals required for construction of the Solar Facility and Transmission Line. While the Commission will take local land use into consideration as part of its application review, the site or route permit issued by the Commission supersedes and preempts all zoning requirements or land use rules at the county and local level.

Although the Ordinance does not apply because the Project requires a route permit and site permit from the Commission, which supersedes and preempts all zoning ordinances authorized by the County, there are also numerous reasons why application of performance standards designed for much smaller solar systems are not feasible or practical to apply to a utility-scale project. As shown in the attached Table 1, Byron Solar has considered the Dodge County setbacks when designing the Project and has committed to meeting the County's setbacks where feasible.

## **III. Response to Comments Regarding Fence.**

At the public hearings, members of the public raised questions regarding the location of the Project fence in relation to property lines. Byron Solar responded that the fence will not be located on property lines – rather, it will be wholly located on the participating parcel and will be set back from the property line.

At the virtual public hearing, John Wagner, who owns land adjacent to the Solar Facility, raised questions regarding the location of the Project fence and stormwater pond in relation to his property line. Byron Solar responded during the hearing that the fence would be set back from Mr. Wagner's property line, and the fence and stormwater pond would be wholly located on land under lease for the Project. Byron Solar also followed up with Mr. Wagner after the public hearing and answered his questions regarding facility placement. As noted during the public hearings, Byron Solar will continue to coordinate with landowners.

## **IV. Response to Comments Regarding Coordination With Local Officials.**

County and township representatives spoke during the in-person public hearing. Byron Solar appreciates their participation and will continue to coordinate with the counties and townships, including regarding drainage and infrastructure/road crossings.

**V. Conclusion.**

Byron Solar appreciates the opportunity to provide these reply comments to comments made during the public hearings. As noted above, Byron Solar will respond to the written comments submitted during the comment period by December 9, 2022.

These reply comments have been e-filed today through [www.edockets.state.mn.us](http://www.edockets.state.mn.us). A copy of this filing is also being served upon the persons on the Official Service Lists of record. Please let me know if you have any questions regarding this filing.

Sincerely,

*/s/ Christina K. Brusven*

Christina K. Brusven

**Table 1: Dodge County 40kW or Greater Solar Farm Performance Standards**

Dodge County Performance Standard	Byron Solar Design
16.46.2.A. Lot Size adequately handle the stormwater produced by the impervious surface of the panels, and, meet all applicable setbacks without the need [f]or a variance, but no less than the minimum lot size of the zoning district in which it is located.	No. It would be impractical for each lot/parcel in the Project to meet this requirement; however, the stormwater management system has been designed in accordance with MPCA stormwater management for solar projects guidance, and in compliance with the NPDES/SDS Construction Stormwater General Permit (Joint SP/RP Application at 107).
16.46.2.B.II. All stormwater generated on site shall be routed to stormwater basins prior to discharge.	Yes. Surface water that flows onto or falls on the impervious surfaces will flow into vegetated areas and/or stormwater basins before infiltrating into the groundwater (Joint SP/RP Application at 103).
16.46.2.B.III. Field soil evaluations shall be required to be completed to determine the type and size of stormwater treatment pond(s) required as part of the application submittal for a solar energy farm. During the time of year when field soil evaluations cannot be completed, the solar site area shall be sized to accommodate filtration, rather than infiltration.	Geotechnical studies have been conducted. Soil types were considered to determine the most appropriate stormwater infrastructure for the site. Due to poor onsite soils, wet sedimentation basins are proposed. Neither filtration nor infiltration basins will be used.
16.46.2.B.IV. A MPCA licensed construction/installer shall certify the design, oversee construction and sign off of the final installation of all practices.	There are not MPCA certifications, but Byron Solar will be required to implement erosion prevention and sediment control practices recommended by the MPCA Construction Stormwater Program, obtain a NPDES/SDS Construction Stormwater Permit from MPCA, and develop a Stormwater Pollution Prevention Plan (Draft Site Permit Condition 4.3.11).
16.46.2.B.V. The contractor shall provide proof of coverage under MPCA’s stormwater permit to the Department with the Zoning Permit application prior to land disturbing activities.	Yes. The Project must demonstrate it has coverage under MPCA’s stormwater permit prior to construction (Draft Site Permit Condition 4.3.11).
16.46.2.B.VI. A performance bond or cash escrow in the amount of \$20,000 shall be submitted to the Department for the purpose	No. The Commission monitors compliance of its Site Permit under Condition 10.4 and other conditions.

Dodge County Performance Standard	Byron Solar Design
<p>of addressing any issues from correcting non-functioning basins or long-term maintenance activities. The project owner is responsible for all issues with, and long-term maintenance of the stormwater facilities. The bond/escrow shall be active and maintained at \$20,000 for the permitted “project life” as indicated in the CUP application.</p>	
<p><b>16.46.2.C. FOUNDATIONS</b></p> <p>The manufacturer’s engineer or another qualified engineer shall certify that the foundation and design of the solar panels are within accepted professional standards, given local soil and climate conditions.</p>	<p>Yes.</p>
<p><b>16.46.2.D. OTHER STANDARDS AND CODES</b></p> <p>All solar energy farms shall be in compliance with any applicable local, state and federal regulatory standards, including the State of Minnesota’s Uniform Building Code, as amended; and the National Electric Code, as Amended.</p>	<p>Yes. Under Draft Site Permit Condition 4.6 the Permittee must comply with all applicable state rules and statutes and obtain all required permits.</p>
<p><b>16.46.2.E. POWER AND COMMUNICATION LINES</b></p> <p>Power and communication lines running between banks of solar energy panels and to electric substations or interconnection from the solar array to the ROW shall be buried under ground.</p> <p>Power and communication lines for the purpose of transporting energy from the solar farm are considered Essential Service Lines and are regulated under Section 16.21 of this Chapter.</p>	<p>Yes. The DC collection lines will be buried or bundled beneath the solar panels; all AC collection lines will be buried (Joint SP/RP Application at 28).</p>
<p><b>16.46.2.F. GLARE</b></p> <p>Solar Energy Farms shall not be permitted in areas where glare or reflection poses a risk to airports or traffic on public roadways. In addition, Solar Energy Farms shall not be permitted in areas where glare or reflection poses a nuisance to nearby receptors unless there is the ability to adequately mitigate the impacts through screening or other methods.</p>	<p>Yes. Byron Solar completed a glare study (See EA Appendix F). Receptors modeled for glare included airports (flight paths and air traffic control towers), public roadway segments, and nearby residences.</p>

Dodge County Performance Standard	Byron Solar Design
<p>Glare studies shall be required as part of the application to evaluate impacts to:</p> <p>I. Public and/or private airports located within 5 miles of the proposed array (when present)</p> <p>II. Two-way car and truck traffic on roads within a 1-mile radius of the proposed array</p> <p>III. All receptors within a 2-mile radius of the proposed array</p>	
<p>16.46.2.G. VEGETATION MANAGEMENT</p> <p>Vegetation planned for the solar energy farm area shall be planted and managed to promote successful establishment, meet the pollinator-friendly vegetation standard established by Minn. Stat. Section 216B.1642, Subd. 2, and prevent and control the spreading of noxious/invasive weeds to surrounding properties. Low growing native pollinator species shall be utilized both under and surrounding the array.</p>	<p>Yes. Byron Solar provided a Vegetation Management Plan (VMP) as Appendix E of the Joint SP/RP Application. Goals of the VMP include: promoting pollinator habitat, establishing stable ground cover, reducing erosion and runoff, and improving infiltration.</p>
<p>16.46.2.H. SETBACKS</p>	<p>See Table 7 of Joint SP/RP Application.</p>
<p>16.46.2.I. SCREENING/AESTHETICS</p> <p>The applicant shall submit a visual impact analysis as part of the application to assist in any required screening plan. The analysis shall be of sufficient detail to provide the Planning Commission and County Board a visual representation of the site as viewed from the public roadways and neighboring receptors.</p> <p>Screening may include earthen mounds/berms/ neutral colored fences, or landscaping of 80% opacity prior to energizing of the solar facility. Any screening plan must be submitted as part of the application and approved by the Planning Commission and County Board.</p> <p>Three rows of trees planted at minimum 200 FT from road center line.</p> <p>The rows will be spaced 16 FT, 10 FT and 8 FT off center apart. The first two rows closest to the boundary line will be shrubs to achieve</p>	<p>Byron Solar completed visual simulations and renderings to evaluate potential visual impacts of the Project (Joint SP/RP Application at 63-70). It would be impractical to plant the number of trees suggested in 16.46.2.I for a solar farm of this size. For example, vegetative screening along the entire Project fence, assuming tree spacing as described in this performance standard, would require Byron Solar to plant and maintain over 29,000 trees/shrubs.</p> <p>Byron Solar has proposed visual screening for the Project that addresses potential visual impact concerns (see Joint SP/RP Application Appendix L (Conceptual Mitigation Planting Plan)).</p>

Dodge County Performance Standard	Byron Solar Design
<p>a mature height of 8-30 FT and the third row will be evergreens to achieve a mature height of 30-60 FT.</p>	
<p>16.46.3. A. DISCONTINUATION – A solar energy farm shall be considered a discontinued use after one (1) year without production of energy, unless a plan is developed and submitted to the Dodge County Zoning Administrator outlining the steps and schedule for returning the array to service.</p>	<p>Yes. A Decommissioning Plan was included as Appendix H of the Joint SP/RP Application.</p>
<p>16.46.3.B. DECOMMISSIONING PERIOD - All panels, arrays and accessory facilities shall be removed within six (6) months of the discontinuation of use.</p>	<p>No. Given the size of the Project, Byron Solar will complete decommissioning activities within 9 months of discontinuance of use (Joint SP/RP Application Appendix H at 1-4).</p>
<p>16.46.3.C. DECOMMISSIONING AND RESTORATION REQUIREMENTS –</p> <p>Decommissioning and site restoration requires complete removal of all equipment, components, poles, wiring, and any other features associated with the solar energy farm and bring the site to pre-solar farm conditions. This includes, but is not limited to:</p> <p>I. Dismantling and removal of all arrays and costs associated with recycling of the panels. Landfilling of panels at the end of life is prohibited unless recycling is not a viable option. Economics between landfilling and recycling is not considered in determining whether or not recycling is viable.</p> <p>II. Removal of underground cables, conduits, etc....</p> <p>III. Removal of accessory structures, fencing, poles and other ancillary facilities</p> <p>IV. Removal of all foundations</p> <p>V. Restoration and reclamation to the same general topography and vegetation that existed pre-solar installation</p>	<p>Partial. Byron Solar’s Decommissioning Plan (Appendix H of the Joint SP/RP Application at 1-2), requires removal of all above ground facilities and all underground facilities to a depth of 48 inches.</p> <p>All will be removed from the site and reconditioned and reused, sold as scrap, recycled, or disposed of appropriately, at the Owner’s sole discretion, consistent with applicable regulations and industry standards (Joint SP/RP Application Appendix H at 1-3).</p>
<p>16.46.3.D. DECOMMISSIONING &amp; RESTORATION PLAN – All solar energy farms shall submit a Decommissioning and</p>	<p>Yes. See Joint SP/RP Application Appendix H.</p>

Dodge County Performance Standard	Byron Solar Design
<p>Restoration Plan as part of the project application. The cost estimate for decommissioning shall be made by a competent party, such as a professional engineer, a contractor capable of decommissioning or a person with suitable expertise or experiences with decommissioning. The plan shall include the following information:</p> <p>I. The manner in which the project will be decommissioned and the site restored.</p> <p>II. The anticipated life of the project.</p> <p>III. The estimated cost of decommissioning in current dollars not including anticipated salvage value.</p> <p>IV. The Decommissioning and Restoration Plan shall identify the party financially responsible for carrying out the requirements of the Decommissioning and Restoration Plan.</p> <p>The plan shall include a description of how the financially responsible party plans to pay for the decommissioning and restoration.</p>	
<p>16.46.3.V. DECOMMISSIONING FINANCIAL ASSURANCE.</p> <p>a. After issuance of the CUP and prior to construction, the permittee shall submit a Performance Bond or cash escrow in the amount of 110% of the estimated cost of decommissioning or in the amount according to the tiered decommissioning sums listed in the table below, whichever is greater, to finance the Decommissioning and Restoration plan of the solar energy farm.</p>	<p>Partial. Byron Solar’s Decommissioning Plan describes the financial assurance that will be provided to ensure funds are available for decommissioning at the end of the useful life. Instead of mandating 110% of decommissioning costs or a particular sum, the Decommission Plan states that the estimated costs will be reevaluated every 5 years (Joint SP/RP Application Appendix H at 1-5).</p>
<p>b. The cost of decommissioning and the required escrow fund shall be updated to reflect the current cost of decommissioning in years 10, 20, &amp; 30 (if applicable) from the date the permit is issued. The performance bond shall be set up as “continuous until cancelled” and automatically renewed on an annual basis for the life of the project. Dodge County shall receive annual notification upon renewal.</p>	<p>As noted above Byron Solar’s decommissioning cost estimate will be reevaluated every 5 years.</p>

Dodge County Performance Standard	Byron Solar Design
<p>16.46.3.E. FAILURE TO DECOMMISSION – If the financially responsible party of a solar energy farm does not complete the Decommissioning and Restoration Plan, Dodge County may take such action as may be necessary to complete decommissioning, including but not limited to, requiring forfeiture of the performance bond or assessment of the cost of decommissioning against the land. The issuance of the Conditional Use Permit shall constitute agreement and consent by all parties to the agreement, including their respective heirs, successors, and assigns, that Dodge County may take such action as may be necessary to decommission the solar farm and adequately restore the site, including the exercise by the county, county staff, and their contractors of the right of ingress and egress for the purpose of decommissioning the solar farm and restoring the property.</p>	<p>The Commission would oversee decommissioning and restoration activities pursuant to Conditions 9.1 and 9.2 of the Draft Site Permit.</p>
