RE: Commission Investigation into Natural Gas Utilities' Practices, Tariffs and Assignment of Cost Responsibility for Installation of Excess Flow Valves and Other Similar Gas Safety Equipment

PUC Docket Number: G-999/CI-18-41

Dear Minnesota Public Utilities Commission:

United Natural Gas, LLC's system is new enough that all our residential customers have EFV's installed already. We feel that the issue regarding installing them for existing customers does not apply to UNG and will not be filing any other information in this docket.

Thank You
Respectfully Submitted,

Doug Lund
