DOCKET NO. E999/CI-16-521

Dear Mr. Seuffert:

Northern States Power Company, doing business as Xcel Energy, submits the enclosed Comments in response to the Notice of Comment Period issued on November 27, 2024 in this docket.

We have electronically filed this document with the Minnesota Public Utilities Commission, and copies have been served on the parties on the attached service list. Please contact Nathan Kostiuk at [nathan.c.kostiuk@xcelenergy.com](mailto:nathan.c.kostiuk@xcelenergy.com) or contact me at [brian.t.monson@xcelenergy.com](mailto:brian.t.monson@xcelenergy.com) if you have any questions regarding this filing.

Sincerely,

/s/

**COMMENTS**

**INTRODUCTION**

Northern States Power Company, doing business as Xcel Energy, submits these Comments in response to the Notice of Comment Period issued on November 27, 2024, in this docket. The focus of the Comment Period is on whether the Commission should approve the Technical Subgroup's (TSG's) proposed changes to the State of Minnesota Distributed Energy Resources Interconnection Process (MN DIP), specifically regarding adding new study screens for unintentional islanding.

The proposed changes are crucial for enhancing the reliability and safety of our energy systems. By incorporating these new study screens, we aim to mitigate the risks associated with unintentional islanding, thereby ensuring a more robust and secure interconnection process for Distributed Energy Resources (DERs). This collaborative effort reflects our commitment to continuous improvement and innovation in the energy sector.

The topics open for comment are as follows and are addressed in these Comments:

- Should the Commission adopt the TSG's proposed changes to the MN DIP as found in Attachment A to this Notice?
- Are there other issues or concerns related to this matter?

## COMMENTS

### **I. THE COMMISSION SHOULD ADOPT THE TSG'S PROPOSED CHANGES TO MN DIP**

The subgroup under the Distributed Generation Working Group (DGWG) was formed by the directive of the Commission, which required the TSG to convene and examine the possibility of unintentional islanding caused by the interconnection of Distributed Energy Resources (DERs). The TSG's mandate included identifying additional screens that utilities can perform to assess the risk of unintentional islanding and determining if there are less costly alternatives to Voltage Supervisory Reclosing (VSR) for addressing any perceived risk. The TSG sought feedback from the DGWG during this examination and was tasked with filing a report with its findings and recommendations by December 31, 2024.

The TSG held five meetings between May and July 2024 to thoroughly explore these issues:

- **Meeting #1 (May 16, 2024, 2 PM Central):** This meeting focused on utility concerns with unintentional islanding, DER installers' concerns with VSR or other unintentional islanding mitigation solutions, and the screening methods used by other entities.
- **Meeting #2 (May 30, 2024, 2 PM Central):** The discussion delved into the underlying causes of islands, including the relationships between faults, system protection, and islanding. The meeting also reviewed case studies of actual islands that have occurred or modeling of islanding potential.
- **Meeting #3 (June 13, 2024, 2 PM Central):** This session continued the educational discussions and focused on technical screens for identifying the potential of unintentional islanding and identifying changes to the MN DIP.
- **Meeting #4 (June 27, 2024, 2 PM Central):** The TSG proposed screens for unintentional islanding and discussed mitigation solutions for the potential of unintentional islanding (tool bag).
- **Meeting #5 (July 11, 2024, 2 PM Central):** The final meeting reviewed the TSG consensus on technical screens and mitigation solutions to present to the full DGWG.

The TSG's diligent analysis and collaborative efforts culminated in a report outlining their findings and recommendations, which they submitted to Staff on August 26, 2024, in Docket 16-521. This report is included as Attachment A to the Notice of Comment Period.

On November 1, 2024, the TSG presented their findings and recommendations to the DGWG. The presentation slides were subsequently filed in Docket No. 16-521 on November 12, 2024. During the presentation, the TSG clarified that their scope, as agreed upon by all parties, was twofold: firstly, to gain an understanding of the potential for unintentional islanding caused by the interconnection of DERs under the current interconnection process and technical requirements; and secondly, to identify additional screens that utilities can perform to assess the risk of unintentional islanding. We note that the TSG did not explore whether there are less costly alternatives to VSR, as the TSG reached a consensus on the language for the additional screen before delving into cost alternatives and decided to conclude their work at that point.

The Company supports the TSG's recommendation to incorporate an additional screen into the MN DIP, and we appreciate the collaborative effort that led to this recommendation. The insights and recommendations provided by the TSG, through their diligent analysis of unintentional islanding risks associated with DER interconnections, are invaluable. Incorporating an additional screening measure into the MN DIP will significantly enhance our ability to assess and mitigate such risks effectively.

## **II. CHANGES TO TARIFFS WILL BE NEEDED**

As our Section 10 tariff incorporates the MN DIP, if the Commission approves the changes proposed by the TSG, the Company will subsequently need to amend our tariff to ensure alignment. The proposed changes to the MN DIP include the addition of new study screens for unintentional islanding, which will necessitate corresponding updates to our tariff provisions.

The TSG's recommendations are designed to enhance the reliability and safety of our energy systems by incorporating additional screening measures to assess the risk of unintentional islanding. These changes will require utilities to perform new assessments during the interconnection process, ensuring that potential risks are identified and mitigated effectively. As a result, our tariff must be updated to reflect these new requirements and provide clear guidance to stakeholders on the implementation of the additional screens.

To facilitate a smooth transition and ensure compliance with the updated MN DIP, we respectfully request a period of 30 days from the issuance of the Commission's Order to implement these necessary changes to our tariff. This timeframe will allow us to make the required amendments, communicate the updates to all relevant parties, and ensure that our processes are fully aligned with the new standards.

## **CONCLUSION**

In summary, the Company:

- Supports the recommendation put forth by the TSG and
- Respectfully requests a period of 30 days from the issuance of any Order on this topic to appropriately amend our tariffs.

We appreciate the opportunity to comment on this matter and extend our thanks to everyone involved in the TSG for their time and collaborative spirit throughout this process to ensure the continued reliability and safety of our energy systems.
