In the Matter of the Application of Minnesota Power for Authority to Increase Rates for Electric Utility Service in Minnesota

DOCKET NO. E-015/GR-19-442

In the Matter of the Emergency Petition of Minnesota Power for Approval to Move Asset-Based Wholesale Sales Credits to the Fuel Adjustment Clause and Resolve Rate Case

DOCKET NO. E-015/M-20-429

**REPLY COMMENTS OF THE OFFICE  
OF THE ATTORNEY GENERAL**

The Office of the Attorney General—Residential Utilities Division (“OAG”) submits these reply comments in response to the May 11, 2020 comments of the Large Power Intervenors (“LPI”), an *ad hoc* consortium of large industrial customers of Minnesota Power (“Company”). LPI asks the Commission to grant a “procedural” extension of the Company’s Rider for Energy-Intensive Trade-Exposed Customers (“EITE rider”), which provides a rate discount to certain Large Power customers (“EITE customers”) paid for by non-EITE customers. The rider was originally set to expire in February 2021, but the Commission recently decided that it should terminate at the end of the Company’s pending rate case.<sup>1</sup>

Circumstances have changed significantly in the few short weeks since the Commission issued its EITE-extension order. In particular, due to the COVID-19 pandemic, the Company

---

<sup>1</sup> See generally Docket No. E-015/M-16-564, Order Approving Rider Extension with Conditions (Mar. 17, 2020) (hereinafter “EITE-Extension Order”).

has proposed to resolve its 2019 rate case on an expedited basis.<sup>2</sup> As part of that resolution, the Company proposes to restore the EITE rider’s original expiration date and allow parties to address the rider’s future in another forum. LPI, however, is not happy with this return to the pre-rate-case status quo and seeks a further extension of the EITE rider until the end of the Company’s next-filed rate case. LPI states that its members face “dire” economic challenges as a result of the pandemic, which has caused some of them to temporarily idle their operations, and suggests that the rider “could make a difference in the economic analysis that will precede restarting idled facilities.”<sup>3</sup>

The OAG is sympathetic to the social and economic impacts, as well as potential rate increases, that *all* of Minnesota Power’s customers, including LPI, residential ratepayers, and small-business ratepayers, are now facing. However, now is not the time for hasty decisions about the future of the EITE rider. As discussed in these reply comments, restoring the rider’s February 1, 2021 expiration date would not harm LPI and would permit parties and the Commission to give LPI’s request the attention it deserves in a separate proceeding. If, however, the Commission decides to determine the rider’s future in this proceeding, the OAG would recommend that the rider be terminated at the conclusion of the proceeding, consistent with the March 17, 2020 EITE-extension order.

## I. EXTENDING THE EITE RIDER WOULD HARM NON-EITE CUSTOMERS.

LPI argues that extending the EITE rider would not harm non-EITE customers and claims to be surprised that other parties have not “championed” an extension. The OAG is happy to explain its opposition. Interclass revenue apportionment is a zero-sum game: a subsidy

---

<sup>2</sup> See generally Docket No. E-015/M-20-429, Emergency Petition for Approval to Move Asset-Based Wholesale Sales Credits to the Fuel Adjustment Clause and Resolve Rate Case (Apr. 23, 2020) (hereinafter “Petition”).

<sup>3</sup> LPI Initial Comments at 12 (May 11, 2020).

provided to one class of customers must be recovered from other classes for the utility to remain revenue-neutral. The EITE discount is currently being funded by the withholding of \$15.5 million in Large Power revenues from base rates.<sup>4</sup> These revenues were directly attributable to the EITE discount and therefore must be used to offset the cost of the discount.<sup>5</sup>

Non-EITE customers have been bearing the cost of this \$15.5 million EITE subsidy since 2017 without the corresponding rate discount that EITE customers enjoy. Extending the rider in the current docket would deny non-EITE customers the opportunity to argue for termination of this subsidy with the benefit of a fully developed record, and would prolong the period during which their rates are inflated. Moreover, for as long as the EITE rider is in effect, certain “EITE-paying” customers remain at risk of receiving additional surcharges to recover any shortfall that remains after the revenues attributable to the EITE discount are netted against its cost.<sup>6</sup>

LPI claims that an extension would not result in surcharges, but its claim should reassure no one. The OAG is unaware of a commitment by Minnesota Power that it will never seek to surcharge EITE-paying customers. Indeed, the OAG gave the Company a chance to make such a commitment but the Company declined, only stating that it does not “expect” to do so given current conditions.<sup>7</sup> And although the Commission’s current EITE-extension order prohibits the

---

<sup>4</sup> See Docket No. E-015/GR-16-664, Findings of Fact, Conclusions, and Order at 52 (Mar. 12, 2018) (explaining that test-year revenue requirement must be increased to because “revenue from Keetac must be accounted for as an increase in utility revenue in a tracker established under Minn. Stat. § 216B.1696 . . . to offset the costs of the discounted EITE rate”); MP Response to OAG IR No. 6005 (OAG Reply Attach. A) (explaining that 16-664 final revenue requirement reflected removal of \$15.5 million of Keetac-restart revenue attributable to EITE rider).

<sup>5</sup> See Minn. Stat. § 216B.1696, subd. 2(d) (providing that “the commission shall allow the utility to recover any costs, including reduced revenues, or refund any savings, including increased revenues, associated with providing service to a customer under an EITE rate schedule”); Docket No. E-015/M-16-564, Order Authorizing Cost Recovery with Conditions at 7 (Apr. 20, 2017) (agreeing with the OAG that crediting EITE-paying customers with increased revenues from customers receiving EITE subsidy comports with statute).

<sup>6</sup> The “EITE-paying” customers who may become subject to surcharges include all non-EITE customers other than low-income customers. See Minn. Stat. § 216B.1696, subd. 2(d) (providing that EITE costs and savings must not be recovered from or refunded to EITE customers or low-income customers).

<sup>7</sup> MP Response to OAG IR No. 6005 at 1 (OAG Reply Attach. A).

Company from surcharging non-EITE customers after February 1, 2020,<sup>8</sup> the current order, and its prohibition on surcharges, would presumably be superseded by any future order extending the rider.

**II. RESTORING THE RIDER'S ORIGINAL EXPIRATION DATE WILL NOT HARM LPI AND WOULD PERMIT THE EITE RIDER'S FUTURE TO BE DECIDED IN A MORE APPROPRIATE FORUM.**

LPI's claim that it would be harmed if the Commission restores the rider's original expiration date appears to arise from its belief that the pending rate case would have resulted in final rates that reflect its preferred rate design.<sup>9</sup> The gaping hole in this logic, of course, is that this result was never a certainty, and LPI loses nothing by having the pre-rate-case status quo restored. LPI also complains that the Company's proposed resolution of the rate case would result in a rate increase without the opportunity for LPI to address the alleged uncompetitiveness of Large Power rates.<sup>10</sup> But other stakeholders are equally disadvantaged—unable to file testimony due to the suspension of the rate case and, moreover, unable to evaluate LPI's claims that its members' rates are uncompetitive. And, again, the proposed resolution would give LPI the same opportunity that it had to seek extension of the EITE rider prior to the filing of the rate case: introducing a miscellaneous petition that satisfies the requisite evidentiary standard.

Furthermore, Minnesota Power's proposal would cause LPI's members no near-term rate increase and, as LPI acknowledges, would not prejudice its right to seek to have the rider extended or modified in another docket.<sup>11</sup> This gives LPI eight months, if it does not sit on its hands, to pursue an extension of the rider. And by the end of the year, LPI will likely be in a

---

<sup>8</sup> EITE-Extension Order at 4.

<sup>9</sup> See Docket No. E-015/GR-19-442, Direct Testimony of Marcia Podratz at 103 (Nov. 1, 2019) (stating that “[i]nstead of offering a separate discount, Minnesota Power aims to design its Large Power base rates to be reasonably close to the Large Power class cost of service”).

<sup>10</sup> See LPI Initial Comments at 11.

<sup>11</sup> See *id.* at 4 (quoting Minnesota Power's statement that the “Petition is not intended to change any party's opportunity to propose in other dockets to extend or modify the EITE rate beyond February 1, 2021”).

better position to understand COVID-19’s long-term impacts on its members’ operations.<sup>12</sup> Unfortunately, however, LPI has opted to use the current crisis to try to push through another EITE-rider extension that would enrich its members at the expense of other ratepayers, many of whom are already having trouble affording their lives.

The OAG had supported restoring the EITE rider’s original expiration date—conditioned on the equitable sharing of the discount’s base-rate impact—out of a desire to maintain the rate-design status quo, avoid interclass disputes, and facilitate the potential resolution of this case. Now that LPI has rather unproductively introduced a contentious new issue into this proceeding, the OAG submits that one potential resolution of this issue would be to terminate the rider immediately, remove the discount’s impact from present revenues before calculating the increase, and thereby end the rate subsidy EITE customers currently enjoy. This resolution would be consistent with the Commission’s order extending the rider, in spirit if not in letter, because it would end the rider coincident with the next increase to base rates. It would also be administratively cleaner than extending the rider to February 2021 or to the end of some as-yet-unknown rate case.

### **III. THE COMMISSION SHOULD NOT EXTEND THE EITE RIDER WITHOUT PROOF THAT IT WILL DELIVER A NET BENEFIT TO MINNESOTA POWER OR TO THE STATE.**

LPI cites the EITE statute’s statement of purpose—to “ensure competitive rates” for EITE customers—as if the statement supplied an independent basis for giving its members a rate break.<sup>13</sup> LPI has apparently forgotten about the main ratepayer-protection provision in the statute: the requirement that any EITE rate schedule be supported by evidence of a net benefit to

---

<sup>12</sup> See *id.* at 8–9 (explaining that Blandin Paper Company will shut down only temporarily; Hibbing Taconite Company is expected to reopen on July 6, 2020; Sappi Cloquet, LLC is operating on a rotational basis; and Verso Corporation continues to operate).

<sup>13</sup> See *id.* at 12.

the utility or to the state.<sup>14</sup> Notably, Minnesota Power and LPI were barely able to establish a net benefit for the existing EITE rider, failing in their first attempt,<sup>15</sup> and ultimately persuading just three Commissioners that the rider would yield a net benefit to Minnesota Power—but not to the state of Minnesota.<sup>16</sup>

The Commission should reject LPI’s demand, in the midst of a financial crisis, to extend the EITE rider on the strength of years-old evidence of a net benefit and LPI’s assertion that current Large Power rates are “uncompetitive.” There are two main reasons for this. First, a fixed term was essential to the Commission’s original approval of the rider, and the unique procedural posture that prompted the Commission’s EITE-extension order no longer exists. Second, the evidence that supported the Commission’s net-benefit finding when it originally approved the rider is now stale, and cannot support such a finding under the current economic conditions. If the Commission entertains LPI’s extension request, it should use the opportunity to fully evaluate whether the rider continues to provide a net benefit.

**A. DESPITE LPI’S CHARACTERIZATION OF ITS REQUEST AS “PROCEDURAL,” THE EITE RIDER’S FOUR-YEAR TERM WAS ESSENTIAL TO MINNESOTA POWER’S PROPOSAL FOR, AND THE COMMISSION’S APPROVAL OF, THE RIDER.**

After its first petition for an EITE rider was rejected, Minnesota Power filed a new petition supported by additional evidence and proposing new conditions designed to protect ratepayers. One of the conditions offered as an inducement for approval of the EITE rider was

---

<sup>14</sup> See Minn. Stat. § 216B.1696, subd. 2(b) (requiring net-benefit showing).

<sup>15</sup> See Docket No. E-015/M-16-564, Order Approving EITE Rate, Establishing Cost Recovery Proceeding, and Requiring Additional Filings at 1, 8 (Dec. 21, 2016) (hereinafter “EITE-Approval Order”) (recounting that Minnesota Power’s first EITE petition was denied because it failed to demonstrate a net benefit to the Company or the state of Minnesota).

<sup>16</sup> See Docket No. E-015/M-16-564, 9/15/16 PUC Agenda Meeting Minutes at 3 (Mar. 9, 2017) (adopting motion to “[f]ind that MP’s Proposed EITE Rate Schedule and EITE Rate, as filed by MP, can be expected to yield a net benefit to the utility”).

that the rider would expire after four years. The Company explained its term-limit choice as follows:

The [rider] as proposed will have a four-year initial term. A review of the business cycles in the taconite industry has indicated that a four-year cycle, from good times to bad and then back to better times, is appropriate, as demonstrated by the 1982-1985, 1986-1989 and the 2000-2003 corrections. A four-year term also seems reasonable to allow for a robust assessment of the impacts and the effects of the [rider and its costs] on the net benefit to the utility and the state. While Minnesota Power believes that global competition will continue to affect and to impact the operations, sustainability and success of its largest customers, the Company also recognizes and acknowledges that such a review could result in several potential alternatives that would then be presented to the Commission for review and consideration; possibly including recommendations like the elimination of the [rider] as no longer appropriate or necessary, changes in the conditions relating to the application of the [rider], replacement of the [rider] with another mechanism, revisions of the Cost Recovery mechanism or allocation, continuation of the [rider] and associated Cost Recovery mechanism “as-is”, or some other rate making mechanism commonly and customarily reviewed, vetted and approved by the Commission.<sup>17</sup>

The Commission, by approving the petition, adopted this four-year term and, at least implicitly, agreed that a four-year reevaluation period was reasonable and in the public interest.<sup>18</sup>

LPI argues that the Commission has already approved a procedural extension of the EITE rider once and can do so again. It goes without saying that the Commission can reconsider prior decisions at any time. But LPI’s argument ignores two inconvenient truths. First, the unique procedural posture that led the Commission to extend the rider previously no longer exists: When Minnesota Power requested the extension, in October of last year, the date of Minnesota

---

<sup>17</sup> See Docket No. E-015/M-16-564, Revised Petition at 13 (June 30, 2016).

<sup>18</sup> See EITE-Approval Order at 9 (finding that Company’s revised proposal, including four-year EITE rider, could be expected to yield a net benefit to the utility); see also EITE-Extension Order at 4 (acknowledging that “a fixed term length was a factor in Commission approval of the rider” though the precise length of the term was perhaps not essential).

Power’s rate-case filing—November 1—was known and imminent. Further, as the Commission noted, final rates were expected to take effect only a few months after the EITE rider’s original February 2021 expiration date.<sup>19</sup> Today, however, no rate-case filing is imminent—indeed, if the petition is granted, a rate case will not be filed before March of next year, *after* the original expiration date—and extending the rider through the end of that case would mean a mid-2022 expiration, at the earliest.<sup>20</sup> In other words, the Commission must decide how far it is willing to allow its prior orders—both the original approval order and the extension order—to be stretched.

The second inconvenient fact that LPI ignores is that the Commission’s EITE-extension order contemplates that the rider will terminate upon the resolution of the pending rate case. While the precise language that the Commission used was “until final rates,” the apparent intent was that the rate case’s resolution would determine the future treatment of the EITE subsidy. The Company’s too-clever-by-half proposal to effectuate a base-rate increase without triggering “final rates” by withdrawing its rate case is a transparent attempt to prevent straightforward application of the Commission’s order. Fortunately, it does nothing to diminish the Commission’s power to end the EITE rider in resolving Minnesota Power’s petition.

**B. THE EVIDENCE ON WHICH THE COMMISSION’S PREVIOUS “NET BENEFIT” FINDING WAS FOUNDED IS STALE AND CANNOT SUPPORT AN EXTENSION UNDER THE CURRENT ECONOMIC CIRCUMSTANCES.**

The EITE statute requires proof that an EITE rate will provide a “net benefit to the utility or the state.”<sup>21</sup> The net-benefit requirement was provided as a substitute for the usual regulatory protections of sections 216B.03, .05, .06, .07, and .16, which the EITE statute expressly

---

<sup>19</sup> EITE-Extension Order at 4.

<sup>20</sup> The OAG emphasizes that, while Minnesota Power could file another rate case as early as March 2021, the Company has stated that it does not intend to file before November 2021. *See Petition at 17.*

<sup>21</sup> Minn. Stat. § 216B.1696, subd. 2(b).

discards.<sup>22</sup> The net-benefit requirement is thus the only safeguard that the statute offers to protect non-EITE customers from unjustified cost shifting.

In conjunction with Minnesota Power’s revised petition for an EITE rider, the Company and LPI provided a data dump of evidence to support their claims that the rider would result in a net benefit to the utility or the state. This evidence consisted of, among other things, sworn affidavits by Minnesota Power executives, LPI members, and industry associations; voluminous economic reports; expert testimony; news articles; resolutions of support; and detailed rate-impact calculations. Minnesota Power’s petition alone spanned 250 pages, and the combined length of LPI’s and other industrial stakeholders’ submittals were more than twice that. Despite this mountain of evidence, the Commission found a net benefit based solely on the positive revenue impact for Minnesota Power, declining to find any net benefit to the state of Minnesota.

In this case, the only evidence of a potential net benefit is LPI’s heavily qualified, unsworn assertion that extending the EITE rider “could make a difference in the economic analysis that will precede restarting idled facilities.”<sup>23</sup> This proffer falls far short of the evidentiary showing that the Commission required before approving the existing rider, and the Commission should protect non-EITE ratepayers by demanding a similar showing here, especially now that LPI is seeking an extension *beyond* the end of the current rate case. Simply put, to grant a practically indefinite extension without the thoughtful reevaluation that Minnesota Power’s original proposal envisioned would render the rider’s four-year term a nullity.

Even if the Commission believes that a new net-benefit showing is not required to extend the EITE rider, the Commission should decline to extend it because the original justification for

---

<sup>22</sup> *Id.* See also EITE-Approval Order at 4 (observing that, rather than allowing the Commission to determine whether an EITE rate is just and reasonable, the statute “directs the Commission only to consider the interests of the utility, or the state, and to determine if a proposed EITE rate schedule would be a net benefit to one of them”).

<sup>23</sup> LPI Initial Comments at 12.

the rider has vanished. According to Minnesota Power’s revised EITE petition, the utility-specific benefit the Company would receive from the rider was an increase in net revenue from electricity sales to large industrial customers.<sup>24</sup> This analysis was premised on the existence of a causal link between the discount and the viability of EITE customers.<sup>25</sup> Initial indications were that the rider had succeeded in spurring new industrial sales, with U.S. Steel’s Keewatin Taconite (“Keetac”) mine coming online shortly after the Commission approved the rider.<sup>26</sup>

The current pandemic, however, has thrown into doubt the entire premise for the rider. Nearly 300 MW of EITE load is currently idled, including Keetac, despite the continued availability of the discount.<sup>27</sup> If these customers, who have been receiving a subsidy under the rider, are nonetheless unable to keep operating, it is not clear that the rider can deliver the net benefit that it was supposed to. These dramatic changes wrought by the pandemic underscore the wisdom of exactly the type of periodic review that was supposed to be facilitated by the rider’s four-year term.<sup>28</sup> With the rider’s efficacy in doubt, the Commission should not grant an extension without assuring other ratepayers that the EITE discount will yield a net benefit to Minnesota Power or the state, now and in the future.

---

<sup>24</sup> See EITE-Approval Order at 6 (“According to the Company, the proposal would provide a net benefit to the utility in large part by increasing revenue from electricity sales to large industrial customers. The Company expects that the rate reduction would cause an increase in EITE customers’ electric consumption”).

<sup>25</sup> See EITE-Approval Order at 7 (noting Minnesota Power’s argument that lowering costs for large industrial customers would promote their economic viability).

<sup>26</sup> See Docket No. E-015/M-16-564, U.S. Steel Letter filed by MP (Mar. 10, 2017) (noting that Commission’s approval of EITE rider was a “crucial ingredient[]” in Keetac’s restart).

<sup>27</sup> See MP Public Response to OAG IR No 6010 at 2 (OAG Init. Attach. A); LPI Initial Comments at 8–9.

<sup>28</sup> See Docket No. E-015/M-16-564, Revised Petition at 13 (June 30, 2016) (stating that a four-year term would “allow for a robust assessment of the impacts and the effects of the [rider and its costs] on the net benefit to the utility and the state”).

## **CONCLUSION**

The challenges of COVID-19 have highlighted a simple truth—the fates of Minnesota Power’s residential, small-business, and large industrial customers are inextricably linked. The OAG is confident that Minnesotans will successfully weather this storm together. LPI’s EITE-extension request raises important socioeconomic questions that should be treated with the seriousness they deserve—not rushed through as part of an expedited resolution to the rate case. If, however, the Commission determines the rider’s future in this case, the OAG would respectfully recommend that it be terminated early.

If the Commission grants Minnesota Power’s petition without terminating the EITE rider, the OAG would maintain its recommendation from initial comments that the Commission require the Company to reallocate the EITE discount’s impact among all classes according to the existing base-rate revenue apportionment before applying the proposed 5.75 increase to base rates. Doing so would maintain the rate-design status quo, and is the minimum level of protection needed for non-EITE ratepayers. Finally, if the Commission terminates the rider, it

should remove the EITE discount's impact from base rates entirely, resulting in a 5.59 percent across-the-board increase to base rates.<sup>29</sup>

Confirm that non-EITE customers will not be billed any EITE-related surcharges during the remaining term of the EITE rider under any circumstances.

**RESPONSE:**

To date, non-EITE customers have not been billed any EITE-related surcharges, and during the remaining term of the EITE rider Minnesota Power does not expect any change to that position.

As detailed in Minnesota Power's February 3, 2020 EITE annual compliance filing,<sup>1</sup> in order to keep Minnesota Power revenue neutral, cost recovery can be thought of as consisting of two components: a) Cost recovery through higher base rates (by not considering the majority of Keetac revenues when making a final determination in Minnesota Power's recent 2016 rate case), and b) Cost recovery through a line item on Minnesota Power customer bills. These two components are explained in detail below.

*a) Cost Recovery Through Higher Base Rates*

Minnesota Power's final rate increase<sup>2</sup> in its 2016 rate case was determined to be \$12 million dollars, including \$15.5 million associated with keeping the Keetac restart revenue in the EITE docket. As a result, with the implementation of final rates that occurred on December 1, 2018, Minnesota Power will be revenue neutral with respect to providing the EITE discount.

<sup>1</sup> *In the Matter of a Petition to Ensure Competitive Electric Rates for Energy- Energy-Intensive Trade-Exposed Customers*, Docket No. E015/M-16-564, MINNESOTA POWER'S ANNUAL COMPLIANCE FILING at pp. 7 and 8 (Feb. 3, 2020).

<sup>2</sup> Minnesota Power's 2016 retail rate case, Docket No. E015/GR-16-664.

*b) Cost Recovery Through a Line Item on Customer Bills*

EITE cost recovery through a line item on customer bills was not implemented in 2018 because Minnesota Power expected that the refund calculation ordered by the Commission on October 13, 2017, would lead to the collection of the EITE tracker from EITE-paying customers, followed by a 100 percent refund to EITE-paying customers the following year.

In 2019, revenue from EITE customers was significantly higher than in the baseline year 2016. Furthermore, Minnesota Power expects similar results in future years. As a result, Minnesota Power does not expect to place a bill line for EITE cost recovery on customer bills during the term of the EITE rate.
