Categories: Red Category

Hi Craig,

We just had a minor comment/reminder:

There is an approved TMDL 1/9/2023 for E.coli and TSS for the Cottonwood River 07020008-502, which is located north of the project. Directly to the West of the project location, approximately 0.25 miles, there is a tributary stream, Unnamed Creek (County Ditch 29) 07020008-636, that flows directly to the Cottonwood River.

Chris

Hi Chris,

The EA was published on Jan. 9, 2026. I have attached it for your reference and included Jim Sullivan in this email, as he worked on it. I believe you were included in the [Notice of Public Hearing and Availability of the Environmental Assessment](#), but maybe you accessed it or are typically notified in a different way? In any event, if you have any questions, please let us know.

Thanks,

Craig

Hey Craig,

Did you happen to send out the Lyon County Generating EA? I got an email from DNR asking about it and I didn't see it in my email.
