Good afternoon Jim!

I'm doing well enough here at the moment and I hope you are doing well too! Thank you for sending a copy of the Xcel Energy – Lyon County Generating Station's environmental assessment to me. I sent this around to some of our Region 5 folks and we do not have any comments at this time.

Thank you for including me on the distribution list for eDockets!

Good afternoon, Melissa,

Hope you are well! I've attached a copy of the Xcel Energy Lyon County Generating Station Environmental Assessment (EA) for your review and potentially, Region 5 permitting folks. This facility is a natural gas turbine operation located near Marshall, Minnesota. It has completed air quality dispersion modeling and has some draft air quality permit conditions. If you would like to review the modeling files, please contact Matt Taraldsen at MPCA directly. You were added to our early distribution list on eDockets; however, I am not sure you have an account or been able to pull the documents. If you or anyone in Region 5 have comments, please feel free to email them to me and I will make certain that they are included in the eDocket record.

I have also included the notice for the project including hearing dates.

Thank you in advance!
