RE: SUPPLEMENTAL COMMENTS
IN THE MATTER OF AN INVESTIGATION INTO IMPLEMENTING CHANGES TO
THE RENEWABLE ENERGY STANDARD AND THE NEWLY CREATED CARBON
FREE STANDARD UNDER MINN. STAT. § 216B.1691
DOCKET NO. E999/CI-23-151

Dear Mr. Seuffert:

Northern States Power Company, doing business as Xcel Energy, submits the enclosed Supplemental Comments responding to the Public Utilities Commission's request for comment on clarification to the new or amended terms added to Minn. State 216B.1691 as they pertain to implementation of the Carbon Free Standard (CFS).

We have electronically filed this document with the Minnesota Public Utilities Commission, and copies have been served on the parties on the attached service list. Please contact Patti Leaf at patricia.b.leaf@xcelenergy.com or me at bria.e.shea@xcelenergy.com if you have any questions regarding this filing.

Sincerely,

/s/

BRIA E. SHEA
REGIONAL VICE PRESIDENT, REGULATORY POLICY

IN THE MATTER OF AN INVESTIGATION
INTO IMPLEMENTING CHANGES TO THE
RENEWABLE ENERGY STANDARD AND
THE NEWLY CREATED CARBON FREE
STANDARD UNDER MINN. STAT.
§ 216B.1691

DOCKET NO. E999/CI-23-151

SUPPLEMENTAL COMMENTS

INTRODUCTION

Northern States Power Company, doing business as Xcel Energy, submits these Supplemental Comments to the Minnesota Public Utilities Commission (Commission) responding to parties' March 19, 2025 Reply Comments regarding the Commission's November 8, 2023 Notice of Comment Period and the February 6, 2024 Notice of Extended Comment period issued in the above referenced docket. We appreciate the opportunity to provide these Supplemental Comments on topics discussed by the Department of Commerce, Clean Energy Organizations (CEOs), Carbon Solutions Group (CSG), Google LLC (Google), and Minnesota Large Industrial Group (MLIG).

Xcel Energy reiterates our strong opposition to the Department's recommendation that the Commission adopt hourly matching for Carbon Free Standard (CFS) compliance for the following reasons:

- The Department's hourly matching proposal is inconsistent with the plain language and legislative intent of Minn. Stat. § 216B.1691, which unambiguously states that compliance with the CFS will be based upon an annual metric.
- Annual matching, not hourly, is the longstanding standard for compliance with Minnesota's clean energy requirements. The Department's interpretation goes against two decades of demonstrating compliance with Minnesota's Renewable Energy Standard (RES) on an annual basis, and the CFS was modeled after and incorporated into the RES.

- Complying with an hourly matching requirement would likely substantially increase costs for customers as it would require the Company to significantly overbuild our system beyond our customers’ needs, as discussed in our reply comments.
- The proposed hourly matching requirement would require reliance on a market that does not currently exist. Specifically, the Department’s hourly proposal would require the creation of hourly markets for Energy Attribute Certificates (EACs).¹ No other state in the U.S. has adopted hourly credit requirements as part of a renewable or carbon free standard. Without a broader market, Minnesota utilities—like a proverbial ouroboros—would only be able to trade with each other, looking to buy EACs for the same hours (when wind and solar generation is low), and competing for the same limited supply. At best, this would result in an inefficient and likely costly market.

In addition to these overarching concerns, we offer the following response to Reply Comments filed by parties.

I. MARKET RELATED CONCERNS

A. Funding Request to Study Environmental Attribute Markets

In Reply Comments, the Department requests the Commission to authorize the Commissioner of Commerce to seek authority from the Commissioner of Management and Budget to incur costs for specialty services to provide reports on the status of EAC markets and to propose a suite of solutions that would facilitate hourly EAC trading for electric utilities.² This request for authority to seek funding to conduct a study on EAC hourly markets is unnecessary as the statutory intent of the CFS does not require hourly matching, and should not be granted.

B. Limiting CFS Eligible Resources

CSG argues that CFS-eligible generation should be limited to that which is sited solely in the MISO North region, and that Minnesota’s CFS requires Minnesota-sited generation.³ There is no indication in Minn. Stat. § 216B.1691 that the intent of the CFS was to limit the location of generation resources used to demonstrate compliance with the CFS to MISO North or to Minnesota. The language of the statute simply

¹ We use the general term EACs here to refer to both Renewable Energy Certificates (RECs) awarded to renewable generation resources eligible for the Eligible Energy Technology Standard (EETS) and Alternative Energy Certificates (AECs) awarded to fully or partially carbon-free resources eligible for the CFS.

² Department Reply Comments at 24, Docket No. E999/CI-23-151 (March 19, 2025).

³ CSG Reply Comments at 15-16, Docket No. E999/CI-23-151 (March 19, 2025).

states that:

each electric utility must generate or procure sufficient electricity **generated from a carbon-free energy technology** to provide the electric utility’s retail customers in Minnesota... so that the electric utility generates or procures an amount of electricity from carbon-free energy technologies that is equivalent to at least the following standard percentages of the electric utility’s total retail electric sales to retail customers in Minnesota...⁴ [Emphasis added]

Had the Legislature intended to limit the location of generation resources as CSG suggests, it would have inserted “located in Minnesota” after “from a carbon-free technology.” CSG’s suggestion to limit compliance to generation located within the state of Minnesota is far beyond the scope and intent of the statute. In addition, limiting CFS eligible generation to that located in the MISO North region or sited in Minnesota would be inconsistent with the long-standing precedent of Eligible Energy Technology Standard (EETS) compliance requirements.

II. PREPAREDNESS AND COMPLIANCE DEMONSTRATION

A. Line Losses

The Department recommends the Commission require utilities to factor line losses into their CFS and RES compliance measurement.⁵ First, recommending changes to the RES, now referred to as the EETS, compliance measurement is outside the scope of this comment period and entirely outside the scope of this docket.

With respect to the CFS, incorporating line losses into preparedness and compliance demonstrations would be in direct conflict with the long-standing, nearly 20-year precedent of awarding RECs based on actual generation and using the awarded RECs to meet statutory obligations based on retail sales. Retirement of RECs to account for line losses has never been a requirement for EETS compliance; EETS compliance has required REC retirement based on our Minnesota retail load. Since the statute gives no indication that the Legislature intended to deviate from the precedent established with EETS compliance, the same process should be applied to CFS compliance demonstration. Incorporating line losses into the compliance demonstration process would require the development of a complicated accounting mechanism to track and determine accurate line losses and would subsequently require additional REC retirements. This would effectively result in the loss of approximately 10 percent of RECs that are available for compliance,⁶ adding to the cost of compliance, and higher

⁴ See Minn. Stat. § 216B.1691, subd. 2g.

⁵ Department’s Reply Comments at 24.

⁶ With the exact amount varying by utility depending on a given utility’s line losses.

retirement fees, and thereby affecting customer costs.

B. Net Market Sales

The CEOs suggest that utilities should distinguish between carbon-free generation attributable to Minnesota and carbon-free generation attributable to net market sales for preparedness and compliance demonstration purposes.⁷ The statute simply requires utilities to generate or procure sufficient electricity generated from a carbon-free energy technology that is equivalent to specific percentages of its total retail electric sales to retail customers in Minnesota. The Commission should reject this suggestion because it goes beyond the statutory intent.

III. REPORTING REQUIREMENTS

A. Detailed Reporting Requirements

The CEOs recommend extensive reporting, even if the Commission does not require hourly matching for compliance.⁸ The CEOs' reporting recommendations should be rejected. RECs are time-stamped by Midwest Renewable Energy Tracking Systems (M-RETS) on a *monthly* basis – not hourly, or even on a daily basis. Again, this CEO recommendation overcomplicates compliance reporting, goes well beyond the plain language of the statute, relies on hourly tracking mechanisms that do not exist – making the analyses impossible – and if it were possible, the recommended reporting would be burdensome with little to no benefits.

B. Compliance True-Up Process

In the event the Commission requires hourly matching, which we oppose, the Department recommends a compliance true-up period that does not match current EETS compliance reporting and as such, would cause conflicts between the CFS and EETS.

Specifically, the Department recommended that CFS compliance reporting occur three months after the conclusion of the reporting year, which is contrary to the nearly 20-year precedent associated with the EETS compliance reporting.⁹ For EETS compliance demonstration, utilities must transfer a sufficient number of RECs to their M-RETS retirement sub-accounts to meet the standards for the prior calendar year by

⁷ CEO Reply Comments at 6-7, Docket No. E999/CI-23-151 (March 19, 2025).

⁸ CEO Reply Comments at 9-10.

⁹ Department Reply Comments at 9.

May 1 and file an annual compliance report by June 1 ;¹⁰ these protocols were established by the Commission’s December 3, 2008 Order in Docket Nos. E999/CI-03-869 and E999/CI-04-1616. For consistency purposes, the compliance process for the CFS should mirror the process for the EETS. RECs retired for the CFS can also be utilized for compliance demonstration purposes with the EETS as allowed by statute.¹¹ Therefore, shortening the CFS compliance demonstration process to three months would effectively also change the longstanding process for EETS compliance to three months.

C. Development of Reporting Templates

We agree with the CEOs suggestion that the Department should update the existing template utilized for EETS compliance and that they should work with stakeholders on the update. Contrary to the Department’s comments that no stakeholder input is needed in the development of a reporting template, we think it is vital that stakeholders be allowed to review and provide input on the template changes for CFS compliance.

MLIG suggests that the preparedness reporting template should include uniform cost reporting requirements to provide transparency and a basis upon which the Commission can determine the necessity of offramps and other mitigations to maintain affordability.¹² The Company notes that the Commission’s Notice of Docket Process and Timeline indicates that the topic of “Off Ramp Process” will be taken up in the next comment period, to be noticed at a future date.¹³ We suggest that MLIG’s comment would be best handled in that next comment period on “Off Ramps.”

IV. MISCELLANEOUS

Interim Targets and REC Banking. CSG recommends that each utility be required to propose interim targets, subject to the Commission’s approval, to demonstrate progress toward 2040 goals starting in 2026 for 2028.¹⁴ This suggestion also goes beyond the intent and scope of the statute, which specifically lays out goals for 2030, 2035 and 2040, and should be rejected.

Similarly, CSG’s recommendation to limit the shelf life of RECs to one year goes against a long-standing, nearly 20-year precedent and should also not be considered.

¹⁰ See Minn. Stat. § [216B.1691](#), subd. 7

¹¹ See Minn. Stat. § [216B.1691](#), subd. 4

¹² MLIG Reply Comments at 4, Docket No. E999/CI-23-151 (March 19, 2025)

¹³ Commission’s Notice of Docket Process and Timeline, Docket No. E999/CI-23-151 (July 7, 2023)

¹⁴ CSG Reply Comments at 4.

Changing this precedent would penalize utilities that produce more than the number of RECs they need in a given year by preventing them from using these RECs at a later date. This could even incent utilities to deploy renewable resources slower than they would if the current precedent of allowing RECs to be carried forward remained. Moreover, changing this precedent would limit an important tool that utilities have to achieve their increasing targets in the most cost-effective way for their customers.

Clean Transition Tariff. Google recommends that the Commission direct utilities to establish a Clean Transition Tariff.¹⁵ We are interested to work with Google on investigating the development of a “Clean Transition Tariff” and expect the Commission’s forthcoming Order in Docket No. E002/RP-24-67 will require us to potentially do the same thing based on an adopted order point requiring us to consult with the Department to consider filing a voluntary carbon free electricity (CFE) procurement program that enables more customers to achieve annual CFE goals.¹⁶ As such, we believe development of a Clean Transition Tariff in this docket would be redundant.

Partial Credits. The Department’s Reply Comments address multiple items pertaining to the issuance of partial credits, if and to what extent biomass should be considered carbon-free, and carbon-free allocators.¹⁷ The Department acknowledges that “these subjects could be discussed in Docket No. E999/CI-24-352...”¹⁸ And they are correct. We believe these matters should be referred to and discussed in the 24-352 docket. Bifurcating the discussion of partial compliance between two separate dockets could lead to inefficiencies. The Company recommends that for clarity, transparency, and completeness, all discussion pertaining to partial compliance occur in Docket No. E999/CI-24-352. Should the Commission disagree, however, we reserve the right to address matters raised by the Department in this docket that pertain to partial compliance (the extent to which biomass should be considered carbon-free and carbon-free allocators) in that docket.

CONCLUSION

Xcel Energy appreciates the opportunity to provide these Supplemental Comments to the Commission regarding implementation of the CFS under Minn. Stat § 216B.1691.
