

Direct Testimony and Schedules
Ellen Heine

Before the Minnesota Public Utilities Commission
State of Minnesota

In the Matter of the Application for a Route Permit for the Mankato – Mississippi
River 345 kV Transmission Line Project in Southeast Minnesota

Docket No. E002/TL-23-157
OAH Docket No. 65-2500-40099

**Direct Testimony of Ellen Heine
on behalf of Northern States Power Company,
doing business as Xcel Energy**

March 28, 2025

1 **I. INTRODUCTION AND QUALIFICATIONS**

2

3 Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

4 A. My name is Ellen Heine, and my business address is 401 Nicollet Mall,
5 Minneapolis, Minnesota 55401.

6

7 Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

8 A. I am employed as a Principal Siting and Permitting Agent by Xcel Energy
9 Services Inc. (XES), the service company provider for Northern States Power
10 Company, doing business as Xcel Energy (Xcel Energy or Applicant).

11

12 Q. PLEASE DESCRIBE YOUR QUALIFICATIONS AND EXPERIENCE.

13 A. I have a Bachelor of Arts degree in Biology and Chemistry from the University
14 of Minnesota-Morris, and a Masters in Urban and Regional Planning from the
15 University of Minnesota. Earlier in my career, I was employed by Minnehaha
16 Creek Watershed District as a Land Conservation Specialist and by the
17 Metropolitan Council of the Twin Cities as a GIS Technician. I have been
18 employed by Xcel Energy since 2011, first as a Compliance/Permitting
19 Analyst, later as a Sr. Siting and Permitting Agent and, starting in 2022, in my
20 current position. My job duties include developing routing and siting for
21 transmission and renewable energy projects including working with
22 landowners, local governments, public agencies and consultants; coordinating
23 with team members, agency staff, consultants and construction managers and
24 crews on permitting and compliance requirements for projects; acquiring
25 federal and state permits for wetlands, water and land crossings; managing
26 compliance filings and tasks related to permitted projects; My resume is
27 attached to this testimony as **Schedule 1**.

1
2 Q. FOR WHOM ARE YOU TESTIFYING?

3 A. I am testifying on behalf of the Applicant in this proceeding, Xcel Energy.
4

5 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

6 A. On April 2, 2024, Northern States Power Company, doing business as Xcel
7 Energy (Applicant) filed a Joint Certificate of Need and Route Permit
8 Application (Application) with the Minnesota Public Utilities Commission
9 (Commission) for the Mankato – Mississippi 345 kV Transmission Project
10 (Project). The purpose of my testimony is to describe the proposed Project
11 and Xcel Energy's routing process. I will also discuss the route and alignment
12 alternatives proposed for the Project and summarize Xcel Energy's analysis of
13 these alternatives. I will then discuss Xcel Energy's Preferred Route for the
14 Project. Finally, I will describe Xcel Energy's coordination with state agencies
15 and outreach with local government units and landowner since the filing of
16 the Application.
17

18 Q. ARE YOU SPONSORING ANY SCHEDULES?

19 A. Yes. The following Schedules are attached to my testimony:

- 20 • Schedule 1: Statement of Qualifications;
- 21 • Schedule 2: Summary of Xcel Energy's Position on Route and
22 Alignment Alternatives;
- 23 • Schedule 3: Maps of Xcel Energy's Preferred Route and Route and
24 Alignment Alternatives; and
- 25 • Schedule 4: Copy of the February 2025 Local Government Unit and
26 Landowner Mailing.
27

II. PROJECT OVERVIEW

Q. PLEASE GENERALLY DESCRIBE THE PROJECT.

A. The Project consists of a new, approximately 130-mile, 345 kV transmission line between the Wilmarth Substation in Mankato, Minnesota and the Mississippi River, and a new, approximately 20-mile 161 kV transmission line between the North Rochester Substation and an existing transmission line northeast of Rochester, Minnesota. In the Application, the Project was divided up into four segments: Segments 1, 2 and 3 making up the 345 kV portion and Segment 4 the 161 kV portion. Each of these segments are described below:

- **Segment 1**, Wilmarth to West Faribault—a new 345 kV transmission line between the existing Wilmarth Substation and a point near the existing West Faribault Substation.
- **Segment 2**, West Faribault to North Rochester—a new 345 kV transmission line between a point near the existing West Faribault Substation and the existing North Rochester Substation.
- **Segment 3**, North Rochester to Mississippi River—a new 345 kV transmission line between the existing North Rochester Substation and the Mississippi River. This segment involves converting about 27 miles of existing 161/345 kV transmission line to 345/345 kV operation¹ and

¹ As part of the route permit for the CapX2020 Hampton – Rochester – La Crosse 345 kV Transmission Project, the Commission authorized Xcel Energy to construct this segment with 345/345 kV double-circuit structures with 345 kV conductors on both sides but to energize this segment at 345/161 kV initially until there is a need for a second 345 kV circuit. *See In the Matter of Xcel Energy's Application for a Route Permit for the CapX 2020 Hampton – Rochester – La Crosse High Voltage Transmission Line*, Docket No. E002/TL-09-1448, ORDER ISSUING ROUTE PERMIT AS AMENDED at 2 (May 30, 2012). The existing 161 kV transmission line on this portion of Segment 3 is a portion of the existing North Rochester – Chester 161 kV transmission line.

installing about 16 miles of new 345 kV circuit on existing 345/345 double-circuit structures.²

- **Segment 4**, North Rochester to Chester—relocation of a portion of an existing 161 kV transmission line which is needed because a portion of the new 345 kV line in Segment 3 would displace the 161 kV line where it is currently double-circuited with an existing 345 kV line.

The Project also includes upgrades at the existing Wilmarth and North Rochester substations and potential upgrades at the Eastwood Substation depending on which route is selected for the Project.

III. XCEL ENERGY'S PROPOSED ROUTES

Q. WHAT ROUTES DID XCEL ENERGY PROPOSE FOR THE PROJECT IN ITS APPLICATION?

A. After a thorough route development process that studied and analyzed numerous potential routes and route segments, Xcel Energy identified two end-to-end route alternatives for Segments 1, 2, and 4 of the Project in its Application. Since Segment 3 involves using existing structures, either converting an existing 161/345 kV transmission line to 345/345 kV operation or installing a new 345 kV circuit on existing double-circuit structures, only one route was proposed by Xcel Energy for this segment. In addition to these end-to-end routes, Xcel Energy also provided five alternative segments and three connector segments in the Application.

² The existing 161 kV transmission line on this portion of Segment 3 is Dairyland Power Cooperative's Q-3 line that will need to be relocated to accommodate the new 345 kV circuit on these existing double-circuit structures. Dairyland has separately filed a route permit application for relocation of this 161 kV transmission line. *See In the Matter of the Application of Dairyland Power Cooperative for a Route Permit for the Wabasha Relocation 161 kV Transmission Line Project in Wabasha County*, Docket No. ET-3/TL-23-388.

1
2 Q. HOW DID XCEL ENERGY IDENTIFY THE ROUTES PRESENTED IN THE
3 APPLICATION?

4 A. As described in Section 6.0 of the Application, Xcel Energy conducted a route
5 selection process beginning 2022 and extending through late-2023. This
6 process included consideration of statutory and rule routing requirements,
7 identification and review of existing transmission lines and linear
8 infrastructure, information gathering and data compilation, public outreach
9 and input, meeting with and collecting stakeholder comments, including
10 Tribal government contacts, federal and state agencies and local units of
11 government, and comparison of route segments and alignments.

12
13 Xcel Energy further developed a geographic information system (GIS)
14 database of information gathered from publicly available data resources and
15 from in-field routing review efforts. The data collected was used to compare
16 the merits of various routing options with the goal of developing routes that
17 minimized impacts to sensitive resources to the greatest extent practicable. In
18 addition, Xcel Energy compared the routes to the statutory criteria outlined in
19 Minn. Stat. § 216E.03, subd. 7(b) and Minn. R. 7850.4100.

20
21 Q. WHAT STEPS DID XCEL ENERGY TAKE TO IDENTIFY, REFINE, AND COMPARE
22 ROUTE OPTIONS PRIOR TO FILING THE APPLICATION?

23 A. To identify, refine, and compare route options, Xcel Energy took the
24 following steps to gather information on developing potential routes:

- 25 • Established boundaries for Project Study Area;
- 26 • Identified opportunities and constraints;
- 27 • Developed preliminary route alternatives;

- Conducted tribal, local government and agency outreach;
- Conducted initial landowner outreach;
- Reviewed initial route network in the field;
- Held public open house meetings;
- Reviewed and refined routes based on feedback and analysis, ran comparative analysis to remove most impactful routes;
- Conducted a second round of public open house meetings;
- Reviewed, refined routes, ran comparative analysis to remove most impactful routes. Optimized route segments and connected to create end-to-end routes included in the Route Permit Application; and
- Conducted constructability review of end-to-end routes.

Xcel Energy's route development process is discussed in greater detail in Section 6.2 of the Application.

Q. WHAT ROUTING CONSTRAINTS DID XCEL ENERGY CONSIDER?

A. To avoid or minimize impacts on the environment and landowners, the Applicant identified the following routing constraints within the Project Study Area:

- Residences;
- Municipal boundaries;
- Tribally-owned properties;
- Federally-owned properties;
- State-owned properties;
- Lakes, rivers, and calcareous fens;
- Public airports; and

- Regional, county, and municipal Parks.

Additional information about the routing constraints considered by Xcel Energy is provided in Section 6.2.2 of the Application.

Q. DID XCEL ENERGY TAKE ANY ADDITIONAL STEPS TO MINIMIZE IMPACTS OF THE PROJECT ON THE ENVIRONMENT AND AFFECTED LANDOWNERS?

A. Yes, Xcel Energy identified routing opportunities that would share existing rights-of-way or follow existing linear features. Xcel Energy searched for the following opportunities:

- Locations with the opportunity to double-circuit with or parallel existing transmission lines;
- Locations with the opportunity to parallel a roadway, and potentially share public rights-of-way between the transmission line and road, and avoid the constraints listed above;
- Locations with the opportunity to place the proposed transmission line centerline on a field or property line, where land uses could continue to be uninterrupted in the transmission line easement; and
- Routes that reduce the number of two-pole angle or dead-end structures by following straight lines.

Additional information about the routing opportunities considered by Xcel Energy is provided in Section 6.2.2 of the Application.

Q. DID XCEL ENERGY PROPOSE ANY ROUTE OR ALIGNMENT ALTERNATIVES DURING THE SCOPING PROCESS FOR THE ENVIRONMENTAL IMPACT STATEMENT (EIS)?

A. Yes. During the scoping process, Xcel Energy requested that the EIS analyze three new route segment alternatives and one alignment alternative.³ In addition, Xcel Energy requested that Segment Alternative 1L be removed from consideration as a potential route to avoid potential conflicts with CenterPoint Energy's gas wells in this area.⁴ A summary of the end-to-end routes proposed by the Xcel Energy in both the Application and as part of the scoping process is provided in Table 1 below.

Table 1
Applicants' Proposed End-to-End Routes

Route Option	General Description
Segment 1 – Mankato to Faribault (345 kV)	
1 North	Follows existing Xcel Energy owned 115 kV transmission line between the cities of Mankato and Faribault. Would double-circuit the new 345 kV line with an existing 115 kV line.
1 South	Follows existing Xcel Energy owned 69 kV and 115 kV lines between the cities Mankato and Faribault. Follows roads and property lines in areas where not following transmission lines. Would double-circuit the 345 kV line with existing transmission lines (for approximately 72 percent of the route).
Segment 2 – Faribault to Pine Island (North Rochester Substation) (345 kV)	
2 North	Includes a combination of paralleling roads and double-circuited with an existing 69 kV transmission line between the cities of

³ *In the Matter of the Application for a Certificate of Need for the Mankato to Mississippi River 345 kV Transmission Project*, Docket No. E002/CN-22-532, XCEL ENERGY SCOPING COMMENTS (July 3, 2024); *In the Matter of the Application for a Certificate of Need for the Mankato to Mississippi River 345 kV Transmission Project*, Docket No. E002/CN-22-532, XCEL ENERGY RESPONSE TO ENVIRONMENTAL IMPACT STATEMENT SCOPING COMMENTS (Aug. 28, 2024).

⁴ *In the Matter of Application for a Route Permit for the Mankato to Mississippi River 345 kV Transmission Project in Southern Minnesota*, Docket No. E002/TL-23-157, XCEL ENERGY REQUEST TO REMOVE SEGMENT ALTERNATIVE 1L (Nov. 8, 2024).

	Faribault and Zumbrota. Eastern portion of this route would be double-circuited with existing Hampton to North Rochester 345 kV line.
2 South	Includes a combination of paralleling existing roads and property lines. Smaller portions would be double-circuited with existing 161 kV and 345 kV line on either end.
Segment 3 – North Rochester Substation to Mississippi River (345 kV)	
3	Follows/uses the second circuit position on the existing North Rochester to La Crosse 345 kV transmission line. Segment 3 does not require any new right-of-way.
Segment 4 – North Rochester Substation to Chester Line (161 kV)	
4 East	Follows Highway 52 between Pine Island and Highway 63, then follows Highway 63/75th Street east where it would be double-circuited with an existing 69 kV line.
4 West	Parallels existing 161 kV and 345 kV lines south from Pine Island, then turns and follows a combination of roads and property lines to the east.
4 West with Double-Circuiting (Route Segment 13)	Double-circuits with the existing North Rochester to Northern Hills 161 kV transmission line for 11.3 miles starting at the North Rochester Substation and then connecting with Route Option 4 West.

IV. OTHER ROUTE AND ALIGNMENT ALTERNATIVES

Q. ARE ROUTES OR ALIGNMENTS OTHER THAN THOSE PROPOSED BY XCEL ENERGY BEING CONSIDERED AND ANALYZED IN THIS PROCEEDING?

A. Yes. During the scoping process for the EIS, members of the public proposed several route and alignment alternatives for the Project. The Department of Commerce, Energy Environmental Review and Analysis (DOC-EERA) staff is currently preparing an EIS that will include an evaluation of the routes proposed by Xcel Energy as well as all of the route alternatives and alignment alternatives that were included in the scoping

1 decision issued on December 2, 2024.⁵ These alternatives, along with the Xcel
2 Energy proposed routes are shown in **Schedule 3, Figure 1**. Ultimately, the
3 Commission will select the final route for the Project.

4
5 Q. DID XCEL ENERGY CONDUCT ITS OWN ANALYSIS OF THE ROUTE AND
6 ALIGNMENT ALTERNATIVES THAT WERE ADDED DURING THE SCOPING
7 PROCESS AND ARE BEING STUDIED IN THE EIS?

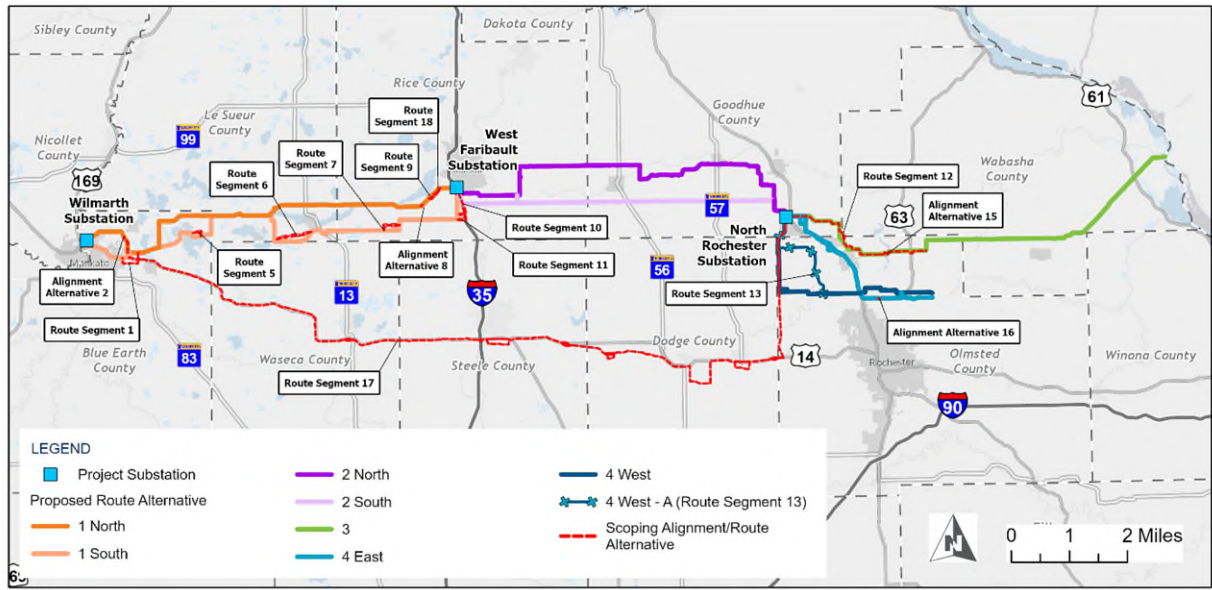

8 A. Yes. Xcel Energy has analyzed the route and alignment alternatives that were
9 added during the scoping process. **Schedule 2** to my Direct Testimony
10 provides Xcel Energy's current position on each alternative. I note that our
11 analysis is ongoing and that the record in this proceeding will continue to
12 develop as the draft EIS and final EIS are issued, additional written comments
13 are received, and comments are made at the public hearings in May 2025. A
14 map of all of the route and alignment alternatives is provided as **Schedule 3,**
15 **Figure 1** to my Direct Testimony and in Figure 1 below.

16

⁵ *In the Matter of the Application for Route Permit for the Mankato to Mississippi River 345 kV Transmission Project in Southern Minnesota*, Docket No. E002/TL-23-157, MINNESOTA DEPARTMENT OF COMMERCE ENVIRONMENTAL IMPACT SCOPING DECISION (Dec. 2, 2024).

1

Figure 1. Overview of Route and Alignment Alternatives

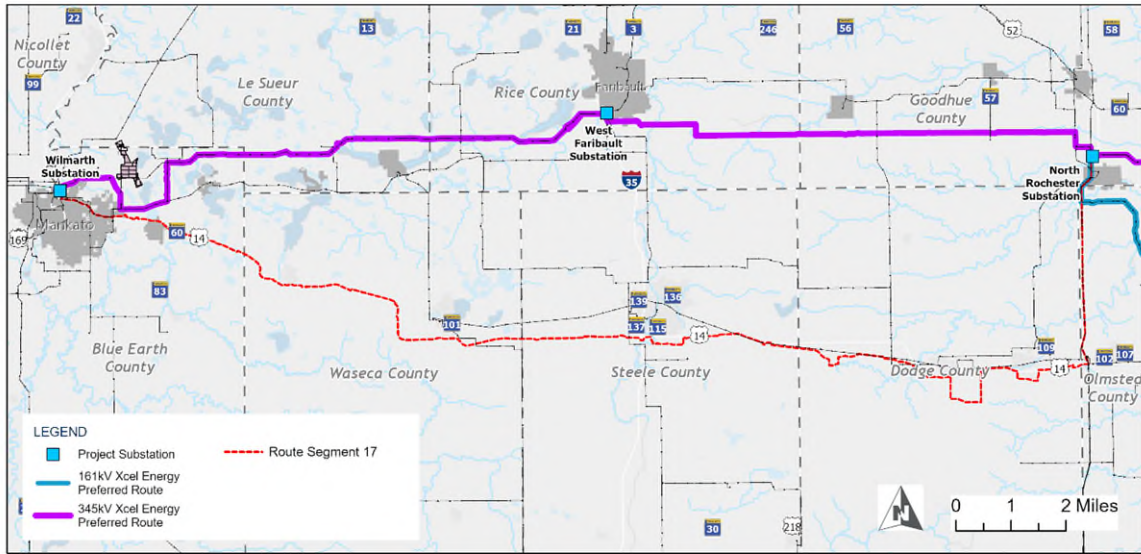

2

3 Q. ARE THERE ANY ROUTE ALTERNATIVES THAT YOU WOULD LIKE TO DISCUSS
4 FURTHER, BEYOND THE ANALYSIS PRESENTED IN SCHEDULE 2?

5 A. Yes, I would like to further discuss Xcel Energy's position regarding Route
6 Segment 17 that came in as part of the EIS scoping decision. Route Segment
7 17 is a route alternative for Segments 1 and 2 of the Project that follows State
8 Highway 14 from south of the Wilmarth Substation to Byron. At Byron,
9 Route Segment 17 travels north to the North Rochester Substation. A map of
10 Route Segment 17 and Xcel Energy's Preferred Route for Segments 1 and 2
11 is provided below as Figure 2.

12

Figure 2. Route Segment 17 and Xcel Energy's Preferred Route

Q. WHAT IS XCEL ENERGY'S POSITION ON ROUTE SEGMENT 17?

A. Xcel Energy did not select Route Segment 17 as part of its Preferred Route for the 345 kV portion of this Project. This is due to the fact that Route Segment 17 is longer, has greater residential impacts as compared to Xcel Energy's Preferred Route, has the potential to impact future Minnesota Department of Transportation (MnDOT) projects along Highway 14, would not accommodate a future 345 kV connection at the West Faribault Substation, would pose routing challenges for future MISO-approved transmission projects, and is more costly than Xcel Energy's Preferred Route.

With regard to environmental impacts, Xcel Energy has performed an initial review of the environmental impacts of Route Segment 17 as compared to Xcel Energy's Preferred Route for Segment 1 and Segment 2. As compared to Xcel Energy's Preferred Route, Route Segment 17 is approximately 19 miles longer in length. This longer length means a higher number of structures and greater environmental impacts as compared to the shorter Preferred Route for

1 Segments 1 and 2. Route Segment 17 also has a higher number of residences
2 within close proximity to the proposed centerline as compared to the
3 comparable portion of Xcel Energy's Preferred Route for Segments 1 and 2.
4 Specifically, there are approximately 347 residences within 500 feet of the
5 centerline for Route Segment 17 as compared to 117 residences within 500
6 feet of the comparable portion of Segments 1 and 2 of Xcel Energy's Preferred
7 Route.

8
9 As Route Segment 17 follows Highway 14 for approximately 75.9 miles,
10 MnDOT filed a letter on March 10, 2025, discussing its initial review of this
11 alternative.⁶ In this letter, MnDOT identified that there are certain areas along
12 this route alternative that will likely be in conflict with future MnDOT
13 highway improvements. In addition, in its March 10, 2025 letter, MnDOT
14 stated that Xcel Energy needs to submit a Constructability Report so that
15 MnDOT can determine whether Route Segment 17 will be permissible by
16 MnDOT. On March 25, 2025, Xcel Energy met with MnDOT staff to
17 coordinate and discuss preparation of the Constructability Report,
18 data/analysis, timeline and process for reviewing and approving this report.
19 Xcel Energy is currently working on this Constructability Report and will
20 provide updates regarding submission and MnDOT's review as they are
21 available.

22
23 In addition, Xcel Energy did not include Route Segment 17 in its Preferred
24 Route for the Project because it did not meet the Project needs as well as the

⁶ *In the Matter of the Application for Route Permit for the Mankato to Mississippi River 345 kV Transmission Project in Southern Minnesota*, Docket No. E002/TL-23-157, MINNESOTA DEPARTMENT OF TRANSPORTATION LETTER (March 10, 2025).

1 Preferred Route. As noted in Xcel Energy's August 28, 2024 scoping
2 comments, Route Segment 17 does not offer the same opportunities to
3 accommodate future expansion of the transmission system as the routes
4 proposed by Xcel Energy.⁷ All of the routes proposed by Xcel Energy are
5 routed near the existing West Faribault Substation. As explained in Section 2.7
6 of the Application, this was done to allow the potential for a future 345 kV
7 connection into the West Faribault Substation to support greater renewable
8 generation in this area. By routing the new 345 kV transmission line as close
9 as possible to the West Faribault Substation, there is an ability to make this
10 future new 345 kV connection while also avoiding and minimizing impacts.
11 In contrast, the Route Segment 17 would place the new 345 kV transmission
12 line approximately 15 miles to the south of the West Faribault Substation and
13 any future 345 kV connection into this substation would require a new 15-
14 mile 345 kV line from Highway 14 north to the West Faribault Substation.

15
16 Xcel Energy does not prefer Route Segment 17 as it will make routing future
17 transmission lines more challenging. Route Segment 17 requires a new
18 approximately 13-mile long 345 kV connection from Byron to the North
19 Rochester Substation after this alternative leaves Highway 14. There is already
20 a 345 kV transmission line in this corridor (i.e., the Pleasant Valley – North
21 Rochester 345 kV line). In December 2024, MISO approved its Tranche 2.1
22 portfolio of projects.⁸ One of the projects that was approved by MISO was
23 the Pleasant Valley – North Rochester – Hampton Corner 345 kV project.
24 This Tranche 2.1 project involves rebuilding the existing 345 kV from Pleasant

⁷ *In the Matter of the Application for a Certificate of Need for the Mankato to Mississippi River 345 kV Transmission Project*, Docket No. E002/CN-22-532, XCEL ENERGY RESPONSE TO ENVIRONMENTAL IMPACT STATEMENT SCOPING COMMENTS (August 28, 2024).

⁸ [https://www.misoenergy.org/meet-miso/media-center/miso-matters/transforming-the-grid-misos-\\$21.8-billion-tranche-2.1-transmission-portfolio](https://www.misoenergy.org/meet-miso/media-center/miso-matters/transforming-the-grid-misos-$21.8-billion-tranche-2.1-transmission-portfolio).

1 Valley to North Rochester as a double-circuit 345/345 kV line. The Tranche
2 2.1 portfolio of projects also includes a new 765 kV transmission line from
3 Pleasant Valley to North Rochester. Given these two new Tranche 2.1
4 projects are planned for this corridor, double-circuiting this Project with a
5 portion of the existing Pleasant Valley to North Rochester 345 kV line would
6 make the routing for these two new Tranche 2.1 projects more challenging.

7
8 Finally, as discussed in the Direct Testimony of Company witness Tony
9 Wendland, Route Segment 17 is more expensive than the comparable portions
10 of Xcel Energy's Preferred Route for Segments 1 and 2.

11 **V. XCEL ENERGY'S PREFERRED ROUTE**

12
13
14 Q. HAS XCEL ENERGY IDENTIFIED ITS PREFERRED ROUTE FOR THE PROJECT
15 BASED ON ITS ANALYSIS CONDUCTED TO DATE?

16 A. Yes. Based on the analysis conducted thus far, Xcel Energy has identified a
17 Preferred Route within each of the four segments of the Project. A map of
18 Xcel Energy's Preferred Route is shown on **Schedule 3, Figure 2** to my
19 Direct Testimony and in the figure below.

Figure 3. Xcel Energy's Preferred Route

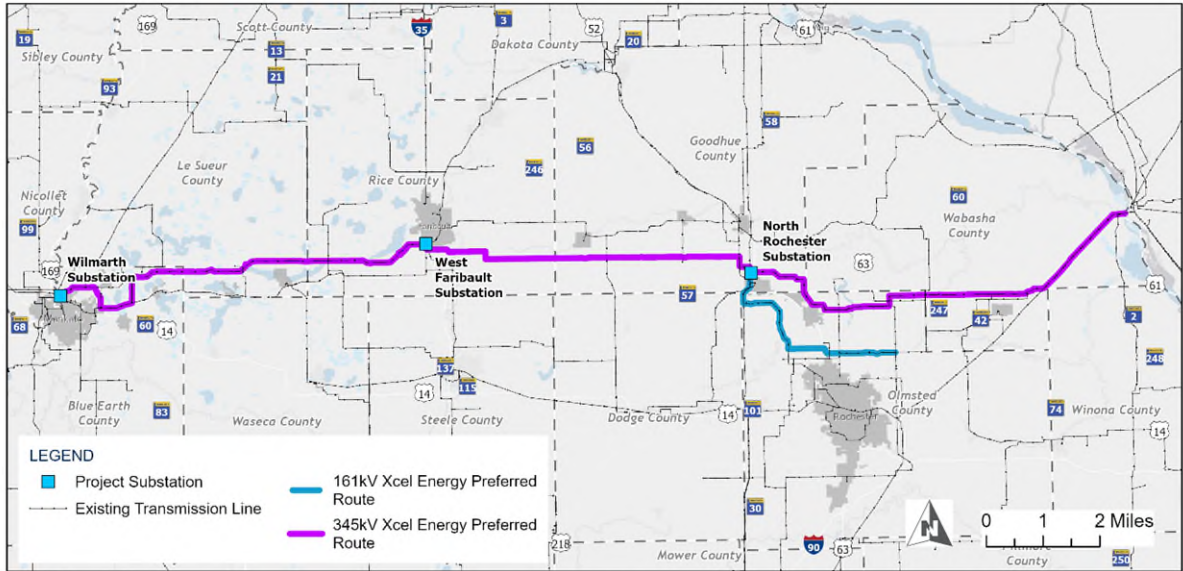

Table 2 below provides a summary of route subsegments, alternatives, and alignments that make up Xcel Energy's Preferred Route.

Table 2
Xcel Energy's Preferred Route

Segment	Route Subsegments, Route Alternatives, and Alignment Alternatives Included ⁹
Segment 1	1A, 1O, 1I, 1F, 1E, 1D (includes scoping alternatives Route Segments 9, 18, and 1F)
Segment 2	2A, 2B, 2D, 2F, and 2G
Segment 3	3A, 3B, and 3C
Segment 4	4I, 4J, 4N-East, and 4S

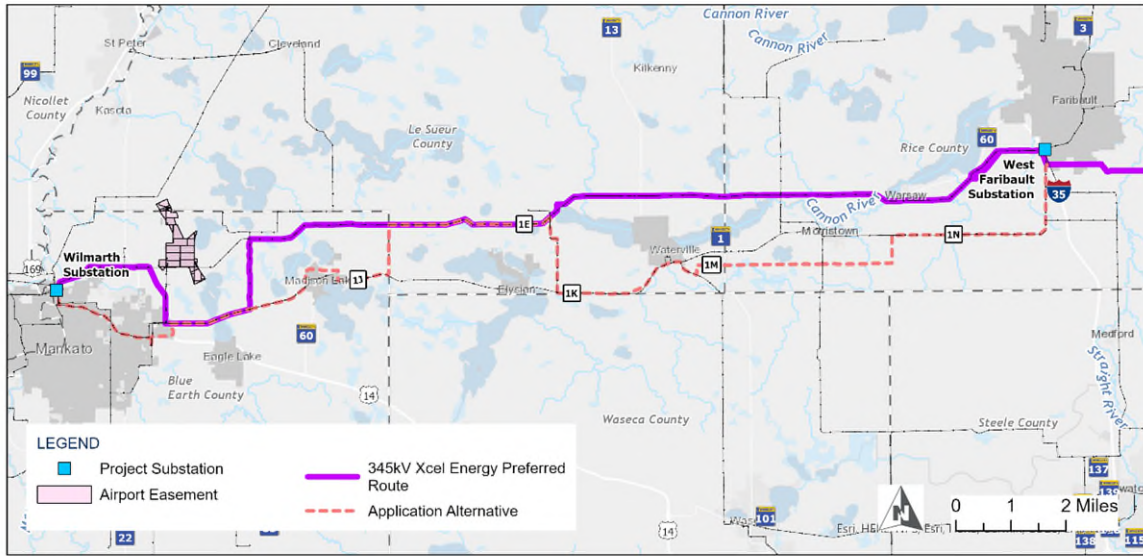

Q. PLEASE DESCRIBE XCEL ENERGY'S PREFERRED ROUTE FOR SEGMENT 1.

A. For Segment 1, Xcel Energy's Preferred Route is shown in **Schedule 3, Figure 3** and in Figure 4 below. This route generally follows, and would be double-circuited with, an existing 115 kV transmission line, with the exception

⁹ The route subsegments for each segment are described and shown in the Application at 123, 127, 131, and 133.

1 of a section that diverges from the 115 kV line to avoid avigation easements
2 surrounding the Mankato Airport. That section follows an existing double-
3 circuit 115/115 kV line south to an existing 69 kV corridor, where it would be
4 double-circuited parallel to an existing trail. Xcel Energy prefers this route for
5 Segment 1 because it uses the existing 115 kV right-of-way to the greatest
6 extent possible, thus minimizing the amount of new right-of-way that is
7 needed. In addition, as compared to the other route alternative for Segment
8 1, it has fewer homes within close proximity to the proposed centerline than
9 the other route alternatives. Xcel Energy's Preferred Route has 70 residences
10 within 500 feet of the anticipated centerline as compared to 142 residences
11 within 500 feet of the anticipated centerline of the other route alternatives in
12 Segment 1. Xcel Energy's Preferred Route is also shorter, at 42 miles in
13 length, as compared to 47-49 miles long for the other route alternatives. The
14 Preferred Route for Segment 1 also avoids timing and constructability
15 constraints that are present with the alternative routes for Segment 1.
16 Specifically, as described in the Application, one of these route alternatives,
17 Route Option 1 South, requires installing equipment at the Eastwood
18 Substation to re-terminate the existing 69 kV line between the Wilmarth and
19 Eastwood substations at Eastwood before construction on the new 345 kV
20 transmission line could begin.
21

Figure 4. Xcel Energy's Preferred Route for Segment 1

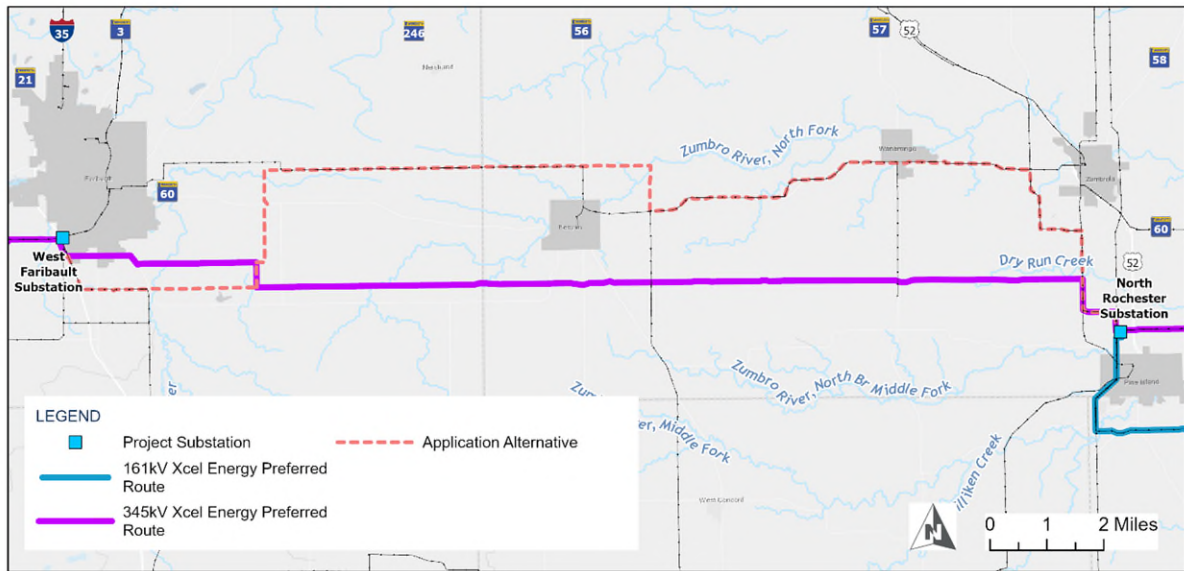

Q. PLEASE DESCRIBE XCEL ENERGY'S PREFERRED ROUTE FOR SEGMENT 2.

A. For Segment 2, Xcel Energy's Preferred Route is shown in **Schedule 3, Figure 4** and in Figure 5 below. This route generally follows a combination of property lines and/or roads until it reaches the existing Hampton Corner to North Rochester 345 kV transmission line, where it would be installed on those existing, double-circuit capable, structures for approximately 2.5 miles to the North Rochester Substation.

Xcel Energy prefers this route for Segment 2 because it is shorter in length than the alternative route (34 miles long versus 42.5 miles) and it crosses fewer acres of wetlands (129 acres within the route width for Preferred Route versus 314 acres for the alternative route). While the alternative route for Segment 2 generally follows an existing 69 kV line that runs along state and local roads, a 69 kV line has a much narrower right-of-way than the 150 foot wide right-of-way required for the new 345 kV line. As a result, the alternative route will be required to diverge from the existing 69 kV transmission right-of-way at

multiple locations to avoid displacing existing residences. For instance, the alternative route will need to leave the 69 kV right-of-way near the cities of Faribault and Kenyon to avoid displacing homes in these and other residentially dense areas. The alternative route will also need to cross back and forth across the road several times to avoid homes that are located within close proximity of the 69 kV line and the road.

Figure 5. Xcel Energy's Preferred Route for Segment 2

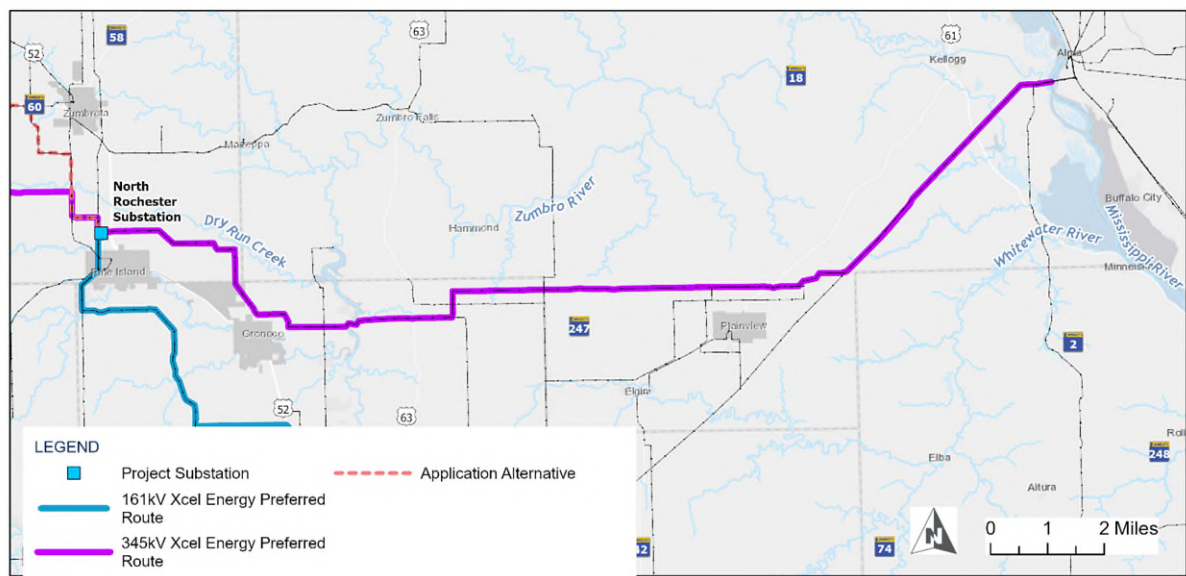

Q. PLEASE DESCRIBE XCEL ENERGY'S PREFERRED ROUTE FOR SEGMENT 3.

A. There is currently only one route under consideration for Segment 3, Route Option 3 which is shown in **Schedule 3, Figure 5** and in Figure 6 below. This is due to the fact that Segment 3 involves either converting an existing 161 kV to 345 kV operation or stringing an additional 345 kV circuit on existing double-circuit 345/345 kV capable structures. No additional right-of-way would be required for this work. This segment was previously permitted by

the Commission as part of the Hampton – La Crosse Project in 2012.¹⁰ An alternative route is not included for Segment 3 because route alternatives to this segment were evaluated as part of the route permit proceeding for the Hampton – La Crosse Project.

Figure 6. Xcel Energy's Preferred Route for Segment 3

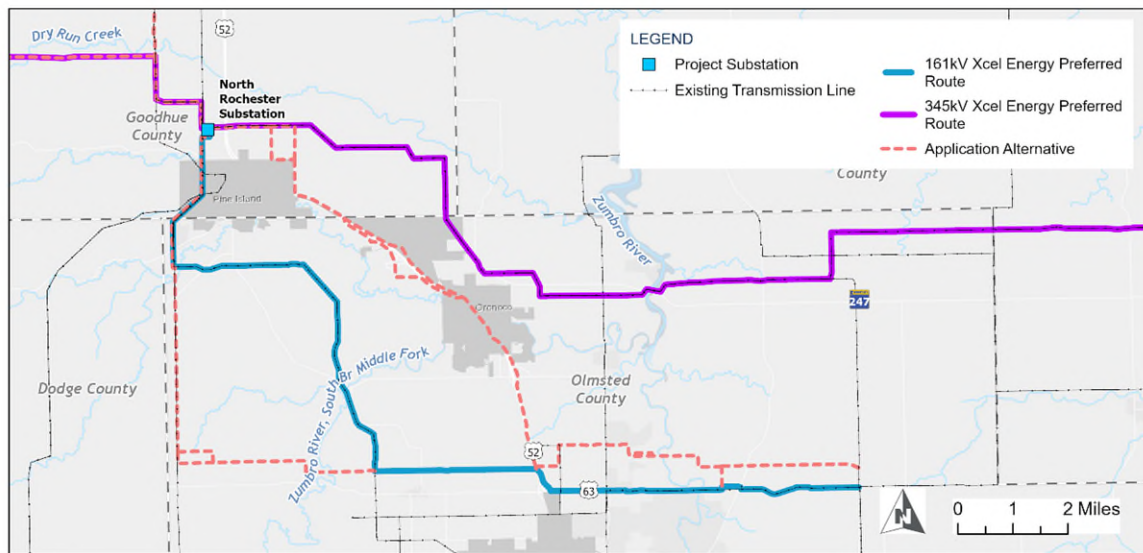

Q. PLEASE DESCRIBE XCEL ENERGY'S PREFERRED ROUTE FOR SEGMENT 4.

A. For Segment 4, Xcel Energy's Preferred Route is shown in **Schedule 3, Figure 6** and in Figure 7 below. Xcel Energy's Preferred Route for Segment 4 generally follows existing transmission lines and roads between the North Rochester Substation and its intersection with the existing 161 kV line. Xcel Energy prefers this route for Segment 4 because it maximizes the amount of shared right-of-way with existing transmission lines as compared to the alternatives. Xcel Energy's Preferred Route for Segment 4 is double-circuited

¹⁰ In the Matter of Xcel Energy's Application for a Route Permit for the CapX2020 Hampton – Rochester – La Crosse High Voltage Transmission Line, Docket No. E002/TL-09-1448, ORDER ISSUING ROUTE PERMIT AS AMENDED (May 30, 2012).

with an existing 69 kV line for 6.4 miles and double-circuited with an existing 161 kV line for approximately 11.3 miles. In total, Xcel Energy's Preferred Route shares existing transmission line right-of-way for 17.7 miles of its 22.2-mile length or for nearly 80 percent of its total length. Sharing existing transmission line rights-of-way when practicable minimizes new impacts to residences and the environment.

Figure 7. Xcel Energy's Preferred Route for Segment 4

VI. STAKEHOLDER COORDINATION

Q. IN ITS JUNE 26, 2024 ORDER, THE COMMISSION AUTHORIZED XCEL ENERGY TO INITIATE CONSULTATION WITH THE MINNESOTA STATE HISTORIC PRESERVATION OFFICE (SHPO) REGARDING THE PROJECT TO DETERMINE APPROPRIATE TREATMENT AND TO FIND WAYS TO AVOID AND MITIGATE ANY ADVERSE EFFECTS ON DESIGNATED OR LISTED CULTURAL RESOURCES.¹¹

¹¹ In the Matter of the Application of Xcel Energy for a Certificate of Need and Route Permit for the Mankato – Mississippi River 345 kV Transmission Line Project in Southeast Minnesota, Docket No. E002/CN-22-532, ORDER ACCEPTING

1 PLEASE DESCRIBE XCEL ENERGY'S COORDINATION WITH SHPO AND
2 ANALYSIS OF CULTURAL RESOURCES PRIOR TO FILING THE APPLICATION.

3 A. Xcel Energy contacted SHPO on March 7, 2023, to request information on
4 known cultural resources within the Project Cultural Resources Review Area
5 (CCRA). SHPO responded on March 10, 2023, with a Microsoft Access
6 database file containing all known records of cultural resources within the
7 Project CCRA. This dataset was incorporated into Section 6.5 of the
8 Application. On May 1, 2023, Xcel Energy sent the initial outreach letter to
9 SHPO, the Office of the State Archaeologist (OSA), and the Minnesota Indian
10 Affairs Council (MIAC) describing the Project and requesting comments. Xcel
11 Energy then prepared a draft Cultural Resources Literature Review (Literature
12 Review) of the Project CCRA and submitted a copy of that to the Minnesota
13 SHPO along with a completed Request for Project Review form on February
14 16, 2024.

15
16 Q. HAS XCEL ENERGY CONSULTED WITH SHPO SINCE THE FILING OF THE
17 APPLICATION?

18 A. Yes. The SHPO responded to the Literature Review submission in a letter
19 dated May 1, 2024, and assigned the Project SHPO Number 2024-1231.
20 Considering the broad nature of the Literature Review, and the fact the Project
21 was still in the process of investigating route options as part of the route
22 permit process, the SHPO did not provide specific comments or
23 recommendations on the Project. On October 15, 2024, the Commission
24 submitted a letter to both Xcel Energy and the SHPO authorizing Xcel Energy
25 and its authorized representatives to act on the Commission's behalf to

1 consult with the SHPO regarding compliance with the Minnesota Historic
2 Sites Act.

3
4 On March 21, 2025, Xcel Energy contacted SHPO staff to request a meeting
5 to discuss updates to the Project and status of the EIS being prepared by
6 DOC-EERA staff, review additional cultural resources literature review work
7 being completed for additional route alternatives that were added during
8 scoping, and discuss future planned cultural resources field studies that will be
9 completed once the final route is determined by the Commission and ongoing
10 coordination with the SHPO and Tribes engaged in this Project.

11
12 Q. HAS XCEL ENERGY COORDINATED WITH OTHER STATE AGENCIES SINCE
13 FILING THE APPLICATION?

14 A. Yes, Xcel Energy has coordinated with MnDOT and the Minnesota
15 Department of Natural Resources (MnDNR).

16
17 Q. PLEASE DESCRIBE XCEL ENERGY'S COORDINATION WITH THE MNDOT SINCE
18 THE FILING OF THE APPLICATION.

19 A. On November 22, 2024, Xcel Energy submitted an Early Notification Memo
20 (ENM) request to address new route alternatives that were added during
21 scoping for the Project. On November 26, 2024, MnDOT requested
22 clarification of the alignment/intended use of Interstate 35 for ENM-4 which
23 Xcel Energy responded to later that day. On January 17, 2025, Xcel Energy
24 submitted a supplemental ENM request to MnDOT for Route Option 4 West
25 A which was not included in the November 22, 2024, request. MnDOT
26 responded that it had no interests or assets along this route alternative that
27 would be affected and recommended contacting the MnDNR concerning the

1 portion of this route alternative involving the Douglas State Trail. On March
2 10, 2025, MnDOT formally respond to these ENM requests and filed their
3 response with the Commission.¹² In this letter, MnDOT outlined potential
4 impacts of the route alternatives, suggested mitigative measures, and potential
5 permit limitations/requirements.

6
7 Q. PLEASE DESCRIBE XCEL ENERGY'S COORDINATION WITH THE MNDNR SINCE
8 THE FILING OF THE APPLICATION.

9 A. On January 13, 2025, Xcel Energy submitted a MnDNR Natural Heritage
10 Review request to the MnDNR via the Minnesota Conservation Explorer to
11 address the additional route alternatives that were added during scoping. On
12 March 10, 2025, Xcel Energy contacted the MnDNR for an update on the
13 status of this review and was informed MnDNR response would be issued
14 three months from the date of the initial request. Upon receipt of response
15 from MnDNR, Xcel Energy will provide this information to DOC-EERA and
16 file it in the docket.

17 18 **VII. PUBLIC ENGAGEMENT**

19 Q. HAS XCEL ENERGY CONDUCTED ANY ADDITIONAL PUBLIC ENGAGEMENT
20 SINCE THE FILING OF THE APPLICATION?

21 A. Yes. Since the filing of the Application, Xcel Energy has updated the Project
22 website on multiple occasions to keep the public informed about the dates
23 and times for the scoping meetings, the route alternatives included in the
24 scoping decision, and ways to comment in the proceeding. Xcel Energy also
25 sent a mailing out in February 2025 to local units of government and

¹² *In the Matter of the Application for Route Permit for the Mankato to Mississippi River 345 kV Transmission Project in Southern Minnesota*, Docket No. E002/TL-23-157, MINNESOTA DEPARTMENT OF TRANSPORTATION LETTER (March 10, 2025).

landowners that provided information about the scoping decision and the new route alternatives that would be studied as part of the EIS. A copy of this mailing is provided as **Schedule 4** to my testimony.

VIII. CONCLUSION

Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?

A. Yes.

Ellen L. Heine

Work Experience

Xcel Energy

Principal Siting and Permitting Agent, 2022 – Present

Sr. Siting and Permitting Agent, 2014 – 2022

Permitting and Compliance Analyst, 2011-2014

- Lead agent on multiple transmission and renewable energy projects
- Collaborate with internal and contract project team members and agency staff to plan, permit and execute projects
- Develop training materials for Company compliance efforts
- Assign, manage and direct consultant activities for capital projects
- Coordinate with team members, agency staff, consultants and construction managers and crews on permitting and compliance issues for projects
- Manage compliance filings and tasks related to permitted transmission projects
- Acquire federal and state permits for wetlands, water and land crossings
- Mentor Permitting Interns in roles within the Permitting group

GIS Technician, 2010-2011

Metropolitan Council

- Updated the 2010 Land Use data for the Twin Cities Metropolitan Area using aerial imagery, parcel data, and community planning documents, and online resources
- Expanded my knowledge of databases and statistical analysis through assistance of other team members working with census data for forecasts and employment modeling

Independent Contractor, 2010-2011

- Conducted phone interviews with school staff and contractors to prepare case studies on K-12 schools with renewable energy projects
- GIS analysis and mapping of senior housing locations in the Twin Cities
- Collected and summarized transportation and housing research data for Grand Rapids comprehensive plan update

Land Conservation Specialist/Planner, 2006 – 2010

Minnehaha Creek Watershed District (MCWD), Deephaven, Minnesota.

- Conducted erosion control permit site inspections for MCWD and Pollution Control Agency permitted projects and worked with contractors on compliance issues
- Coordinated with city planning and public works staff as well as surveyors, realtors and real estate attorneys on land conservation development and restoration projects
- Presented development plans to Planning Commissions and City Councils for conservation development
- Created maps and analyses for baseline documentation, wetland delineation and project reporting
- Evaluated properties for conservation potential and coordinated meetings with a Technical Advisory Team to review conservation opportunities

Project Experience

Sherco Solar, Co-lead Site and Route permitting effort for 460 MW solar facility in Sherburne County, Xcel Energy's first utility scale solar development project. Responsibilities include regulatory requirements evaluation, coordination and consultation with state regulatory agencies, collaboration with the development partner on development of permit applications and supporting documentation, and evaluation of EPC contractors.

Bayfield Second Circuit Transmission Line, Lead permitting effort on a challenging project with significant community involvement and opposition, multiple approvals required from local, state and federal agencies, and multiple project changes requiring coordination with the Project team, contractors and agency staff.

Nelson to Mississippi River Rebuild, Collaborated with federal agency regulators and the project team to develop a successful plan for rebuild of the transmission line through the Mississippi River National Wildlife Refuge while complying with DNR, Corps of Engineers and FWS requirements which included significant timeframe and access constraints.

CapX Hampton to Rochester to La Crosse, Coordinated with the internal project team as well as agency representatives, consultants and members of the public to acquire state and federal permits, train crews on permit requirements, implement the project, and track and report on compliance with permit requirements throughout the life of the project.

Hiring of Permitting Interns, Worked with SLR team members on multiple rounds of intern hiring including updating job descriptions, reviewing resumes, and conducting interviews for our group

Education

Master of Urban and Regional Planning, University of Minnesota,
Emphasis: Environmental Planning and Geographic Information Systems

Bachelor of Arts, University of Minnesota-Morris,
Major: Biology, Minor: Chemistry

Name	Segment of the Project	Proposer	Description	Xcel Energy's Position	Summary of Xcel Energy's Analysis
Route Segment 1	Segment 1 South	Public	Route Segment 1 starts north of the Eastwood Substation in Blue Earth County. It traverses south from Highway 14 and then east along Madison Avenue until 594th Avenue where it turns north until it joins Segment 1 South at N. Victory Dr. This route segment would avoid potential impacts to commercial property.	Oppose	This proposed segment would shift the alignment of the new 345 kV line away from a commercial/highway corridor to a more residential area and does not appear to reduce overall impacts.
Alignment Alternative 2	Segment 1 North	Applicant	Alignment Alternative 2 shifts the alignment of Segment 1 North to the east side of 589th Avenue. This alignment alternative would avoid a new development that has broken ground in the same location as the property alignment for Segment 1 North. The parcel is not wide enough to accommodate the transmission line and commercial development.	Support	This alignment shift was added after receiving feedback from a landowner that the initially proposed alignment conflicted with a development that was underway on a narrow parcel west of 589 th Avenue.
Route Segment 5	Segment 1 South	Applicant	Route Segment 5 is located in the city of Madison Lake near Walnut Avenue and East Street. Route Segment 5 extends from Segment 1 South at the northeast side of the city along the south side of an existing railroad to the west side of 626th Avenue and then south to rejoin Segment 1 South.	Support	This route segment would avoid bisecting a parcel where construction of a new commercial store along Walnut Avenue is planned. The commercial development will require extension of East Street and installation of turn lanes and sidewalks which would encroach on the initially proposed alignment.

Name	Segment of the Project	Proposer	Description	Xcel Energy's Position	Summary of Xcel Energy's Analysis
Route Segment 6	Segment 1 South	Public	Route Segment 6 would follow the Sakatah Singing Hills State Trail. Route Segment 6 would start at the intersection of 516th St. and the Sakatah Singing Hills State Trail and continue 3.6 miles east and rejoin Segment 1 South near Highway 60. This route segment is intended to utilize the existing Sakatah Singing Hills State Trail corridor to reduce additional land use conversion, and to move the line away from multiple residences along Highway 60.	Oppose	If the transmission line is placed within the Sakatah Singing Hills State trail corridor as proposed, this alignment would require removal of trees on one or both sides of the trail, depending on how much right-of-way is shared between the transmission line and the trail.
Route Segment 7	Segment 1 South	Applicant	Route Segment 7 is located south of the city of Morristown along 260th Street West. Route Segment 7 would avoid construction of a new residence along 260th Street West.	Support	This alternative was added after receiving more detail regarding the proximity of homes located on the north and south sides of 260th Street West. This alternative will avoid a new residence that is being constructed along 260 th Street West.
Alignment Alternative 8	Segment 1 North	Public	This Alignment Alternative 8 starts east of Echo Avenue and would traverse 0.2 miles northeast where it would reconnect with Segment 1 North. The Alignment Alternative would avoid tree removal near a steep hill along Segment 1 North.	No Position	If selected the corresponding portion of the existing 115 kV line, which would be double-circuited with the 345 kV line, would also be shifted to match this alignment.

Name	Segment of the Project	Proposer	Description	Xcel Energy's Position	Summary of Xcel Energy's Analysis
Route Segment 9	Segment 1 North	Public	Route Segment 9 is located southwest of the city of Faribault and east of Cannon Lake. The route segment would shift the route approximately 600 feet to the east of where it is proposed and span 0.9 miles northeast where it would reconnect with Segment 1 North. Route Segment 9 would minimize tree clearing.	No Position	If selected the corresponding portion of the existing 115 kV line, which would be double-circuited with the 345 kV line, would also be shifted to match this alignment.
Route Segment 10	Segment 1 South	Public	Route Segment 10 starts at Appleton Ave. north of 250th St. West and traverses east to Interstate 35 and then north along the east side of the interstate where it would connect with Segment 2 South.	No Position	Note: The endpoint for this segment is described as Segment 2 South, but it would continue north to Segment 2 North if that alignment is selected by the Commission.
Route Segment 11	Segment 1 South	Public	Route Segment 11 starts on 250 th St. just west of Appleton Ave. and traverses east to the west side of Interstate 35 then north along the west side of the interstate until intersecting with Route Segment 10, described above, continuing north along the east side of the interstate where it would connect with Segment 2 South.	No Position	Note: The endpoint for this segment is described as Segment 2 South, but it would continue north to Segment 2 North if that alignment is selected by the Commission.

Name	Segment of the Project	Proposer	Description	Xcel Energy's Position	Summary of Xcel Energy's Analysis
Route Segment 12	Segment 4	Public	Route Segment 12 involves constructing the 161 kV line parallel to the existing CapX 345 kV line (Segment 3) between the North Rochester Substation and the point described as Chester Junction. It would parallel the double-circuit 345/345 kV line with the exception of three locations where it would diverge to avoid a constraint or pinch-point along the existing line.	No Position	This alternative would parallel, but would not share right-of-way, with a double-circuit 345/345 kV line, resulting in an approximately 250 foot wide transmission line ROW (150 feet for the 345/345 kV line and 100 feet for the 161 kV line) on many affected parcels. In the locations where there is a pinch point, this would result in certain residences having a 345/345 transmission line on one portion of their property and a new 161 kV line on another portion. This alternative would also add another transmission line crossing of the Zumbro River at White Bridge Road where there is already a 345/345 kV transmission line crossing.
Route Segment 13	Segment 4	Applicant	Route Segment 13 involves double circuiting the new 161 kV with the existing North Rochester to Northern Hills 161 kV line. Route Segment 13 starts at the North Rochester Substation and would double circuit the existing transmission line for 11.3 miles south where it would connect to Segment 4 West.	Support	This route segment would reduce Project related impacts on the natural environment and human settlement by using an existing transmission line right-of-way

Name	Segment of the Project	Proposer	Description	Xcel Energy's Position	Summary of Xcel Energy's Analysis
Alignment Alternative 15	Segment 4	Public	Alignment Alternative 15 is an alternative to the alignment of Route Segment 12, described above, at the Zumbro River crossing. This alternative would cross the Zumbro River on the south side of the County Road 12 and on the south side of the existing 345 kV transmission line.	No Position	Impacts from this alternative are similar to the alignment for the corresponding portion of Route Segment 12.
Alignment Alternative 16	Segment 4 East	Public	Alignment Alternative 16 is alternative to a portion of Segment 4 East. It would shift the corresponding portion of the 161 kV line to the south side of 75th Street NW for approximately 950 feet.	Oppose	This alternative would diverge from the existing 69 kV line, which the new 161 kV line would be double-circuited with, reducing the amount of existing right-of-way sharing. This alternative requires an approximately equal amount of tree clearing as the original route. This alternative would be closer to an existing home than the corresponding portion of the proposed alignment it is proposed to replace.

Name	Segment of the Project	Proposer	Description	Xcel Energy's Position	Summary of Xcel Energy's Analysis
Route Segment 17	Segments 1 and 2	Public	Route Segment 17 involves constructing the new 345 kV transmission line along State Highway 14. It begins at a point on Segment 1 South near the intersection of County Road 12 and Hwy 14 and continues east, primarily located within or adjacent to the U.S. Highway 14 right-of-way, to Byron. At Byron Route Segment 17 travels north to the North Rochester Substation and would be double-circuited with the existing Pleasant Valley to North Rochester 345 kV transmission line.	Oppose	See Direct Testimony of Ellen Heine
Route Segment 18	Segment 1	Minnesota Public Utilities Commission	Route Segment 18 departs Segment 1 North and travels east along an existing property line before intersecting 230th Street West, just south of Highway 60 in Rice County. From its intersection within 230th Street West, the route segment would extend northeast until it intersects with Route Segment 9 which is described above. This route segment would move the proposed 345 kV line further from Cannon Lake.	No Position	If selected the corresponding portion of the existing 115 kV line, which would be double-circuited with the 345 kV line, would also be shifted to match this alignment.

IN THE MATTER OF THE APPLICATION FOR A MPUC DOCKET NO. E002/TL-23-157
ROUTE PERMIT FOR THE MANKATO TO
MISSISSIPPI RIVER 345 kV TRANSMISSION
PROJECT IN SOUTHERN MINNESOTA

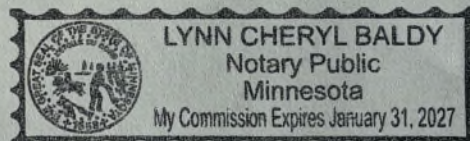

STATE OF MINNESOTA)
) SS.
COUNTY OF HENNEPIN)

I, Vicki Semsch, hereby certify that on February 12, 2025, I directed to be sent by U.S. Mail a true and correct copy of the attached mailing regarding the **Project Route Updates, Scoping Decision and timeline** for the Mankato – Mississippi River 345 kV Transmission Line Project to all persons on the attached mailing list.

Vicki Semsch

Transmission Line Information

MMRT Project landowner update | February 2025

Dear Landowner:

The proposed Mankato-Mississippi River Transmission Project (MMRT Project) will improve reliability, deliver low-cost renewable energy and provide other regional benefits by building new and more resilient “backbone” electric transmission infrastructure to serve customers. The proposed project includes about 120 miles of new and upgraded 345 kilovolt (kV) transmission lines between the existing Wilmarth Substation near Mankato and a connection point at the Mississippi River near Kellogg. It also includes building about 20 miles of new 161 kV transmission lines between the existing North Rochester Substation near Pine Island and an existing transmission line northeast of Rochester, which is being relocated from its existing alignment to install the new 345 kV infrastructure.

The MMRT Project is part of a portfolio of long-range electric transmission projects identified by the regional grid operator, MISO, to improve reliability and make the grid more resilient during extreme weather, and ensure customers receive the electricity they need as aging generation plants are retired and new wind and solar energy developments are built.

Project status

On October 3, 2024, the Minnesota Public Utilities Commission (MPUC) approved the scope of the Environmental Impact Statement (EIS) that will be prepared for the proposed project. As part of this process, new transmission line route options and system alternatives will be studied, along with the routes originally proposed in the combined Certificate of Need and Route Permit Application filed in early 2024.

You are receiving this letter because your property is located either on one of the newly added routes or one of the originally proposed routes. A map of all routes under consideration is included in this mailing.

Next steps and opportunities for public comments

The Minnesota Department of Commerce – Energy Environmental Review and Analysis (EERA) is expected to publish the Draft EIS for the project in the spring of 2025. A comment period will then be opened after the Draft EIS is published.

Public hearings will be scheduled in the project area where landowners, local officials, and other stakeholders can provide comments about the project. Comments will be accepted on the Certificate of Need, Route Permit Application, any aspects of the route segments under consideration, and the information contained in the Draft EIS. Both in-person and virtual hearings will be held.

The locations, dates and times of the hearings have not yet been determined. We will post the public hearing schedule on the MMRT Project website (mmrtproject.com) after it has been finalized and work with the State of Minnesota staff to publicize the meeting dates and locations.

EERA will prepare and file the final EIS for the project after the comment period closes, and public evidentiary hearings are completed. Additional public and other stakeholder comments

on the adequacy of the EIS are due after the final EIS is filed. The Administrative Law Judge (ALJ) overseeing the project will then prepare and file the ALJ Report, which will include findings of fact, conclusions of law and recommendations, in late 2025.

The MPUC will review all information on the record, including the application and other information submitted by Xcel Energy, the draft and final EIS documents, and comments and information provided by landowners, members of the public and other stakeholders. We anticipate the MPUC will make a final decision regarding the project in late 2025.

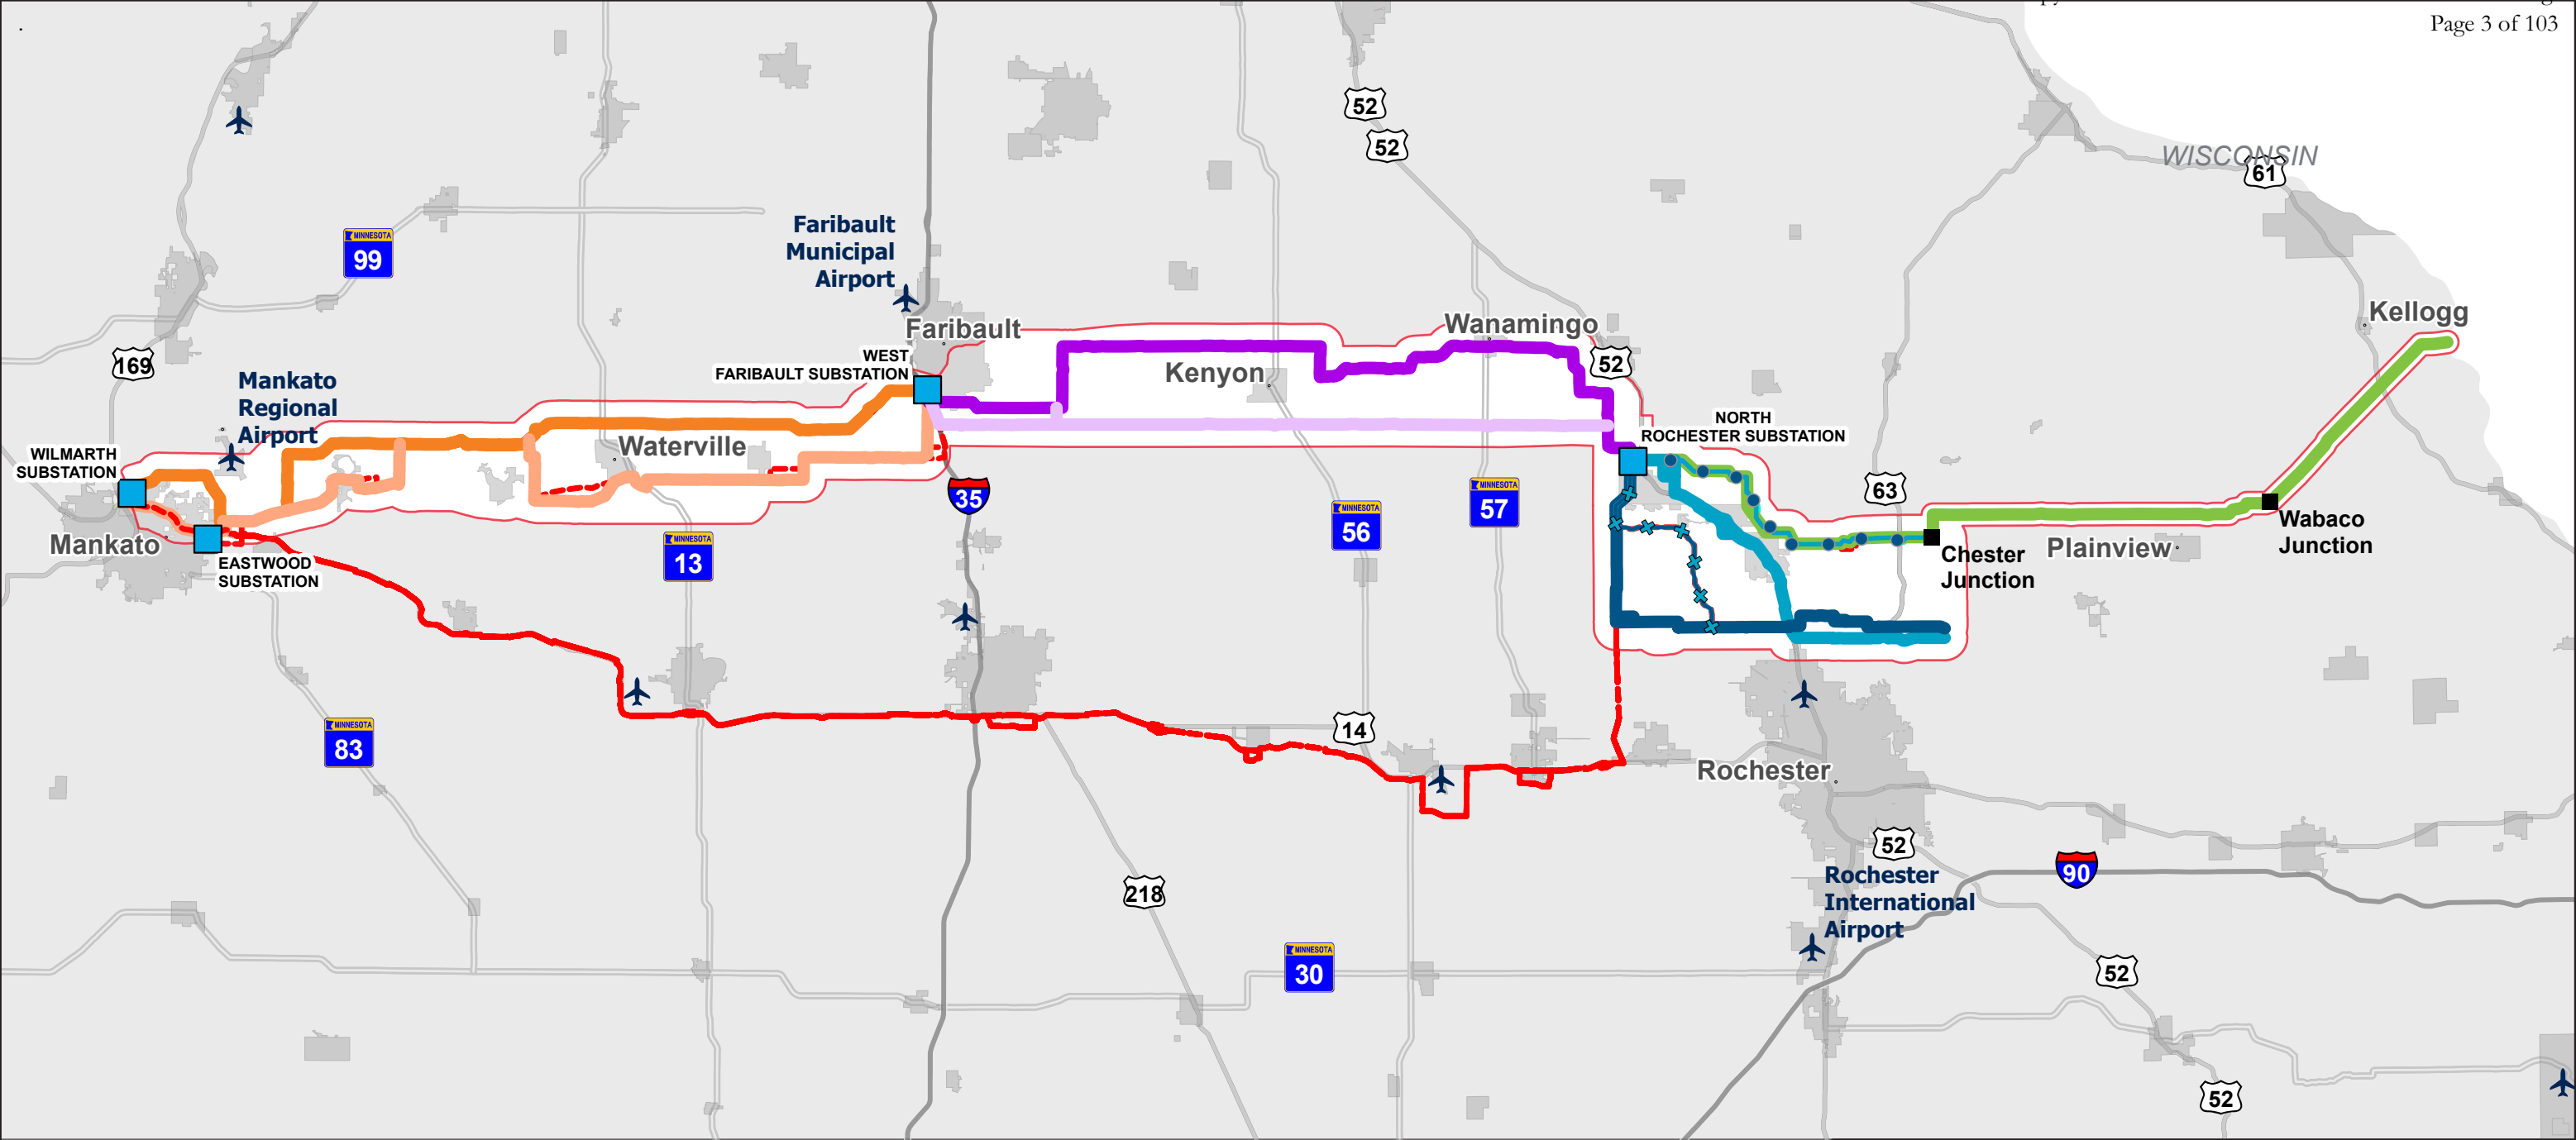

Submitting comments

After the EIS is filed, the MPUC will accept public comments regarding the proposed project and the Draft EIS. The MPUC will announce the deadline for written comments when the Draft EIS is released. You may submit comments in any of the following ways (please include docket numbers CN-22-532 and TL-23-157 in your comments to ensure they are included in the correct proceeding):

- Email comments to Rich Davis, Environmental Review Manager with the Minnesota Department of Commerce, at richard.davis@state.mn.us. You may also email Cezar Panait and Trevor Culbertson with the MPUC at cezar.panait@state.mn.us and trevor.culbertson@state.mn.us.
- Submit comments online by visiting <https://mn.gov/commerce/energyfacilities/#comment> and following the instructions.
- Mail comments to the following address:
Richard Davis
Minnesota Department of Commerce
85 7th Place East, Suite 280
St. Paul, MN 55101

Contact Xcel Energy

If you have questions about the project or the regulatory process, please contact us by leaving a voicemail at 800-853-3365 or by emailing us at contact@mmrtproject.com. You may also submit questions at mmrtproject.com/contact. For more information about the project, please visit mmrtproject.com.
