What is Three Rivers Wind Project environmental plan if they would replace blades, heads, batteries and towers? This question was asked at the public meeting held at the Jackson County Central High School on Thursday, February 20, 2020 but no one had an answer for us. What is the Public Utilities answer to this? Attached is a picture (File called "Burying Wind Tower Blades) that was published on Bloomberg News of blades being buried. Do you call this environmentally responsible?
