VII. RECOMMENDATIONS	12

1 **I. INTRODUCTION**

2 **Q. Please state your name, occupation, and business address.**

3 A. My name is Peter Teigland. I am employed as the Planning, Policy, and Telecom Unit
4 Supervisor by the Minnesota Department of Commerce, Division of Energy Resources
5 (Department). My business address is 85 7th Place East, Suite 280, St. Paul, Minnesota
6 55101-2198.

7
8 **Q. What is your educational and professional background?**

9 A. I received a Bachelor of Arts degree with a major in English literature from McGill
10 University in 2006. In 2008, I received a Master of Arts degree in English from the
11 University of Virginia. I received a Master of Business Administration degree from the
12 Carlson School of Management at the University of Minnesota in 2014 and a Juris
13 Doctor from the University of Minnesota Law School in 2015. I joined the Department in
14 November 2023. My relevant professional work prior to joining the Department
15 includes work from 2013 to 2015 at a community solar garden development company,
16 MN Community Solar LLC, and work at the Minnesota Solar Energy Industries
17 Association (MnSEIA) from 2020 to 2022.

18
19 **Q. Please describe your regulatory experience.**

20 A. Since joining the Department, I have contributed to work in numerous dockets across a
21 variety of topics including resource plans, distribution plans, transportation

1 electrification plans, rate design, resource acquisition, certificates of need,
2 interconnection policy, tariff revisions, other miscellaneous dockets, and phone dockets.

3
4 In my time with MN Community Solar and MnSEIA, my regulatory work included various
5 solar-related dockets, including Solar*Rewards Community and interconnection
6 dockets.

7
8 **II. PURPOSE AND SCOPE**

9 **Q. Have you previously filed testimony in this proceeding?**

10 A. No.

11
12 **Q. What are your responsibilities in this proceeding?**

13 A. I am responding to the testimony of Xcel witness Lisa Peterson's direct and rebuttal
14 testimony on the topic of community solar gardens (CSGs). Specifically, I am responding
15 to the following issues:

16 (1) CSG facility and subscriber eligibility;

17 (2) attorney's fees related to CSG contractual disputes; and

18 (3) integration costs related to DER in the interconnection queue.

19
20 **III. BACKGROUND INFORMATION RELEVANT TO THIS PROCEEDING**

21 **Q. What is a community solar garden?**

22 A. A community solar garden is a way for people to enjoy the monetary benefits of third-
23 party solar without needing to install solar on their own property or connect it physically

1 to their premises. The electricity generated by the CSG is metered where it
2 interconnects with the utility system, and portions of that energy are credited to CSG
3 subscribers on their electric bills, proportionate to the amount subscribed to. The utility
4 pays subscribers in bill credits for that portion, and CSG subscribers pay the third-party
5 CSG operator for the right to receive that bill credit.

6
7 **Q. Who are the parties involved in Xcel's CSG programs?**

8 A. There are at least three parties to a given CSG: the CSG operator, the utility (Xcel), and
9 the subscribers. The CSG operator may or may not be the same party that developed
10 the CSG, as the CSG can be and is often sold at some point during or after development
11 and interconnection with the utility.

12
13 **Q. What is the Department's role in Xcel's CSG program?**

14 A. There are two Xcel CSG programs, the Solar*Rewards Community program and the Low-
15 and Moderate-Income Accessible (LMI-accessible) CSG program. In the former, the
16 Department acts as a regulatory advocate on behalf of the public interest. That
17 program, which was wound down for new applicants at the end of 2023, is a tariffed
18 program enacted in 2013 by Minn. Stat. § 216B.1641. The Department does not play an
19 administrative role or have any role in the contracts between any of the involved
20 parties.

1 In the LMI-accessible program, which was enacted in 2023 by an update to Minn. Stat.
2 § 216B.1641, the Department plays an administrative role to approve CSG participation
3 in the program based on statutory criteria.
4

5 **Q. What is the difference between the Solar*Rewards Community program and the LMI-**
6 **accessible CSG program?**

7 A. The Solar*Rewards Community (S*RC) program is a program offered by Xcel that allows
8 subscribers, who must be Xcel customers located within the same county or an adjacent
9 county to the CSG they subscribe to, to receive bill credits on their electric bills from a
10 portion of the energy generated by the CSG facility. This program is administered by
11 Xcel. The LMI-accessible CSG program is similar, and replaced the S*RC program for new
12 CSGs starting in 2024. While bill-credit rates and other parameters differ in the LMI
13 program, there are two other key distinguishing factors: first, program eligibility is
14 determined by the Department; second, subscribers may be located anywhere in Xcel
15 service territory. In both programs, both the subscriber and the CSG must be located in
16 Xcel service territory. Both programs originate from Minn. Stat. § 216B.1641.
17

18 **Q. In brief, how would the transfer of service territory impact CSG subscribers and CSGs**
19 **in and around the Slayton area?**

20 A. All subscribers to CSGs in the Slayton area that would be transferring electric service
21 from Xcel to a Slayton municipal utility would lose access to CSG subscriptions in both
22 the Solar*Rewards Community program and the LMI-accessible CSG program. The

1 requirement that subscribers to CSGs in either program live in Xcel service territory is
2 clearly established in Minn. Stat. § 216B.1641, subds. 1(c), 6(b). CSG facilities within the
3 reassigned service territory would no longer be eligible to participate in either program.
4 Slayton area CSGs that remain in Xcel territory after a service area reassignment would
5 still be eligible to participate in both programs.

6
7 **IV. IMPACT OF SERVICE TERRITORY TRANSFER ON EXISTING CSG SUBSCRIBERS**

8 **Q. Are there CSG subscribers in the City of Slayton?**

9 A. Yes. Ms. Peterson states in her direct testimony that “it appears that 221 customers in
10 Slayton are subscribers to CSGs.”¹

11
12 **Q. Would those subscribers lose access to their subscriptions in the case of a service**
13 **territory transfer?**

14 A. Yes. As Ms. Peterson states, “current Xcel Energy customers living in Slayton will no
15 longer be able to receive bill credits for their CSG subscriptions.”²

16
17 **Q. Will those subscribers that are no longer eligible for CSG subscriptions get a refund**
18 **from the CSG operator?**

19 A. I don’t know. Neither the Department nor Xcel is a party to those contracts, which are
20 between the CSG operator and the subscriber.

21

¹ See, e.g., Ex ____ at 36 (Peterson Direct).

² *Id.*

1 **Q. Does this subscriber eligibility affect the just compensation calculation?**

2 A. No. While Ms. Peterson asserts that Xcel “may need to conduct outreach and assist
3 Slayton-area customers who are CSG subscribers”³—which Xcel requests to track as an
4 integration expense—I believe that ineligibility for an Xcel program like S*RC would be
5 self-evident for many of the impacted subscribers, as the financial benefit from their
6 subscriptions comes as a bill credit on their Xcel bill. Additionally, CSG developers and
7 operators are responsible for recruiting subscribers and closing sales of subscriptions,
8 not Xcel (or the Department). And as Ms. Peterson acknowledged, Xcel is not a party to
9 the contracts between CSGs and their subscribers.⁴ Lastly, if Xcel plans to engage in
10 broad outreach to its customers that would be subject to a service territory
11 reassignment, then a line about future ineligibility for Xcel programs like S*RC could be
12 included at an insignificant marginal cost. For those reasons, I recommend that Xcel not
13 be allowed to track expenses related to CSG program eligibility as an integration cost.

14
15 **Q. Should costs incurred by CSG operators to notify Slayton-area CSG subscribers of their**
16 **ineligibility be included as integration expenses?**

17 A. No. CSG operators are not parties to this transaction.
18

19 **Q. Should Slayton be required to provide compensation for disputes involving possible**
20 **cancellation of CSG contracts, particularly attorney’s fees?**

³ See, e.g., Ex ____ at 27 (Peterson Direct).

⁴ See, e.g., Ex ____ at 36 (Peterson Direct).

1 A. Ms. Peterson requests that the Company be allowed to track and recover integration
2 expenses related to current CSG subscribers in Slayton, including “expenses for any
3 disputes related to the cancellation or change of CSG contracts and agreements” as an
4 element of just compensation.⁵ For the same reasons that subscriber eligibility should
5 not affect the just compensation calculation, attorney’s fees related to disputes about
6 cancellation of CSG contracts and agreements should not be tracked in the just
7 compensation calculation.

8
9 **V. IMPACT OF SERVICE TERRITORY TRANSFER ON CSGs AND DER IN QUEUE**

10
11 **Q. Please summarize Xcel’s testimony regarding how the Commission should address the
12 impact of the service territory transfer on existing CSGs in the area near Slayton.**

13 A. Xcel has raised a number of concerns regarding the CSGs and distributed energy
14 resources (DER) in queue. CSGs and DER are said to be “in queue” when their
15 applications are deemed complete per MN DIP 1.5.2. MN DIP (State of Minnesota
16 Distributed Energy Resources Interconnection Process) is the document that governs
17 the interconnection process for distributed energy resources in Minnesota.⁶

⁵ See, e.g., Ex. ____ at 37 (Peterson Direct).

⁶ See generally, Public Utilities Commission, *State of Minnesota Distributed Energy Resources Interconnection Process v.2.4* (Apr. 28, 2025), https://mn.gov/puc/assets/MN%20DIP%202025%20Clean%20April%2024%202025_tcm14-623149.pdf. (MN DIP).

Specifically, Xcel raised concerns about impacts on engineering studies and who bears the burden of system upgrade costs to accommodate DER on the Slayton West substation (SLW).⁷

Q. How many CSGs or other DER are interconnected with or are in the queue to interconnect at the SLW substation?

A. According to Xcel's public DER interconnection queue report, there are seven CSGs or DER interconnected or in queue at the SLW substation.⁸ Those projects, by Application Number, are 04306370, 03124714, 05447725, 04056113, 06012055, 05998917, and 05998919. It's my understanding that all of these projects are outside of Slayton city limits.

Q. How are these seven projects categorized in the DER interconnection queue report?

A. Projects are categorized by a number of distinguishing labels, including program type, substation, feeder, application step, and more.

Q. What do the various program types for the seven projects mean?

A. There are three program types assigned to these projects: Solar*Rewards Community, LMI, and Distributed Generation. In this context, the tag "Solar*Rewards Community"

⁷ See, e.g., Ex. ___ at 40-41 (Peterson Rebuttal).

⁸ See, e.g., Ex. ___, PT-S-1. The Department downloaded Xcel's January 1, 2026 DER Interconnection queue at <https://xcelnew.my.salesforce.com/sfc/p/#1U0000011ttV/a/R300000ITQuS/htOqxqYRTIGAjDd00Xz9CwsTX4YhG3.Z7RTcmGwjc0Q>. The file's size is inflated due to a very large number of empty rows, which have been deleted from the version presented in the exhibit. The projects associated with the SLW substation have been highlighted.

means that the project is part of the S*RC or Legacy CSG program. The “LMI” designation means that the project has been accepted into the LMI-accessible CSG program. To be accepted into the LMI-accessible program, the project must have a signed Interconnection Agreement (IA), among other criteria. The label “Distributed Generation” is a generic label that can change if, for example, the project is accepted into the LMI-accessible CSG program by the Department.

Q. What do the various application status labels assigned to these seven projects mean?

A. There are four application status labels assigned: permission to operate, design and construction, facilities study, and on hold. “Permission to operate” means that the project is operational as an active garden, per the “Instructions” tab in the spreadsheet. Projects 04306370 and 03124714 are assigned this label and appear to be active S*RC gardens.

“Design and Construction” means that the project has an executed IA and but has not yet moved on to the penultimate stage of “Metering and Testing,” which occurs before “Permission to Operate.” Project 04056113 is assigned this label and appears to be an LMI-accessible CSG under construction.

“Facilities Study” denotes that the project is in the engineering study phase as described in Section 4.4 of the Minnesota Distributed Energy Resources Interconnection Process

1 (MN DIP).⁹ Project 05447725 is assigned this label and appears to be in the process of an
2 engineering study.

3
4 “On Hold” means that the project application is complete, in the queue, and awaiting
5 the projects ahead of it to move forward to either operational status or to drop out of
6 the queue. Projects 06012055, 05998917, and 05998919 are assigned this status.

7
8 **Q. What does the feeder label refer to?**

9 A. The feeder label identifies the feeder line the project proposes to interconnect with or is
10 interconnected with. Six of the projects active or in queue at the SLW substation appear
11 to be on the SLW062 feeder, and one, project 04306370, is on the SLW062 feeder.

12
13 **Q. What impact will a service territory reassignment have on program eligibility for active**
14 **CSG projects in the Slayton area?**

15 A. As discussed above, eligibility for project participation (like customer) in the S*RC and
16 LMI-accessible CSG programs is determined in part by location within Xcel service
17 territory. There is no indication that the gardens in service—projects 04306370 and
18 03124714—will not be in Xcel service territory after this reassignment. Therefore, there
19 is no eligibility concern that I can identify.

20

⁹ See MN DIP, Section 4.4.

1 **Q. What impact will a service territory reassignment have on system engineering for**
2 **active CSG projects in the Slayton area?**

3 A. As Ms. Peterson discusses, there may be a need to study SLW for reliability and safety if
4 there is a loss of load at the substation.

5
6 **Q. Who should bear the cost of that study?**

7 A. It is unclear to me who should bear the cost of such a study. I am not aware of any
8 provision in MN DIP that would trigger a study due to loss of load after
9 interconnection—for any reason—that would be borne by already-interconnected DER.
10 As for whether Slayton or Xcel should bear the cost, I refer to my colleague Cuong Ngo's
11 testimony on integration costs.¹⁰

12
13 **VI. IMPACT OF SERVICE TERRITORY TRANSFER ON QUEUED CSGS**

14 **Q. Please summarize Xcel's testimony regarding how the Commission should address the**
15 **impact of the service territory transfer on CSGs that are in the queue for approval to**
16 **interconnect to the grid.**

17 A. Xcel has raised a number of concerns regarding the CSGs that are in the interconnection
18 queue. Specifically, Xcel testified:

19 1) one or more of the DERs in the queue could trigger significant system
20 upgrades if Slayton stays on the system; 2) which project in the queue
21 triggers those upgrades could be different depending on whether Slayton
22 remains on Xcel Energy's system; and 3) if the DERs in the queue
23 interconnect and Slayton then exits the system, the DERs might need to
24 be disconnected until additional upgrades can be completed to ensure

¹⁰ Ex. DOC-___ at 12 (Ngo Rebuttal).

1 safety and reliability. If the third scenario arises, the system upgrades
2 would be caused by Slayton and should be included in the just
3 compensation payment. It is not clear which of these scenarios will
4 ultimately occur.¹¹

5
6 Further, the Company requested authorization to track and recover any integration
7 expenses caused by Slayton related to the DER currently in the interconnection queue,
8 “including increased engineering study costs and system upgrades needed to maintain a
9 safe and reliable system.”¹²

10
11 **Q. Do you agree that the Commission should authorize Xcel to track integration expenses**
12 **caused by Slayton related to DER in the interconnection queue?**

13 A. No. Slayton is not a party to any interconnection agreements pending at the SLW
14 substation, and therefore should not bear integration costs related to DER in the
15 interconnection queue there. Moreover, projects in queue are studied sequentially.
16 The DER further back in queue are not yet ripe for study. When they are first-in-queue,
17 they will be studied for system impacts as the system exists then. While I believe that it
18 would be prudent for Xcel and the developer of the first-in-queue project to place that
19 project on hold until the question of Slayton’s municipalization is resolved, that question
20 is for Xcel and that developer, which is not a party to this contested case, to resolve.

21
22 **VII. RECOMMENDATIONS**

23 **Q. Please summarize your recommendations.**

¹¹ See, e.g., Ex. ___ at 41 (Peterson Rebuttal).

¹² *Id.*

1 A. I offer the following recommendations:

2 1. I recommend that Xcel not be allowed to track expenses related to CSG program
3 eligibility as an integration cost.

4 2. The city of Slayton should not be responsible for attorney's fees related to disputes
5 about cancellation of CSG contracts and agreements should not be tracked in formulas
6 pertaining to just compensation.

7 3. The city of Slayton is not a party to any interconnection agreements pending at the
8 SLW substation, and therefore should not bear integration costs related to DER in the
9 interconnection queue there.

10
11 **Q. Does this complete your surrebuttal testimony?**

12 A. Yes.

How to utilize the DER Queue Report: Best Practices

1. Determine which Feeder queue you are interested in -- the Feeder for any given application c
2. Utilize the dropdown menu for "Feeder" (cell H1) to select only the Feeder of interest
3. Utilize the "Date Application Deemed Complete" (cell C1) to Sort from Oldest to Newest
4. You now have a snap shot of the active DER study queue in order

high volume of On-Site applications, the inclusion of an Active application status (noted by "Step 8: Active" or "Permission to Operate") is limited to the "Project Type" of **Gardens** (Solar*Rewards Community program participants) only.

Example:

	A	B	C	D	E	F	G
1	Application Number	Project Type	Date Application Deemed Complete	Interconnection Process Track	Proposed DER capacity (kW AC)	DER Type	Feeder
105	03130396	On-Site	4/10/2018 12:05	Pre MN DIP	120	Solar PV	CHI311

[illegible]

*Time estimates are calculated using the maximum timeline of 300 days per Fast Track application. Please refer to the Overview of Fees and Timelines Engineering Screens and Studies (PDF) found at www.xcelenergy.com/SRCResources for additional details on specific MNDIP timelines.

These estimates are provided as a courtesy to help inform new applicants of timelines that could be expected for new projects based on existing queues and status of earlier-in-queue projects. These dates are subject to change as prior-in-queue projects shift and change over time.

[Overview of Fees and Timelines Engineering Screens and Studies \(PDF\)](#)

Number of Applications On Hold per Feeder

[illegible]

[illegible]

1	300	0.8
1	300	0.8
1	300	0.8

*Time estimates are calculated using the maximum timeline of 300 days per Fast Track application. Please refer to the Overview of Fees and Timelines Engineering Screens and Studies (PDF) found at www.xcelenergy.com/SRCResources for additional details on specific MNDIP timelines.

These estimates are provided as a courtesy to help inform new applicants of timelines that could be expected for new projects based on existing queues and status of earlier-in-queue projects. These dates are subject to change as prior-in-queue projects shift and change over time.

[Overview of Fees and Timelines Engineering Screens and Studies \(PDF\)](#)
[Community Solar Gardens \(xcelenergy.com\)](#)

Substations with Capacity Constraints

Xfmr Rating: The maximum apparent power the substation transformer is capable of operating under. The summation of daytime minimum load and generation on the transformer cannot exceed this value.

For substations with a known DER $\geq 80\%$ XFMR Rating + DML, new interconnection applications upon study completion have a higher probability to receive a Notice for further analysis required.

Last updated: January 2026

Capacity Constrained Subs: 69

% of Total Substations: 29.29%

% Constrained Last Month: 29.29%

Feeders with Capacity Constraints

Feeder Rating: The maximum apparent power the feeder is capable of operating under at its origin point at the substation. The summation of daytime minimum load and generation on the feeder cannot exceed this value. Feeder conductor upgrades may still be needed to accommodate downstream DER.

For feeders with a known DER $\geq 80\%$ Feeder Rating + DML, new interconnection applications have a higher probability upon study completion to receive a Notice for further analysis required.

Feeders with Aggregate DER $\geq$ DML

Aggregate DER: The summation of all DER ahead in queue

Daytime Minimum Load (DML): The smallest amount of load observed between the hours of 10 AM and 4 PM

Feeders with a known aggregate DER that is greater than or equal to the Daytime Minimum Load (DML) will likely fail the initial review (MN DIP screen 3.2.1.2) and require a supplemental review be performed prior to proceeding further in the process. This could result in more substantial upgrades in comparison to feeders not on this list.

Feeders on this list have a high likelihood of needing a Transmission System Impact Study.

Last updated: January 2026

Feeders with Aggregate DER $\geq$ DML: 237

% of Total Feeders: 20.52%

% of Total Feeders Last Month: 20.61%
