RE: SUPPLEMENTAL COMMENTS  
IN THE MATTER OF AN INVESTIGATION INTO IMPLEMENTING CHANGES TO  
THE RENEWABLE ENERGY STANDARD AND THE NEWLY CREATED CARBON  
FREE STANDARD UNDER MINN. STAT. § 216B.1691  
DOCKET NO. E999/CI-23-151

Dear Mr. Seuffert:

Northern States Power Company, doing business as Xcel Energy, submits these brief supplemental comments in response to the May 23, 2025 Supplemental Comments of the Minnesota Department of Commerce. As we stated in our March 19, 2025 Reply Comments, “[m]ore analysis of the potential rate impacts of an hourly requirement should be undertaken to fully understand the impact to customers before implementation of an hourly matching compliance methodology.” Although the Company does not believe a point-by-point response to the myriad analytical issues and implied recommendations in the Department’s Supplemental Comments would be productive, we are pleased that the Department agrees “that additional analysis and discussion around annual and hourly CFS matching, allocation, REC markets, and other topics is warranted” prior to adoption of an hourly-matching standard that is neither supported nor required under the statutory text of Minn. Stat. § 216B.1691.

We do, however, want to address some potential misconceptions about our cooperation with the Department regarding modeling performed in connection with this Docket. The Company spent significant time discussing our preliminary hourly CFS modeling approach with the Department, which relies on the assumptions from our recently approved resource plan and adds a requirement for hourly carbon-free matching. The Company received the Department’s request for the Encompass input and output files on April 1, 2025. In preparing a response, the Company prepared a detailed step by step instruction guide including screenshots of the Encompass model

interface to assist the Department in replicating the Company's modeling.<sup>1</sup> The Company exchanged numerous emails with the Department regarding the Encompass modeling and met with the Department on April 16, April 23, and April 25, 2025 to assist the Department in replicating the Company's results. There were no errors or omissions in the files or detailed instructions sent to the Department. Rather, as noted by the Department, an issue arose due to differing versions of Encompass that was resolved when the Department installed the same version we use to replicate the Company's modeling. We look forward to continuing discussions with parties and conducting further analysis regarding these issues to ensure we are developing solutions that are in the best interest of our customers and aligned with the enumerated policies of the State.

We have electronically filed this document with the Minnesota Public Utilities Commission, and copies have been served on the parties on the attached service list. - Then, go to Formulas and hit Calculate Now

- Then go to the “Expansion Plans” tab to see additional capacity added for this project.

- We have optimized the model until 2045 but focus on the results to 2040, the difference is additional capacity added over the 800MW Settlement Study 1 PVRR which are reflected in rows 42-48 that informed our results.
