RE: REPLY COMMENTS
NATURAL GAS INNOVATION ACT PLAN
DOCKET NOS. G002/M-23-518 & G999/CI-21-566

Dear Mr. Bull:

Northern States Power Company, doing business as Xcel Energy, submits the enclosed Reply Comments per the Commission's August 21, 2025 Notice of Reply Comment Period.

We have electronically filed this document with the Minnesota Public Utilities Commission, and copies have been served on the parties on the attached service list. Please contact Taige Tople at 612-216-7953 or taige.d.tople@xcelenergy.com or contact me at Holly.R.Hinman@Xcelenergy.com if you have any questions regarding this filing.

Sincerely,

/s/

HOLLY HINMAN

IN THE MATTER OF XCEL ENERGY'S
NATURAL GAS INNOVATION PLAN

DOCKET NOS. G002/M-23-518 &
G999/CI-21-566

REPLY COMMENTS

INTRODUCTION

Northern States Power Company, doing business as Xcel Energy (Company), submits the enclosed Reply Comments per the Commission's August 21, 2025 Notice of Reply Comment Period.

The Sherco Hydrogen pilot is an exciting opportunity to generate learnings under the NGIA (Natural Gas Innovation Act). The pilot will produce green hydrogen using an electrolyzer powered by renewable energy. The hydrogen will be blended with natural gas to provide fuel to an existing onsite auxiliary steam boiler system, which currently supplies steam for start-up of the coal units, heating for the Sherco building, and to provide steam for an existing industrial customer. The Company will have the opportunity to assess hydrogen's energy potential, from production to offtake. In addition, the location allows the pilot to contribute to and benefit from the transformation of the Sherco site into a clean energy hub, encouraging green energy job creation. It will also provide a zero-carbon fuel option to displace some natural gas usage and reduce greenhouse gas emissions.

The Company would like to begin this pilot as soon as possible, but it has concerns regarding the OAG's recommendation in Docket No. G002/M-25-259 that the affiliate interest arrangement should be modified to require the Company to assume all risks and costs of a stranded asset. The Company believes that such an outcome would be unreasonable as well as being precluded by prior determinations by the Commission in its Order of May 16, 2025. If the Commission concludes that the risks and costs of a stranded asset in the Sherco Hydrogen pilot should be treated the same

as any other NGIA pilot, and are not required to be borne by the Company, then the Company requests that permission to proceed with the Sherco pilot be given ahead of a final order in Docket No. G002/M-25-259.

COMMENTS

I. PROCEDURAL BACKGROUND

The Commission approved the Company's Natural Gas Innovation Act (NGIA) plan in an Order issued on May 16, 2025 (NGIA Order). On June 16, 2025, the Company submitted two filings in compliance with the Commission's NGIA Order specific to the Company's Sherco Hydrogen pilot: (1) a filing that describes the Company's plan to mitigate the risks of stranded assets;¹ and (2) a petition in a new docket² regarding the affiliate interest arrangement.³

On August 15, 2025, the OAG responded to both of these filings, combining its comments on the affiliate interest arrangement with its objection to the "negative checkoff" period on the Company's compliance filing addressing risk mitigation.

On August 21, 2025, the Commission issued a Notice of Reply Comment Period, which noted that the sufficiency of the affiliate interest agreement would be discussed in Docket No. G002/M-25-259 and identifying issues regarding risk mitigation to be resolved in Reply Comments in this docket.⁴

The Notice of Reply Comment Period identified the following topics open for comment in this docket:

- Should the Commission allow Xcel to proceed with its Sherco 5MW hydrogen pilot ahead of its final decision in Docket No. G-002/M-25-259?
- What actions, if any, should the Commission take in response to the objections raised by OAG in its August 15, 2025 comments regarding Xcel's:
 - explanation detailing the steps it has taken and will take to mitigate the risk of a stranded asset for its Sherco 5MW hydrogen pilot; and
 - how it would manage cost recovery for this asset if the industrial customer were to withdraw before Xcel had fully recovered the asset's costs?
 - Are there other issues or concerns related to this matter?

¹ In compliance with Order Point 6.

² Docket No. G002/AI-25-259.

³ In compliance with Order Point 8.A.

⁴ Notice of Reply Comment Period issued on August 21, 2025 at 1.

As discussed further below, the Company requests permission to proceed with the Sherco pilot ahead of a final order in Docket No. G002/M-25-259 if the Commission agrees that the Company is not required to assume the risks and costs of a stranded asset in the Sherco pilot. The Company has provided several viable options for fully utilizing the electrolyzer which make the risk of a stranded asset low, so the Company believes that no further action is needed regarding the OAG's comments.

II. PROCEEDING WITH THE SHERCO HYDROGEN PILOT AHEAD OF A FINAL DECISION IN THE AFFILIATE INTEREST DOCKET

The Company appreciates the Commission seeking comments on whether the Company should be allowed to proceed with the Sherco Hydrogen pilot ahead of a final decision in the affiliate interest docket. The Company is eager to start the pilot to ensure that there is sufficient time to meet the new deadline (as revised in the federal government's tax reconciliation measures signed into law on July 4, 2025) for obtaining Inflation Reduction Act (IRA) Production Tax Credits (PTC) for this pilot. The new deadline requires that construction begin prior to January 1, 2028. Significant planning and advanced work is needed prior to construction, making it important to begin as soon as possible to secure these tax benefits.

The Company is excited about the potential skills and learnings it will get from the pilot, including the valuable opportunity to gain experience with hydrogen production, storage, safety and offtake which it plans to share publicly. This pilot will be an important part of achieving the goals of the NGIA in the Company's plan.

The outcome of the affiliate interest arrangement docket, however, could affect the viability of the Sherco Hydrogen pilot. For instance, it would significantly change the Company's ability to move forward with this pilot if the Commission agrees with the OAG's recommendation that the Company should bear all stranded asset risks and costs for the electrolyzer. The Company does not believe this would be a reasonable outcome for reasons stated in Docket No. G002/M-25-259, including that the Commission has already determined that "[t]he relationships between Xcel's regulated operations and its affiliate operations, and between the affiliate and the industrial customer, predate the emergence of the proposed electrolyzer pilot, so the costs, benefits, and risks of those existing arrangements cannot be attributed to the pilot."⁵

Moreover, as with other pilots, benefits will accrue to customers so it makes sense that they would bear its costs. As noted in the NGIA Order, "the Commission finds

⁵ NGIA Order at 9.

that the increased operating cost arising from procuring hydrogen in lieu of natural gas is appropriately understood as a cost of reducing GHG emissions rather than a cost of generating steam; thus the Commission will not bar Xcel from seeking to recover these costs in the same manner as other NGIA costs.”⁶ Additional reasons it would not be reasonable to require the Company to assume all the risks and costs of a stranded asset are discussed in Section III.A below.

To the extent that the Commission maintains its prior determinations which support the conclusion that risks and costs associated with the pilot should be treated like any other NGIA pilot and are not required to be borne by the Company, the Company requests that permission be given to start the Sherco Hydrogen pilot ahead of a final order in Docket No. G002/M-25-259. Permission to proceed is warranted to further the goals of the NGIA so that the Sherco Hydrogen pilot can be implemented within the timeline of the Company’s NGIA plan. Additionally, as discussed above, the Company must meet a construction start deadline of January 1, 2028 to receive PTC tax benefits.

If it is possible, however, that the Commission would require the Company to assume all risks and costs of a stranded asset, we would need a final decision in the affiliated interest docket⁷ to decide whether it is feasible to undertake the Sherco Hydrogen pilot.

III. ACTIONS THE COMMISSION SHOULD TAKE IN RESPONSE TO THE OBJECTIONS RAISED BY THE OAG

The Company addressed the arguments raised by the OAG in Docket No. G002/M-25-259. For convenience, we provide our responses here, which focus on risk mitigation. For the reasons discussed below, the Company’s position is that the Commission need not take any action in response to the objections raised by the OAG.

A. Order Point 6 of the NGIA Order does not Require the Company to Absorb all Risk

The OAG argued that “the Commission should modify the arrangement to make it clear that Xcel’s shareholders must bear *all* risks of its unregulated venture’s use of the electrolyzer”⁸ and that “should LPI stop taking steam service from Xcel’s unregulated

⁶ *Id.*

⁷ Docket No. G002/M-25-259.

⁸ OAG comments at 7-8 (emphasis in original).

affiliate and no alternative use is found for the electrolyzer, Xcel should not be permitted to recover any undepreciated capital costs or return for the electrolyzer.”^{9,10}

The Company disagrees. The Company was ordered to provide strategies to mitigate, not eliminate, the risk of a stranded asset.

Order Point 6 of the NGIA Order states:

Within 30 days, Xcel must file an explanation detailing the steps it has taken and will take to mitigate the risk of a stranded asset for its Sherco 5MW pilot, and how it would propose to manage cost recovery for this asset if the industrial customer were to withdraw before Xcel had fully recovered the asset's costs.

While Order Point 6 requires that the Company provide strategies to mitigate the risk of a stranded asset with the Sherco pilot, it does not require that the Company to absorb all risk. Nor would such a requirement be reasonable. Pilots in general contain inherent risk, and NGIA pilots, which involve unfamiliar technology for the Company, are no exception. While the Company has not and cannot guarantee elimination of all risk from undertaking this pilot, the Company believes it has provided strong mitigation strategies to minimize the stranded asset risk, as discussed further below.

B. The Company Has Provided Robust Mitigation Measures, Making the Risk of Stranded Assets Low

The Company's compliance with Order Point 6 described several robust mitigation strategies for the potential risk of the electrolyzer becoming a stranded asset.¹¹ Those strategies are: (1) providing fuel to the auxiliary boiler to produce steam for the existing industrial client whose current contract is set to expire in 2035;¹² (2) providing fuel to the auxiliary boiler to heat the Sherco buildings as needed for facility operations; (3) opportunities for future industrial partnerships near Sherco through economic development planned by the Sherburne County Power Plant Development Master Plan; and (4) the potential for electrolyzer use at other Company locations.

⁹ OAG comments at 8.

¹⁰ The OAG's arguments are based on its claim that "Xcel's unregulated affiliate is benefiting from the construction and use of the electrolyzer, and it should bear the risks." OAG comments at 8. As discussed more fully in Docket No. G002/M-25-259, the pilot does not provide a benefit to the affiliate and the Commission has already determined that "costs, benefits, and risks of those existing arrangements cannot be attributed to the pilot." NGIA Order at 9.

¹¹ See Compliance filing for Order Point 6, filed June 16, 2025 in Docket No. G002/M-23-518.

¹² The customer has been with the Company for over 30 years and could chose to renew the contract. It could also terminate the contract by providing 12 months' notice.

Accordingly, the Company believes the stranded asset risk to be low.

The OAG questioned the viability of mitigation strategy (2) by asking whether the Sherco operational buildings will be needed after coal retirement.¹³ The Company anticipates continued use of these facilities to operate the synchronous condensers, a grid stability tool needed to regulate power from wind and solar. The synchronous condensers require building heat because of the sensitivity of that equipment to freezing. The OAG also observed “these buildings can be currently heated by the aux boiler, so electrolyzer use is not needed.”¹⁴ This is true, but this has always been true ever since this pilot was conceived and proposed. The goal of the pilot is to gain knowledge about how to manage and maximize efficiency of green hydrogen. Even though the auxiliary boiler can provide heat and steam without the addition of the pilot’s hydrogen, the Company would run the pilot to obtain these skills and learnings.

The OAG also critiqued that mitigation strategy (3) relies on a master plan for economic development instead of identifying specific alternative potential customers.¹⁵ As noted in the Company’s compliance filing for Order Point 6, the Sherburne County Power Plant Development Master Plan addresses development of approximately 1,800 acres of the adjacent parcels to Sherco. Over half of the developable land was determined to be optimal for large, single-user industrial sites, and the remaining 900 acres were deemed available for smaller-scale industrial uses such as manufacturing and warehouses. This provides significant opportunity to seek additional hydrogen offtake partners, should the need arise. The Company believes that it is unrealistic to expect a specific list of alternative industrial customers while the master plan that would provide that information is still being developed and before there is a need.

The Company believes that these options make the risk of a stranded asset in the Sherco pilot relatively low and therefore recommends that the Commission find the Company’s risk mitigation plan acceptable and take no further action with regards to the OAG’s comments.

¹³ OAG comments at 4.

¹⁴ OAG comments at 4-5 (footnote omitted).

¹⁵ OAG comments at 5.

C. Management of Cost Recovery if the Industrial Customer were to Withdraw Before the Company has Fully Recovered the Asset's Costs

As noted above, if the industrial customer were to withdraw before the full cost of the electrolyzer had been recovered, there are at least three other options to fully utilize the asset: continuing use of the electrolyzer to provide fuel to the auxiliary boiler to heat operational buildings at Sherco, the potential of other industrial partnerships near Sherco, and using the electrolyzer at other Company sites.

In the unlikely event that all of these options fail, the Company would pursue cost recovery for any outstanding plant balance that remains, as stated in the Company's compliance filing in response to Order Point 6.¹⁶ The Company would maintain recovery of the outstanding balance under the Commission approved NGIA Rider or, if approved, under base rates.

The Company believes this plan to be reasonable and in keeping with other regulated projects done on behalf of customers.

D. Other Issues or Concerns

None at this time.

CONCLUSION

If the Commission, consistent with its previous statements in the NGIA Order, agrees that the risks and costs associated with the pilot should be treated like any other NGIA pilot and are not required to be borne by the Company, then the Company requests that it be allowed to proceed with its Sherco Hydrogen pilot ahead of a final decision in Docket No. G002/M-25-259. The Company believes its mitigation strategy to avoid stranded assets is reasonable and accordingly requests that no further action be taken in response to the OAG's comments.
