There is a huge discrepancy between the size of Project Skyway noted in Chapter 6, Environmental Assessment 6.10.2 Reasonable Foreseeable Future Actions and what the Pine Island City Council approved for the hyper-scale data center Project Skyway. Until this discrepancy is addressed, this permit should not be approved. No one is giving our community the honest numbers concerning size, water consumption, energy use, noise issues, overall environmental impact, etc. for this data center or for this proposed transmission line and substations. Currently, there is an injunction in place and no actions are taking place concerning Project Skyway, so no need to issue a permit for a huge transmission line until the court case is heard and the final decision is made about this facility. We don't need this level of energy if this data center is stopped in SE Minnesota.
