

ENBRIDGE™

Headquartered in Calgary, Alberta, Canada, Enbridge is a leader in energy delivery in North America. The company transports natural gas and crude oil, which is used to heat homes, power transportation systems, and provide fuel and feedstock for industries. Enbridge operates in Canada and the United States. The world's longest oil and liquids pipeline system. Enbridge is also actively involved in natural gas transmission, gas distribution, renewable and alternative energy, and international energy projects.
