Great River Energy is planning to construct a new 115-kV double-circuit transmission line to power a new distribution substation being built by Minnesota Valley Electric Cooperative at the northwest corner of the intersection of Carver County Road 10 and Laketown Road. Great River Energy is currently reviewing three potential routes for the new transmission line as depicted on the map. These routes are 3 to 5 miles long. Great River Energy will be applying for and seeking approval of a route permit from the Minnesota Public Utilities Commission for this project.

Additional project information and updates are available at
www.GreatRiverEnergy.com/laketown

**PROPOSED PROJECT**

The three routes the utilities are considering for the transmission line will be within Laketown and Dahlgren Townships in Carver County and are shown on the map below:
