Dear Ms. Kahlert,

I just learned that the Public Utilities Commission is revising the rulebook on the certificate of need for any state energy initiative. I'm concerned that this revision does not adequately consider impacts on the climate specifically anywhere in those rule revisions/amendments.

I am writing to ask that this revised criteria include considerations of climate impacts.

I oppose the proposed amendments in their entirety.

Thank you for registering my concerns,
Sincerely,

Craig S. Roth
