

Sullivan proposed decision options for E999/M-19-205

4-Require the MTO to make a compliance filing by September 1, 2020 identifying gaps between meeting the state mandate and meeting the companies clean energy goals in the Minnesota Biennial Transmission Projects Report process.

5-Require in the same compliance filing to address the new or expanded transmission needed to accommodate the following:

1. The requirements in all approved Minnesota resource plans.
2. MISOs current long range planning process.
3. The public commitments of the MTO member utilities.
